The Artillery of the Dukes of Burgundy, 1363-1477 Robert Douglas Smith, Kelly DeVries, 2005 A major new exploration of the history and development of gunpowder weapons in the 15th century based on the artillery of the Dukes of Burgundy The four Valois Dukes of Burgundy created in little more than a century a fabulously wealthy and independent state Their centralised control and chancellery have bequeathed to us a vast treasure trove of documents including accounts and inventories of the Masters of the artillery under the later Dukes Although many of these were extracted and transcribed in the late nineteenth century modern historians have largely ignored their unprecedented insights into fifteenth century guns and their use When Charles the Bold the last Valois Duke took on the combined Swiss confederate forces in 1476 he lost not just the battles and his personal fortune but much of his artillery train as well Of the dozens of cannons captured at least 25 pieces survive in Swiss museums The documents that survive from the Valois state give us almost for the first time in medieval Europe the ability to see the course of history in a period when Europe was undergoing some of the most profound changes before the 20th century The Artillery of the Dukes of Burgundy is the first attempt to combine all these sources bringing new and fresh insights into the development and use of artillery in the fifteenth century Moreover this is the first modern study of medieval cannon one of the most important discoveries of the post classical world KELLY DeVRIES has authored numerous books and articles on medieval warfare ROBERT DOUGLAS SMITH formerly Head of Conservation in the Royal Armouries Tower of London is an acknowledged expert on medieval artillery This study is the first major fruit of their combined researches **The Library Catalogs of the Hoover Institution on War, Revolution, and Peace, Stanford University** Hoover Institution on War, Revolution, and Peace, 1969 **The National Union Catalogs, 1963-1964**

makes it well worth a place on anyone's reference shelf *Clash of Steel* It is said that artillery won the Second World War for the Allies that Soviet guns wore down German forces on the Eastern Front negating their superior tactics and fighting ability and that the accuracy and intensity of the British and American artillery was a major reason for the success of Allied forces in North Africa from El Alamein in Italy and Normandy and played a vital role in the battles of 1944 and 1945 Yet the range of weapons used is often overlooked or taken for granted which is why this highly illustrated history by Simon and Jonathan Forty is of such value They stress the importance of artillery on every front and analyze how artillery equipment training and tactical techniques developed during the conflict The selection of wartime photographs many from east European sources and the extensive quotations from contemporary documents give a graphic impression of how the guns were used on all sides The photographs emphasize the wide range of pieces employed as field antiaircraft and antitank artillery without forgetting self propelled guns coastal and other heavyweights and the development of rockets The authors offer a fascinating insight into the weapons that served in the artillery over seventy years ago Superbly illustrated this is testament to the courage and skills of extraordinary men in the execution of their duty An amazing book *Books Monthly*      **Artillerie im 1.
