Artificial Horizon Reading A Colonised Landscape:

Biosocial Worlds Jens Seeberg, Andreas Roepstorff, Lotte Meinert, 2020-09-29 Biosocial Worlds presents state of the art contributions to anthropological reflections on the porous boundaries between human and non human life biosocial worlds Based on changing understandings of biology and the social it explores what it means to be human in these worlds Growing separation of scientific disciplines for more than a century has maintained a separation of the natural and the social that has created a space for projections between the two Such projections carry a directional causality and so constitute powerful means to establish discursive authority While arguing against the separation of the biological and the social in the study of human and non human life it remains important to unfold the consequences of their discursive separation Based on examples from Botswana Denmark Mexico the Netherlands Uganda the UK and USA the volume explores what has been created in the space between the social and the natural with a view to rethink the biosocial Health topics in the book include diabetes trauma cancer HIV tuberculosis prevention of neonatal disease and wider issues of epigenetics Many of the chapters engage with constructions of health and disease in a wide range of environments and engage with analysis of the concept of environment Anthropological reflection and ethnographic case studies explore how health and environment are entangled in ways that move their relation beyond interdependence to one of inseparability The subtitle of this volume captures these insights through the concept of health environment seeking to move the engagement of anthropology and biology beyond deterministic projections Horizon Work Adriana Petryna, 2024-08-20 This book argues that a world characterized by runaway climate change needs radically new models of scientific and practical expertise to effectively address the emergency

Modes of Uncertainty Limor Samimian-Darash, Paul Rabinow, 2015-07-15 Modes of Uncertainty offers groundbreaking ways of thinking about danger risk and uncertainty from an analytical and anthropological perspective Our world the contributors show is increasingly populated by forms practices and events whose uncertainty cannot be reduced to risk and thus it is vital to distinguish between the two Drawing the lines between them they argue that the study of uncertainty should not focus solely on the appearance of new risks and dangers which no doubt abound but also on how uncertainty itself should be defined and what the implications might be for policy and government Organizing contributions from various anthropological subfields including economics business security humanitarianism health and environment Limor Samimian-Darash and Paul Rabinow offer new tools with which to consider uncertainty its management and the differing modes of subjectivity appropriate to it Taking up policies and experiences as objects of research and analysis the essays here seek a rigorous inquiry into a sound conceptualization of uncertainty in order to better confront contemporary problems Ultimately they open the way for a participatory anthropology that asks crucial questions about our contemporary state *Artificial Horizon* Thomas, Martin, 2014-05-20 Martin Thomas takes the reader on a journey through a compelling study of culture landscape and mythology For both Aboriginal people and their colonisers the rugged landscape of the Blue Mountains has

stood as an intriguing riddle and a stimulus to the imagination The author evokes this dramatic and bewildering landscape and leads his readers through the cultural history of the locality in order to probe the dreamwork of imperialism

Arc of Interference João Biehl, Vincanne Adams, 2023-02-27 The radically humanistic essays in *Arc of Interference* refigure our sense of the real the ethical and the political in the face of mounting social and planetary upheavals Creatively assembled around Arthur Kleinman's medical anthropological arc and eschewing hegemonic modes of intervention the essays advance the notion of a care ful ethnographic praxis of interference To interfere is to dislodge ideals of naturalness blast enduring binaries human nonhuman self other us them and redirect technocratic agendas while summoning relational knowledge and the will to create community The book's multiple ethnographic arcs of interference provide a vital conceptual toolkit for today's world and a badly needed moral perch from which to peer toward just horizons Contributors Vincanne Adams João Biehl David Carrasco Lawrence Cohen Jean Comaroff Robert Desjarlais Paul Farmer Marcia Inhorn Janis H Jenkins David S Jones Salmaan Keshavjee Arthur Kleinman Margaret Lock Adriana Petryna

Unfinished João Biehl, Peter Locke, 2017-11-16 This original field changing collection explores the plasticity and unfinishedness of human subjects and lifeworlds advancing the conceptual terrain of an anthropology of becoming People's becomings trouble and exceed ways of knowing and acting producing new possibilities for research methodology and writing The contributors creatively bridge ethnography and critical theory in a range of worlds on the edge from war and its aftermath economic transformation racial inequality and gun violence to religiosity therapeutic markets animal rights activism and abrupt environmental change Defying totalizing analytical schemes these visionary essays articulate a human science of the uncertain and unknown and restore a sense of movement and possibility to ethics and political practice *Unfinished* invites readers to consider the array of affects ideas forces and objects that shape contemporary modes of existence and future horizons opening new channels for critical thought and creative expression Contributors Lucas Bessire João Biehl Naisargi N Dave Elizabeth A Davis Michael M J Fischer Angela Garcia Peter Locke Adriana Petryna Bridget Purcell Laurence Ralph Lilia M Schwarcz
