Arts Education And Aesthetic Knowing:

The Arts, Education, and Aesthetic Knowing Bennett Reimer, Ralph Alexander Smith, Kenneth J. Rehage, 1992 Should arts education have a more significant place in our schools An emphatic Yes comes from the editors and other contributors to this provocative volume They build their case by drawing upon recent developments in cognitive theory and in particular upon contemporary thought regarding aesthetic knowing They contend that aesthetic knowing constitutes a special mode of cognition and they see aesthetic learning as vital to intellectual growth and development They argue that the arts should constitute a foundational school subject An opening chapter reviews past practices in education in the arts thus providing a needed historical context within which current thinking about aesthetic learning can be viewed The following chapters elaborate on the idea and value of aesthetic knowing from various perspectives to buttress the case for its importance in education Developmental issues are explored to deepen understanding of the nature of aesthetic growth Studies reveal that children s art products have not changed over the years But how has a cognitive perspective changed the way in which child art is interpreted Can phases in general aesthetic development be identified Or are such phases specific to each art form What pedagogical issues arise in education in the arts How are conceptual learnings important to the development of aesthetic understanding Does the study of fine arts enrich the quality of life and shape human personality in positive ways Given the long history of arts education as a peripheral matter in schools is it now possible to envision a greater recognition of what study of the arts can accomplish by a proper focus on aesthetic knowing These are some of the questions addressed in a volume that provides stimulating reading not only for arts educators but for all who are genuinely concerned about education
