Classification Of Grammatical Categories:

Classification of Grammatical Categories Bernard Comrie, 1978 *English Grammatical Categories* Ian Michael, 2010-06-10 This book examines the traditional grammar very briefly for its Greek and Latin origins and fully during its first two hundred years as English grammar **Grammatical Categories in Linguistics and Education** Holden Härtl, Katharina Zaychenko, 2024-11-04 This volume explores how grammatical categories as defined by theoretical linguistics are effectively implemented in language education Aiming to bridge the gap between linguistic research and language pedagogy it offers a detailed inquiry that spans theoretical frameworks and empirical data By presenting a series of insightful studies this work illustrates how findings from theoretical linguistics can be applied to enhance practical language instruction demonstrating the reciprocal enrichment of both fields Essential for linguists language educators and researchers interested in the intersections of grammar cognition and pedagogy the volume is organized into four engaging sections Each section illuminates the nuances of grammar teaching and language acquisition It begins with a theoretical analysis of linguistic categories across diverse languages progresses through the links between linguistic research and teaching methodologies and delves into the role of empirical data in classroom applications The final section focuses on the practical implementation of linguistic categories in language teaching promoting a deeper understanding of grammar as a dynamic component of language learning *The Structure of Modern English* Laurel J. Brinton, 2000 This text is designed for undergraduate and graduate students interested in contemporary English especially those whose primary area of interest is English as a second language Focus is placed exclusively on English data providing an empirical explication of the structure of the language *The Linguistic Structure of Modern English* Laurel J. Brinton, Donna Brinton, 2010 This text is for advanced undergraduate and graduate students interested in contemporary English especially those whose primary area of interest is English as a second language primary or secondary school education English stylistics theoretical and applied linguistics or speech pathology The emphasis is on empirical facts of English rather than any particular theory of linguistics the text does not assume any background in language or linguistics In this newly revised edition numerous example sentences are taken from the Corpus of Contemporary American English A full glossary of key terms an additional chapter on pedagogy and new sections on cognitive semantics and politeness have been added Other changes include completely updated print references web links to sites of special interest and relevance and a revised reader friendly layout A companion website that includes a complete workbook with self testing exercises and a comprehensive list of web links accompanies the book The website can be found at the following address <http://dx.doi.org/10.1075/z156.workbook> Students completing the text and workbook will acquire a knowledge of the sound system of contemporary English an understanding of the formation of English words a comprehension of the structure of both simple and complex sentence in English a recognition of complexities in the expression of meaning an understanding of the context and function of use upon the structure of the language and an

appreciation of the importance of linguistic knowledge to the teaching of English to first and second language learners Laurel J Brinton is Professor of English Language at the University of British Columbia Donna M Brinton is Senior Lecturer in TESOL at the University of Southern California s Rossier School of Education The Linguistic Structure of Modern English is a revised edition of The Structure of Modern English by Laurel J Brinton 2000 **Syntax** Keith Brown,Jim Miller,2020-10-14 The second edition of this invaluable introductory text takes account of developments in syntactic studies Dealing with the whole range of syntax this book explains in a lucid and approachable way why linguists have adopted certain solutions to problems and not others This book introduces the basic concepts used in the description of syntax independently of any single model of grammar Profusely illustrated with diagrams there are sets of exercises for every chapter which can be used in class or by students working independently *Handbook of Teaching and Learning Persian as a Second Language* Hooman Saeli,2025-09-26 This collection explores relevant pedagogical and sociolinguistic topics in the teaching and learning of Persian as a foreign and second language Owing to the dearth of research in many areas pertaining to the teaching and learning of Persian this handbook provides empirically supported insights into various aspects of these areas While the literature on teaching and learning Persian is growing the field lacks a cohesive collection on Persian as a foreign second language The book addresses issues pertaining to the standardization and validation of teaching and assessment methods which remain under explored in the contexts of teaching and learning Persian It also covers the teaching of Persian pragmatics the use of corpora as well as a range of different areas within linguistics including phonetics prosody and historical linguistics This comprehensive collection contributes substantially to the scientific study of many aspects of teaching and learning Persian which have been neglected for decades A must have text in Persian language pedagogy and Persian sociolinguistics it an essential book for those in teaching and learning in Persian language programs worldwide

Approaches to the Typology of Word Classes Petra Maria Vogel,Bernard Comrie,2000 The series is a platform for contributions of all kinds to this rapidly developing field General problems are studied from the perspective of individual languages language families language groups or language samples Conclusions are the result of a deepened study of empirical data Special emphasis is given to little known languages whose analysis may shed new light on long standing problems in general linguistics **The Oxford Handbook of Word Classes** Eva van Lier,2023 This handbook explores multiple facets of the study of word classes also known as parts of speech or lexical categories The contributions showcase the importance of word classes for the whole discipline of linguistics while also highlighting the many ongoing debates in the areas and outlining fruitful avenues for future research Manual of Romance Word Classes Anna-Maria De Cesare,Giampaolo Salvi,2024-09-02 Word classes are linguistic categories serving as basis in the description of the vocabulary and grammar of natural languages While important publications are regularly devoted to their definition identification and classification in the field of Romance linguistics we lack a comprehensive state of the art overview of the

current research This Manual offers an updated and detailed discussion of all relevant aspects related to word classes in the Romance languages In the first part word classes are discussed from both a theoretical and historical point of view The second part of the volume takes as its point of departure single word classes described transversally in all the main Romance languages while the third observes the relevant word classes from the point of view of specific Romance based varieties The fourth part explores Romance word classes at the interface of grammar and other fields of research The Manual is intended as a reference work for all scholars and students interested in the description of both the standard major Romance languages and the smaller lesser described Romance based varieties

