## **Arts At A New Frontier The National Endowment For The Arts:**

*The Arts at a New Frontier* Fannie Taylor, Anthony L. Barresi, 2013-03-09 Profound changes were taking place in American society during the period of the 1960s and 1970s when legislation for the National Foundation for the Arts and the Humanities was enacted and the agencies went into operation. It was a period of soul searching by the American public when the cherished prejudices and civil inequities of the past decades were wiped out and old wounds began to heal at the same time however the Vietnam War was creating new fissures and antagonisms. Into this newly healing newly questioning society congressional action thrust the National Council on the Arts in 1964 and the National Endowment for the Arts in 1965. Their mission was to encourage and support the arts and the men and women charged with this responsibility went about their work with the zeal and enthusiasm of religious converts. The idea of even a minute amount of federal financial assistance to the country's chronically beleaguered and often impoverished artists and arts organizations seemed strange to a segment of the population that had existed in forgetful independence from government intervention. Many of the nation's artists and arts leaders were wary partly because of the uncertainties and constraints of previous patterns of governmental support.

**Postmodernism and Video Art** Liz Kim, 2025-08-22 Liz Kim traces the theories and artistic practices that articulated American experimental video through its key works and events, art critical discourse as well as the politics of its funding and distribution during the 1970s into the 1980s focusing on New York. This is a historical examination of the relationship between experimental video and postmodernism in the context of the early New York video scene as a foundational crucible of ideas and practices. Video grew out of both the acculturation of television as well as the resistance against its hegemonic forms as it enabled hybrid user generated content. As such video became a testing ground for postmodern thought as it sat at the perfect nexus of mass media art and the politics of representation. This book historicizes the theories of video art through the shifts in representations of cultural identities and the changes within its critical and structural supports. Through this process chapters uncover new roots of postmodernism through historical evidence widening the scope of the term and its concepts. The book will be of interest to scholars working in art history, film studies and media studies.

**Elite Art Worlds** Eduardo Herrera, 2020 The Centro Latinoamericano de Altos Estudios Musicales (CLAEM) in Buenos Aires operated for less than a decade but by the time of its closure in 1971 it had become the undeniable epicenter of Latin American avant-garde music. Providing the first in-depth study of CLAEM, author Eduardo Herrera tells the story of the fellowship program funded by the Rockefeller Foundation and the Di Tella family that by allowing the region's promising young composers to study with a roster of acclaimed faculty produced some of the most prominent figures within the art world including Rafael Aponte Ledesma, Corina Aharoni and Blas Emilio Aterhorta. Combining oral histories, ethnographic research and archival sources, *Elite Art Worlds* explores regional discourses of musical Latin Americanism and the embrace, articulation and resignification of avant-garde techniques and perspectives during the 1960s. But the story of CLAEM reveals much more intricate webs of US and

Argentine philanthropy transnational currents of artistic experimentation and innovation and the role of art in constructing elite identities By looking at CLAEM as both an artistic and philanthropic project Herrera illuminates the relationships between foreign policy corporate interests and funding for the arts in Latin America and the United States against the backdrop of the Cold War     Angels in the American Theater Robert A Schanke,2007-03-07 Angels in the American Theater Patrons Patronage and Philanthropy examines the significant roles that theater patrons have played in shaping and developing theater in the United States Because box office income rarely covers the cost of production other sources are vital Angels financial investors and backers have a tremendous impact on what happens on stage often determining with the power and influence of their money what is conceived produced and performed But in spite of their influence very little has been written about these philanthropists Composed of sixteen essays and fifteen illustrations Angels in the American Theater explores not only how donors became angels but also their backgrounds motivations policies limitations support and successes and failures Subjects range from millionaires Otto Kahn and the Lewisohn sisters to foundation giants Ford Rockefeller Disney and Clear Channel The first book to focus on theater philanthropy Angels in the American Theater employs both a historical and a chronological format and focuses on individual patrons foundations and corporations

argues for the university as a serious patron of the arts With clarity and wit Garber supports rethinking prejudices that oppose art s role in higher education rejects assumptions of inequality between the sciences and humanities and points to similarities between the making of fine art and the making of good science She examines issues of artistic and monetary value and transactions between high and popular culture She even asks how college sports could provide a new way of thinking about arts funding Using vivid anecdotes and telling details Garber calls passionately for an increased attention to the arts not just through government and private support but as a core aspect of higher education Compulsively readable *Patronizing the Arts* challenges all who value the survival of artistic creation both in the present and future *The Arts of Democracy* Casey Nelson Blake,2007 Written by some of the most respected and accomplished scholars working in their fields this volume illuminates the often contradictory impulses that have shaped the historical intersection of the arts public culture and the state in modern America

