John T. OSBORN

Artisans Of Time:

Genetic Enslavement Bruce L. Gary, 2011-06 Every living thing is assembled by its genes This is a crucial starting point for exploring a fundamental human dilemma As stated so starkly by Richard Dawkins a human is a lumbering machine created for the task of safeguarding and propagating the all important genes within I would add that since the machine's behavior is driven by brain circuits pre wired by those genes sometimes we are prone to doing things which work against our individual best interest in order to advance the cause of the genes In other words some of our genes are our enemies outlaw genes because they jeopardize individual well being as they work to assure themselves genetic immortality Every thinking person must face the following dilemma How can I achieve liberation from genetic pitfalls when my values and thinking are so profoundly influenced by the very same genes that have created those pitfalls The more one tries to answer this question the harder it is to imagine that an answer is possible Nevertheless this is a challenge that can become irresistibly fascinating This book is an attempt to bravely explore one of Humanity's most profound existential dilemmas The fate of a civilization is also affected by the outlaw genes especially those responsible for a feeling of discontent with civilization and a vague preference for a simpler society which I would describe as resembling those found in the human ancestral environment This book explores how a flawed human nature undermines every civilization starting a decline and eventual fall Those of us born during the 20th Century are lucky for having seen the best of times for our civilization and as a questionable bonus we may now witness from close up the forces that have condemned every past civilization to ruin Dumbarton, its recent men and events Donald Macleod, 1898

Littrell, Marsha A. Dickson, 2012-03

Addresses the cultural conditions under which artisan work provides a feasible income alternative to other employment options Offers a methodology for assessing the socio economic impacts of fair trade artisan work After agriculture and tourism artisan work provides the next most significant source of income in many developing countries Yet because of its image as a soft or frivolous industry some politicians and development professionals question whether the handcraft sector is worthy of investment An opposing view holds that the creation of sustainable employment opportunities for poor people and a positive alternative to mass production outweighs the costs Until now the debate has been hampered by a lack of industry data The apparel group MarketPlace Handwork of India serves as the perfect case study to provide this missing information Like many fair trade companies it has dual goals to generate income in the global marketplace and foster the empowerment of the low income workers who run and staff the business In conducting interviews with MarketPlace s artisans managers and founders Littrell and Dickson produced an in depth socio economic audit of the group over time The result Artisans and Fair Trade provides a quantitatively and qualitatively illuminating study of fair trade impacts and a methodology that is sure to inform current assessment practices in social entrepreneurship and business social responsibility **The Artisan**

Teaching Model for Instructional Leadership Kenneth Baum, David Krulwich, 2016-08-24 The Artisan Teaching Model merges the idea of teamwork with the concept of an artisan apprentice relationship As in any apprenticeship newer members of the profession work alongside experts artisans As apprentices become more skilled they take on larger and more substantial roles and continue to work alongside and together with artisans Over time the apprentices become artisans themselves and in turn share the art and craft of teaching with newer teachers Although rubrics and checklists may cue good teaching practices they do not make great teachers or effective leaders Teaching is a craft and great teachers must be treated as the artisans they are It s the intensive collaboration among teachers that helps them develop the broad range of skills they need to become true artisans who know how to help every student achieve Baum and Krulwich work from this underlying premise and argue that all schools must develop conditions that allow true artisanship to flourish Baum and Krulwich s Artisan Teaching is a great example of the power of collaboration in schools and should be widely emulated by those interested in building capacity and improving schools Great ideas for creating a school community based in deep learning that benefits all schools Michael Fullan Professor Emeritus University of Toronto Artisan Teaching puts the emphasis right where it belongs on the home grown teacher led creation and improvement of course curriculum and instruction Baum and Krulwich s book based on the excellent results achieved at their school in the Bronx confirms the unrivaled power of focusing on the right things all the time Mike Schmoker Author of Leading with Focus Baum and Krulwich s system is a powerful and innovative new approach to leadership development within schools The Artisan Teaching Model is both bold and creative and can be implemented successfully in any school in the country It is a must read for anyone interested in school improvement Joel Klein Former Chancellor NYC Department of Education Industrial Employment
