computational mathematics engineering and industrial applications Expert System Applications Leonard Bolc, Michael J. Coombs, 2012-12-06 While expert systems technology originated in the United States its development has become an international concern Since the start of the DENDRAL project at Stanford University over 15 years ago with its objective of problem solving via the automation of actual human expert knowledge significant expert systems projects have been completed in countries ranging from Japan to France Spain to China This book presents a sample of five such projects along with four substantial reports of mature studies from North American researchers Two important issues of expert system design permeate the papers in this volume The first concerns the incorporation of substantial numeric knowledge into a system This has become a significant focus of work as researchers have sought to apply expert systems technology to complex real world domains already subject to statistical or algebraic description and handled well at some level in numeric terms A second prominent issue is that of representing control knowledge in a manner which is both explicit and thus available for inspection and compatible with the semantics of the problem domain *Directory of Federal Laboratory and Technology Resources*, 1994 Describes the individual capabilities of each of 1 900 unique resources in the federal laboratory system and provides the name and phone number of each contact Includes government laboratories research centers testing facilities and special technology information centers Also includes a list of all federal laboratory technology transfer offices Organized into 72 subject areas Detailed indices **Expert Systems in Construction and Structural Engineering** H. the concepts by the scientific and technical community Next the University of Las Palmas de Gran Canaria joined the University of Linz to organize the first international meeting on CAST Las Palmas February 1989 under the name EUROCAST 89 This was a very successful gathering of systems theorists computer scientists and engineers from most European countries North America and Japan It was agreed that EUROCAST international conferences would be organized every two years alternating between Las Palmas de Gran Canaria and a continental European location Thus successive EUROCAST meetings have taken place in Krems 1991 Las Palmas 1993 Innsbruck 1995 Las Palmas 1997 and Vienna 1999 in addition to an extra European CAST Conference in Ottawa in 1994 *Directory of Federal Laboratory & Technology Resources*, 1993