Exploring Grammatical Metaphor Zhong Yang, 2025-06-30 This book explores the fascinating world of grammatical metaphor through the lens of systemic functional linguistics It provides a valuable toolkit for understanding how grammatical metaphor can expand the potential for meaning and serve as a key resource for bridging linguistic and cultural gaps in different contexts Grammatical metaphor is presented not merely as a linguistic feature but as a powerful tool that transforms meaning across grammatical categories This book examines how this phenomenon of transcategorisation works showing how it shifts and enriches the representation of meaning Using the framework of systemic functional linguistics the book emphasises the dynamic relationship between language systems and the texts they produce Combining theory and practice it investigates the wide ranging applications of grammatical metaphor in fields such as contrastive linguistics discourse analysis and translation studies Readers will discover how grammatical metaphor increases the flexibility and depth of language enabling speakers and writers to achieve more nuanced and effective communication This book will be essential reading for linguists language learners translators and intercultural communicators Whether you re a researcher or a practitioner this book will inspire new ways of thinking about language and communication

Proceedings of the 2nd International Student Conference on Linguistics (ISCL 2022) Mirsa Umiyati, I Nyoman Kardana, Aron Meko Mbete, I Gusti Made Sutjaja, Dewa Komang Tantra, Nyoman Sujaya, Ni Wayan Kasni, I Wayan Budiarta, Rika Purnama Sari, 2023-03-02 This is an open access book Linguistics as a field of study discussing languages plays a fundamental role in the life of humans It affects the human way of thinking in various aspects In turn there is a pervasive influence of language on our daily lives The impact is that the work of linguists is no longer only managing language in one discipline but relating and interconnecting the linguistics with other fields at a further level Linguistic studies have now been carried out in various fields including psychology anthropology neuroscience law philosophy computer science communications and education Linguistics enthusiasts find practical solutions for their linguistic training in the computer law and forensic industries teaching foreign languages and English as a second language translation and interpretation speech pathology lexicography and policymaking in government and education Nowadays these jobs are however no longer operational but encounter many challenges especially in the global era The digital revolution has created new avenues for language use and new communication modalities The existence of technology mediates our linguistic and

social interactions The pervasive influence of technology on human development has the potential to influence language acquisition and change social behavior In this global era many challenges in human life arise Our brave new digital world has caused some discord for language activists and if harsh text speakers do not feel good woe ensues our new diet of round shaped emojis Our language and our relationship to language have developed to keep pace with cultural changes Furthermore since the spread of the COVID 19 pandemic society has been carrying out communication online through the internet and social To society has been accustomed to doing it that way One of the challenges linguistics studies are facing is the implementation of appropriate language capacity There are conditions for the use of inaccurate languages according to standardized rules in communication through online media To solve this reciprocal interactions are also important for creating a pool of different perspectives among the smart human community In total digital technologies are also changing the ways we learn and teach as well as the ways we compose and research These changes are occurring throughout the academy including the humanities a set of disciplines less associated with technology In an effort to vanquish the challenges trending in the linguistic study in order to depict the future perspectives on it established in the description above fresh ideas from the younger generations are needed For that purpose the Graduate School of Linguistics the Postgraduate Program University of Warmadewa in collaboration with other institutes presents an international academic discussion forum in the form of a conference This event is themed The 2nd Student Conference on Linguistics Trends and Future Perspectives in Language study and Language Teaching Through the forum students from various parts of the world are expected to share bright and innovative ideas to discover solutions to the problems and challenges faced by linguistics today and in the coming future

The Whorf Theory Complex Penny Lee, 1996-01-01 At last a comprehensive account of the ideas of Benjamin Lee Whorf which not only explains the nature and logic of the linguistic relativity principle but also situates it within a larger theory complex delineated in fascinating detail Whorf's almost unknown unpublished writings as well as his published papers are drawn on to show how twelve elements of theory interweave in a sophisticated account of relations between language mind and experience The role of language in cognition is revealed as a central concern some of his insights having interesting affinity with modern connectionism Whorf's gestaltic isolates of experience and meaning crucial to understanding his reasoning about linguistic relativity are explained A little known report written for the Yale anthropology department is used extensively and published for the first time as an appendix With the Whorf centenary in 1997 this book provides a timely challenge to those who take pleasure in debunking his ideas without bothering to explore their subtlety or even reading them in their original form

