Educators and Student Learning Through Action Research Slapac, Alina, Balcerzak, Phyllis, O'Brien, Kathryn, 2021-05-07 The year 2020 brought an unprecedented worldwide health crisis through the COVID 19 pandemic that has been affecting all sectors including education. There were questions surrounding the effectiveness of online trainings for teachers, online teaching practices, the motivation and engagement of students, and the quality of learning and education in these times. Action research emerged to address these concerns, being a systematic process of inquiry using reflection within a cyclical model of planning, acting, implementing, evaluating, and continuous reflection. This method of research is employed with the expertise and passion from educators to better enhance online practices and education while using authentic learning and experiences. Using collaboration, social advocacy, and action research, there is the opportunity to advance teaching for students, families, and communities without a physical context involved. The Handbook of Research on the Global Empowerment of Educators and Student Learning Through Action Research explores successful teaching and learning skills through the method of action research and intersects it with online learning in order to uncover best teaching practices in online platforms. This book showcases educational professionals' action research for solutions in advancing teaching and learning, the practical benefits of action research, recommendations for improving online teaching and learning, and a focus on professional growth as well as social justice advocacy. It highlights important topics including student learning, teacher collaboration, authentic learning, advocacy, and action research in both K-12 and higher education settings. This book is ideal for inservice and preservice teachers, administrators, teacher educators, practitioners, researchers, academicians, and students interested in how action research is improving and advancing knowledge on the best teaching practices for online education. Best Practice in Motivation and Management in the Classroom Dennis G. Wiseman, Gilbert Hunt, 2008 This text offers practical information and vicarious practice for both beginning as well as veteran teachers to become more knowledgeable, skilled, and effective in their work. Through study, application of what has been studied, and the analysis and evaluation of the end result of this application, teachers who care to improve can improve. And teachers who are already successful in their teaching can be even more successful. Effective teachers are active learners themselves. This text therefore provides a specific context and focus for this active learning in the areas of student motivation and classroom management, which are considered critical for best practice in teaching in classrooms today. The book reviews appropriate strategies when responding to specific types of student misbehavior and also discusses zero tolerance policies, expulsion, teaching special students, addressing diversity, violence, school uniforms, and drug abuse as related to management and motivation. It is highlighted with supporting case study examples, question and activity sections by chapter, and a helpful glossary. Also provided is an overview of ten popular models for classroom management with the theorists associated with their development. By reading this book, teachers will get their students to achieve at high levels in demonstrating what they have learned through the application of the most important intertwined areas of motivation and classroom management. **The Educator's Field Guide** Edward S.
