Artificial Insemination By Donor:

The Artificial Family Robert Snowden, Geoffrey Duncan Mitchell, 1981 *Donor Insemination* Kenneth Raymond Daniels, Erica Haimes, 1998-05-14 Donor insemination or DI is the oldest and most widely practised form of assisted conception but until relatively recently it had been assessed largely from a medical perspective This 1998 book brings together an international group of social scientists to discuss the social cultural political and practical dimensions to DI relating it to the wider debates about fertility treatment and the place of assisted conception in contemporary society The contributors consider the experience of DI from the viewpoint of all the various parties involved including the recipients of the treatment the sperm providers the clinicians the people conceived and policy makers working in the area The assumptions informing the practices around DI and the reactions to it are critically examined with reference to developments worldwide cross national issues the language of DI gender sexuality ethnicity and identity **Genetics and the Law III**

Aubrey Milunsky, 2013-11-11 It was the best of times it was the worst of times it was the age of wisdom it was the age of foolishness it was the epoch of belief it was the epoch of incredulity it was the spring of hope it was the winter of despair Charles Dickens *A Tale of Two Cities* Dickens of course did not have the contemporary dilemmas of modern genetics in mind Indeed we need to remind ourselves how short the history of modern genetics really is Recognition that genetic traits are carried by deoxyribonucleic acid DNA occurred only about 40 years ago Knowledge of the three dimensional structure of DNA is only about 30 years old The correct number of human chromosomes was not determined until the mid 1950s and Down syndrome was recognized only in 1959 It was not until in 1968 that the exact location of a gene was determined on an autosomal chromosome and the study of genes rather than their protein products has been possible for barely a decade

Infertility J. Aiman, 2012-12-06 The authors of this book have a goal to describe the management of infertility from the perspective of physiology and anatomy gone awry To accomplish this goal the chapters devoted to the causes of infertility begin with a description of the normal structure and function of the organ or system causing the infertility We believe that understanding the normal will result in rational and effective diagnosis and treatment of infertility Our intent is that this book be a useful resource for those who care for infertile couples For an infertile couple success is the delivery of a normal and healthy infant Chapters that describe the causes and treatment of habitual abortion and the reproductive performance of previously infertile couples emphasize the hazards that exist between conception and birth Our environment is one of these hazards one that may also affect reproduction before conception A chapter is devoted to a description of environmental agents that affect reproduction the mechanisms of their effect and methods to predict those present and future environmental agents which might also affect reproduction **Office Andrology** Phillip E. Patton, David E.

Taylor, Lubna Pal, Emre Seli, 2025-09-16 For more than 50 years Speroff s Clinical Gynecologic Endocrinology and Infertility has been one of the world s most widely read and respected gynecology texts with its authoritative coverage of physiology clinical endocrinology contraception and infertility The fully revised 10th Edition edited by Drs Hugh Taylor Lubna Pal and Emre Seli continues the tradition of excellence offering a complete explanation of the female endocrine system and practical guidance for evaluation and treatment of common disorders This classic text remains indispensable for students residents and clinicians working in reproductive endocrinology and infertility bringing readers up to date with recent advances that have occurred in this fast changing field Infertility Melvin L. Taymor, 2012-12-06 A little over 12 years ago I wrote a small volume entitled Infertility It seemed to me at that time that significant advances in the field called for the publication of such a volume The following is from the preface to that volume During the past 15 years considerable progress has been made in the field of infertility diagnosis and management It is perhaps a paradox that much of this increased knowledge has come about because of Western medicine s preoccupation with the search for a means to control reproduction As a result we have achieved new insights into the physiologic mechanisms involved in reproduction and we have found better methods for measuring physiologic changes in reproductive health and disease To these advances can be added improvements in the utilization of endoscopic and surgical techniques in the diagnosis and treatment of infections and endometriosis and in the treatment of hormonal disorders During this period too through workshops and conferences and in journals and texts these latest advances have been made available to physicians an outstanding example being the two volumes of Progress in Infertility edited by Drs Jan Behrman and Robert Kistner As necessary as these publications are they do not offer an overall view of infertility diagnosis and management

The Male Factor in Human Infertility Diagnosis and Treatment W. Thompson,R.F. Harrison,J. Bonnar,2012-12-06 This book is a compilation of edited papers which

were presented at the XIth World Congress of Fertility and Sterility held in June 1983 in Dublin Ireland Although it has long been known that male factors are responsible in at least 30% of infertile couples only recently have concerted efforts been made on the part of urologists gynaecologists and basic scientists to identify these factors more precisely The nature of spermatogenesis is complex but application of various scientific methods have at last opened up new and promising approaches to our understanding of this subject Clinical results however have been depressing the majority of treatments lack realistic evaluation and are initiated in hope rather than with a sound scientific basis We anticipate that this volume will in some small way correct these deficiencies The papers have been grouped into related topics The first section deals with the evaluation of the spermatozoa and includes a critical assessment of the recently introduced zona free hamster egg test of sperm function Further sections include the biochemistry of gonadal function and the immunology of male reproduction most papers are concerned with studies in the human The clinical sections cover medical and surgical approaches to treatment and the final section deals with various aspects of AID practice
