criminal evaluations the MMPI A is often used in evaluating adolescents in detention and correctional facilities while the Child Behavior Checklist CBCL Achenbach 1991 Personality Inventory for Children Second Edition PIC 2 Lachar Gruber 2001 and Parenting Stress Index PSI Abidin 1995 are more commonly used in evaluating families involved in child protection and custody cases Instruments such as the MMPI 2 the Rorschach and the Halstead Reitan Neuropsychological Battery are widely used across many types of forensic evaluations although the latter category of testing is particularly related to personal injury evaluations The end result is a unique and indispensable reference a comprehensive overview within a single text of prominent clinical assessment instruments widely used for forensic purposes and designed to facilitate the optimal use of clinical assessment instruments among psychologists who have undertaken the training necessary to understand and apply psychological principles and test findings to salient legal standards or issues

Eugene Walker,2013-11-21 The purpose of this book is to provide the reader with a survey of some of the major areas of clinical psychology No attempt has been made to include every area relevant to clinical psychology the choices are selective but represent the wide range of areas touched by clinical psychologists For some years I have felt the need for a book that provides students with more of a historical introduction and context from which to view current clinical psychology than is included in most textbooks The issues and problems of clinical psychology have been with us since the beginning of time however most psychological literature is written with the bias that anything older than five or ten years is not relevant Those who attempt to take a long range view of clinical psychology are sometimes able to recall the early development of the field in the 1930s and 1940s In this text I asked the authors to begin

with a brief survey of ancient and medieval history to set the stage for a discussion of current research and developments in the field I hope that a presentation of this sort will provide the reader whether advanced undergraduate graduate or professional with a sense of perspective and context from which to view and understand clinical psychology