A Paradigm Lost Joanna Radwańska-Williams, 1994-01-01 The general theory of language of Mikołaj Kruszewski 1851-1887 is this book argues a lost paradigm in the history of linguistics The concept of paradigm is understood in a broadly construed Kuhnian sense and its applicability to linguistics as a science is examined It is argued that Kruszewski's theory was a covert paradigm in that his major work *Oчерк nauki o jazyke* An Outline of the Science of

Language 1883 had the potential to be seminal in the history of linguistics i.e. to achieve the status of a classical text or exemplar. This potential was not realized because Kruszewski's influence was hindered by various historical factors including his early death and the simultaneous consolidation of the Neogrammarian paradigm with its emphasis on phonology and language change. The book examines the intellectual background of Kruszewski's thought which was rooted in part in the tradition of British empiricism. It also discusses Kruszewski's relationship to his teacher Jean Baudouin de Courtenay (1845-1929), his attitude towards the Neogrammarian movement in linguistics, the ambivalent reception of his theory by his contemporaries and the influence of his work on the linguistic theory of Roman Jakobson (1896-1982). **Arabic Language**

Processing: From Theory to Practice Kamel Smaïli, 2019-10-04. This book constitutes revised selected papers from the 7th International Conference on Arabic Language Processing (ICALP 2019) held in Nancy, France, in October 2019. The 21 full papers presented in this volume were carefully reviewed and selected from 38 submissions. They were organized in topical sections named: Arabic dialects and sentiment analysis; neural techniques for text and speech modeling; modern standard Arabic resources analysis; disambiguation and evaluation. **Corpora in Language Acquisition Research** Heike

Behrens, 2008-04-09. Corpus research forms the backbone of research on children's language development. Leading researchers in the field present a survey on the history of data collection, different types of data and the treatment of methodological problems. Morphologically and syntactically parsed corpora allow for the concise explorations of formal phenomena, the quick retrieval of errors and reliability checks. New probabilistic and connectionist computations investigate how children integrate the multiple sources of information available in the input and new statistical methods compute rates of acquisition as well as error rates dependent on sample size. Sample analyses show how multi-modal corpora are used to investigate the interaction of discourse and linguistic structure, how cross-linguistic generalizations for acquisition can be formulated and tested and how individual variation can be explored. Finally, ways in which corpus research interacts with computational linguistics and experimental research are presented. *Verbal Projections* Hero Janßen, 2011-04-20. This

collection of articles examines lexical and grammatical aspects of verbal elements and phrases in the context of recent generative research. General questions concern definitions of grammatical categories, classifications of auxiliaries and particles as functional categories and problems of economy. Lexical matters range from affixation and category change, participles, gerunds to semantic representations of specific verb classes, possessive, phrasal and intransitive verbs. The syntactic analyses focus on positional arrangements of aspectual and verbal units, V2, Verb Raising. The data are mainly drawn from English; perspectives on other Germanic languages are included. **Languages Bases--discourse Bases** Gilberte Piérault-Le Bonniec, Marlene Dolitsky, 1991-01-01. When child language began to be studied in the sixties, what interested researchers most was what could be considered language per se. Holophrases were excluded as seemingly having no syntax and research work was carried out as if of the two-word stage. Language development was studied up to around age seven, the

age at which natural acquisition processes were considered to be contaminated by formal schooling in language. In opposition to such an attitude, this volume has ignored this heavily studied area of language development, preferring to present research being carried out at the two ends of the development process that had been rejected: that of prelinguistic speech skills at the one end and the development of discourse at the other. This book thus begins with the physical properties in human development necessary for language to occur. It also offers studies on a child's initial equipment, i.e. intra-uterine skills and skills acquired before first words. At the other end are studies on the development of discourse, i.e. the child's acquisition of the ability not only to juxtapose ideas but to link them into cohesive coherent texts and to use argumentation skills that are not fully acquired until the child is well into adolescence and nearing adulthood.

A Grammar of Contemporary Igbo
Emenanjo, E. Nolue, 2016-02-22. In twenty-five chapters, this book covers phonology, morphology, syntax, and semantics. The chapters are organized in four discrete parts: phonology, morphology, syntax, and semantics. They are uneven in terms of scope covered, length, the density of their contents, and their degrees of difficulty. Each chapter ends with some references relevant to both the topics treated in the chapter in Igbo linguistics and in general linguistics.

Studies in the Lexical Field of Expectation
Louise M. Sylvester, 2022-07-11. *Studies in the Lexical Field of Expectation* presents a classification by conceptual field of the vocabulary expressing the ideas in the semantic field of Expectation. The field divides into eleven categories, including Surprise, Disappointment, Hope, Fear, Caution, Courage, and Rashness. The categories, subcategories of the field, and the lexical items are ordered hierarchically, and each sense is followed by its dates of usage. The book discusses the method and methodology of constructing the classification, examining the delimitation of the field, the choice of headwords, the process of classifying the materials, and the use and presentation of grammatical information within a semantic classification. The proportions of loan words and native terms within each conceptual group are investigated, and it examines the patterns of accessions and obsolescences across the centuries from Old English to the present day.
