## Ascent Stage:

**An Assessment of the Technology of Automated Rendezvous and Capture in Space** M. E. Polites, 1998 *NASA Technical Memorandum*, 1975 **Apollo** Richard W. Orloff, David M. Harland, 2006-03-15 This book provides an overview of the origins of the Apollo program and descriptions of the ground facilities launch vehicles and spacecraft that were developed in the quest to reach and return from the surface of the moon It will serve as an invaluable single volume sourcebook for space enthusiasts space historians journalists and others The text includes a comprehensive collection of tables listing facts and figures for each mission *After LM* John F. Connolly, 2020 Catalog of human lunar lander concepts *NASA Technical Translation*, 1972 *NASA Historical Data Book: Programs and projects, 1969-1978*, 1988 Moon Viorel Badescu, 2012-03-22 The Earth has limited material and energy resources Further development of the humanity will require going beyond our planet for mining and use of extraterrestrial mineral resources and search of power sources The exploitation of the natural resources of the Moon is a first natural step on this direction Lunar materials may contribute to the betterment of conditions of people on Earth but they also may be used to establish permanent settlements on the Moon This will allow developing new technologies systems and flight operation techniques to continue space exploration In fact a new branch of human civilization could be established permanently on Moon in the next century But meantime an inventory and proper social assessment of Moon's prospective energy and material resources is required This book investigates the possibilities and limitations of various systems supplying manned bases on Moon with energy and other vital resources The book collects together recent proposals and innovative options and solutions It is a useful source of condensed information for specialists involved in current and impending Moon related activities and a good starting point for young researchers Failure Is Not an Option Gene Kranz, 2009-06-23 The author flight director in NASA's Mission Control tells of the challenges in space flight from the very early years to the current time and of his own bold suggestions about what we ought to be doing in space now Jacket **Apollo in Perspective** Jonathan Allday, 1999-01-01 Apollo in Perspective Spaceflight Then and Now takes a retrospective look at the Apollo space program and the technology that was used to land a man on the Moon Using simple illustrations and school level mathematics Jonathan Allday explains the basic physics and technology of spaceflight and conveys the huge technological strides that were made and the dedication of the people working on the program Physics topics covered include the laws of motion rocketry how to maneuver in orbit and more Informal and engaging the book also discusses the designs of the Apollo Command Service and Lunar modules and how these changed as the plans for the manned mission evolved Guidance systems computers and engines all had to be developed for the first time With Apollo as background the book proceeds to look at the space shuttle the technology being developed for its replacement the International Space Station and the possibilities for a manned Mars mission The book concludes with an exploration of the far future including Mars colonies and journeys to other stars *NASA Technical Note*, 1975 Apollo Program

Summary Report, 1975      **Apollo Program Summary Report** Lyndon B. Johnson Space Center, 1975      **The Human Archaeology of Space** P.J. Capelotti, 2014-01-10 A catalog of archaeological artifacts that have been left behind in space as a result of human exploration this work describes the remnants of lost satellites discarded lunar rovers depleted rockets and various abandoned spacecraft The book is divided into three parts covering distinct but interconnected issues of lunar planetary and interstellar archaeology In Parts I and II individual chapters cover each space mission and provide technical notes and in some cases images of the artifacts Part III explores the archaeology of mobile artifacts in the solar system and the wider galaxy looking particularly at the problems encountered in attempting a traditional archaeological field survey of artifacts that may remain in motion indefinitely      Apollo by the Numbers Richard W. Orloff, 2000 This work is a unique collection of valuable statistical information about Project Apollo It includes a chapter about 20 pages each for Apollo 1 through Apollo 17 There are several data tables for each mission plus a 50 page section with additional statistics and tables that merge data for each mission so you can easily make comparisons Tables include launch and ascent data fuel consumption stage impact locations very detailed mission timelines and much more      Memories of the Apollo and Space Shuttle Programs Lawrence Korb, 2017-07-14 I have had the privilege of being an engineer who worked on both the Apollo and Space Shuttle Orbiter Programs for more than 45 years It has been a fascinating and rewarding experience along with its share of pressures and disappointments Come take this exciting journey with me In this book I present the contributions of 30 key scientists who over a period of 2500 years made the Moon visit possible in my lifetime I review the birth of the Space Age early Russian dominance in the sixties and the successful landing on the Moon The details of the failure analyses of the Apollo Fire which cost the lives of three Apollo astronauts are presented along with the corrective actions taken I cover the contribution of the Mercury and Gemini programs the details of the design of the Apollo and the greatest material challenges we faced The book also describes the Lunar Module without its concept we may have never made the Moon landings The book also details how we beat the Russians to the Moon covers all Apollo missions and how we saved the Apollo 13 astronauts Finally I present what I consider to be the Apollo legacy This book presents the details of the building of the Space Shuttle Orbiter and the crucial development of its heat shield It also points out key failures that had to be resolved Included is a Chapter on the Russian Space Shuttle the Buran comparing it to the Space Shuttle Orbiter The book covers the failure of the Challenger Spacecraft and what went wrong as well as how we determined the cause of the Columbia Spacecraft failure It also discusses the science of reentry of the Space Shuttle Orbiter the future of manned space and the legacy of the Space Shuttle This book is a detailed documentary of the American s manned space programs Read on and enjoy      Martian Outpost Erik Seedhouse, 2010-04-11 Mars Outpost provides a detailed insight into the various technologies mission architectures medical requirements and training needed to send humans to Mars It focuses on mission objectives and benefits and the risks and complexities that are compounded when linked to an overall planet exploration program involving

several expeditions and setting up a permanent presence on the surface The first section provides the background to sending a human mission to Mars Analogies are made with early polar exploration and the expeditions of Shackleton Amundsen and Mawson The interplanetary plans of the European Space Agency NASA and Russia are examined including the possibility of one or more nations joining forces to send humans to Mars Current mission architectures such as NASA s Constellation ESA s Aurora and Ross Tierney s DIRECT are described and evaluated The next section looks at how humans will get to the Red Planet beginning with the preparation of the crew The author examines the various analogues to understand the problems Mars bound astronauts will face Additional chapters describe the transportation hardware necessary to launch 4 6 astronauts on an interplanetary trajectory to Mars including the cutting edge engineering and design of life support systems required to protect crews for more than a year from the lethal radiation encountered in deep space NASA s current plan is to use standard chemical propulsion technology but eventually Mars crews will take advantage of advanced propulsion concepts such as the Variable Specific Impulse Magnetoplasma Rocket ion drives and nuclear propulsion The interplanetary options for reaching Mars as well as the major propulsive maneuvers required and the trajectories and energy requirements for manned and unmanned payloads are reviewed Another chapter addresses the daunting medical problems and available countermeasures for humans embarking on a mission to Mars the insidious effects of radiation on the human body and the deleterious consequences of bone and muscle deconditioning Crew selection will be considered bearing in mind the strong possibility that they may not be able to return to Earth Still another chapter describes the guidance navigation and control system architecture as well as the lander design requirements and crew tasks and responsibilities required to touch down on the Red Planet Section 3 looks at the surface mission architectures Seedhouse describes such problems as radiation extreme temperatures and construction challenges that will be encountered by colonists He examines proposed concepts for transporting cargo and astronauts long distances across the Martian surface using magnetic levitation systems permanent rail systems and flying vehicles In the penultimate chapter of the book the author explains an adaptable and mobile exploration architecture that will enable long term human exploration of Mars perhaps making it the next space based tourist location
