Artificial Intelligence And The Sociology Of Knowledge Prolegomena To An Integrated Philosophy Of Science:

Artificial Intelligence and the Sociology of Knowledge András Kertész, 1993 A central topic of the latest research in the philosophy of science is the question of what kind of relationship there is between the cognitive and social factors which underlie scientific knowledge At present this problem has manifested itself in a heated and still unfinished controversy between the proponents of artificial intelligence research and the sociologists of knowledge By resolving the antagonism of these two positions the book aims at developing a modular approach to an integrated philosophy of science which can handle the interaction between cognitive and social factors in a way which differs considerably from all current proposals

Cognitive Semantics and Scientific Knowledge András Kertész, 2004-01-01 The book focuses on the question of how and to what extent cognitive semantic approaches can contribute to the new field of the cognitive science of science The argumentation is based on a series of instructive case studies which are intended to test the prospects and limits of the metascientific application of both holistic and modular cognitive semantics The case studies show that while cognitive semantic research is able to solve problems which have traditionally been the domain of the philosophy of science it also encounters serious limits The prospects and the limits thus revealed suggest new research topics which in future can be tackled by cognitive semantic approaches to the cognitive science of science