Chin-ao Wu,2020-05-05 Corporate sponsorship and business involvement in the visual arts have become increasingly common features of our cultural lives From Absolut Vodka s sponsorship of art shows to ABN AMRO Bank s branding of Van Gogh s self portrait to advertise its credit cards we have borne witness to a new sort of patronage in which the marriage of individual talent with multinational marketing is beginning to blur the comfortable old distinctions between public and private Chin tao Wu s book is the first concerted attempt to detail the various ways in which business values and the free market ethos have come to permeate the sphere of the visual arts since the 1980s Charting the various shifts in public policy which first facilitated the entry of major corporations into the cultural sphere it analyses the roles of governments in injecting the principles of the free market into public arts agencies in particular the Arts Council in Great Britain and the National Endowment for the Arts in the USA It goes on to study the corporate take over of art museums highlighting the ways in which cultural capital can be garnered by various social and business elites through commercial involvement in the arts and shows how corporations have succeeded in integrating themselves into the infrastructure of the art world itself by showcasing contemporary art in their own corporate premises Mapping for the first time the increasingly hegemonic position that corporations and corporate elites have come to occupy in the cultural arena this is a provocative contribution to the debate on public culture in Britain and America

**A Perfectionist Theory of Justice** Collis Tahzib,2022-07-28 Many liberal political philosophers hold that the state should not impose or even promote any particular conception of the good life or human flourishing It should not for instance enact laws and policies designed to elevate citizens tastes to refine their sensibilities or to perfect their characters Instead the state should restrict itself to maintaining a fair framework of rights and opportunities within which all citizens can pursue their own beliefs about what constitutes a good life Against this backdrop Collis Tahzib develops a version of perfectionist political philosophy Whereas previous perfectionists have argued that the promotion of flourishing ways of life is permissible or legitimate Tahzib casts perfectionism as a doctrine of justice On this view the implementation of laws and policies designed to promote sound ideals of the good life ideals such as moral intellectual and artistic excellence is not merely a legitimate complement to justice but an essential constituent of justice Over the years perfectionism has faced various objections that it is premised on values and judgements that are controversial within modern pluralistic societies that

it is unduly restrictive of freedom or autonomy that it treats citizens as if they are children unable to run their own lives that it expresses the meddlesome mentality of a village busybody that it mistakenly assumes that there are objective truths about human flourishing and that it risks the abuse of power by incompetent overzealous or corrupt state officials These ideas represent some of the deepest most vibrant and most powerful strains in liberal thought In defending perfectionism against these charges the arguments in *A Perfectionist Theory of Justice* make a novel and important contribution to longstanding debates about the philosophical foundations of liberalism

**Federalizing the Muse** Donna M. Binkiewicz, 2005-12-15 The National Endowment for the Arts is often accused

of embodying a liberal agenda within the American government In *Federalizing the Muse* Donna Binkiewicz assesses the leadership and goals of Presidents Kennedy through Carter as well as Congress and the National Council on the Arts drawing a picture of the major players who created national arts policy Using presidential papers NEA and National Archives materials and numerous interviews with policy makers Binkiewicz refutes persisting beliefs in arts funding as part of a liberal agenda by arguing that the NEA's origins in the Cold War era colored arts policy with a distinctly moderate undertone Binkiewicz's study of visual arts grants reveals that NEA officials promoted a modernist abstract aesthetic specifically because they believed such a style would best showcase American achievement and freedom This initially led them to neglect many contemporary art forms they feared could be perceived as politically problematic such as pop feminist and ethnic arts The agency was not able to balance its funding across a variety of art forms before facing serious budget cutbacks Binkiewicz's analysis brings important historical perspective to the perennial debates about American art policy and sheds light on provocative political and cultural issues in postwar America
