Allen, 2021-05-28 In the late 1950s Ted Geisel took on the challenge of creating a book using only 250 unique first grade words something that aspiring readers would have both the ability and the desire to read The result was an unlikely children s classic The Cat in the Hat But Geisel didn t stop there Using The Cat in the Hat as a template he teamed with Helen Geisel and Phyllis Cerf to create Beginner Books a whole new category of readers that combined research based literacy practices with the logical insanity of Dr Seuss The books were an enormous success giving the world such authors and illustrators as P

Dr. Eastman Roy McKie and Stan and Jan Berenstain and beloved bestsellers such as *Are You My Mother?* *Go Dog Go* *Put Me in the Zoo* and *Green Eggs and Ham*. The story of Beginner Books and Ted Geisel's role as president, policymaker and editor of the line for thirty years has been told briefly in various biographies of Dr. Seuss, but *I Can Read It All by Myself: The Beginner Books Story* presents it in full detail for the first time. Drawn from archival research and dozens of brand new interviews, *I Can Read It All by Myself* explores the origins, philosophies and operations of Beginner Books from *The Cat in the Hat* in 1957 to 2019's *A Skunk in My Bunk* and reveals the often fascinating lives of the writers and illustrators who created them. A *Scientific American* Best Staff Read. Shortlisted for the Banff Centre Mountain Book Awards. Vivid and engrossing. A celebration of beardedness. Richard Adams. *Carey*. *Wall Street Journal*. A global exploration of the eight remaining species of bears and the dangers they face. Bears have always held a central place in our collective memory, from Indigenous folklore and Greek mythology to nineteenth-century fairytales and the modern toy shop. But as humans and bears come into ever closer contact, our relationship nears a tipping point. Today, most of the eight remaining bear species are threatened with extinction. Some, such as the panda bear and the polar bear, are icons of the natural world; others, such as the spectacled bear and the sloth bear, are far less known. In *Eight Bears*, journalist Gloria Dickie embarks on a globe-trotting journey to explore each bear's story, whisking readers from the cloud forests of the Andes to the ice floes of the Arctic, from the jungles of India to the backwoods of the Rocky Mountain West. She meets with key figures on the frontlines of modern conservation efforts: the head of a rescue center for sun and moon bears freed from bile farms; a biologist known as Papa Panda who has led China's panda breeding efforts for almost four decades; a conservationist

retraining a military radar system to detect and track polar bears near towns to reveal the unparalleled challenges bears face as they contend with a rapidly changing climate and encroaching human populations Weaving together ecology history mythology and a captivating account of her travels and observations Dickie offers a closer look at our volatile relationship with these magnificent mammals Engrossing and deeply reported *Eight Bears* delivers a clear warning for what we risk losing if we don't learn to live alongside the animals that have shaped our cultures geographies and stories
