Bergson and the Future of Philosophy George Rostrevor,2014-03 This Is A New Release Of The Original 1921 Edition

Bergson and Future Philosophy, an Essay on the Scope of Intelligence George Rostrevor,2008-10-07 How am I to view all this varied panorama What reality what degrees of reality shall I divine I shall refuse to believe that all the life and motion of the scene can be explained by logical analysis as exhibiting a mere mechanical system of relations As one who has learnt from the writings of M Bergson let me make this profession at once though I cannot claim to be an orthodox disciple I shall see different kinds of reality in the solid material house the flowing river the tree alive but rooted to one spot and the human being moving and acting as it appears according to his own free will I shall recognise aspects of change and stability movement and rest conscious life and automatism It is true that none of the objects in which I discern these aspects is wholly outside the sphere of rigid scientific enquiry of explanation in terms of space quantity multiplicity But the further I get away from inert matter and the further I penetrate into life the less adequate do I find the terms of mathematical science Nothing can be accounted for entirely and life itself can be accounted for very little if I fail to recognise the reality and the true nature of time The reality of time is indeed the first principle of Bergsonian metaphysics It is essential to the nature of life that it endures that its moments interpenetrate that it prolongs the past into the present The more deeply we live the more do we realise experience as a unique indivisible flow with none of its moments wholly separate or distinct The first moment so called does not die to give place to the second it flows into the second moment and the second moment so enriched flows into the third The moments make a growing organic unity in the same way as notes of music to an attentive and understanding listener are bound up inseparably in the process of the tune This is real time or duration We may of course relax our activity or attention then the moments of our life and the notes of the music will be less perfectly fused our experience will be fragmentary superficial It will be possible to represent it with much more truth as a series of isdated sensations sounds This differing intensity of our experience is the key to the problem of matter and spirit Bergson and Future Philosophy George Rostrevor Hamilton,2016-05-20 This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it This work was reproduced from the original artifact and remains as true to the original work as possible Therefore you will see the original copyright references library stamps as most of these works have been housed in our most important libraries around the world and other notations in the work This work is in the public domain in the United States of America and possibly other nations Within the United States you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work As a reproduction of a historical artifact this work may contain missing or blurred pages poor pictures errant marks etc Scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public We appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge

alive and relevant **Bergson and Future Philosophy** George Rostrevor,2018-02-03 Excerpt from Bergson and Future Philosophy An Essay on the Scope of Intelligence The differing use of the terms intellect and intuition is then a little confusing But one thing at least is clear Intuition whether regarded as faculty or function has reference always to knowledge by sympathy knowledge from within the object known It follows I would add that this intuition About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Henri Bergson Pete Addison Y. Gunter,1986 Henri Louis Bergson 1859 1941 is the most prominent French philosopher of the last hundred years **Duration, Temporality, Self** Elena Fell,2012 What is the nature of time This new study engages with the philosophy of Henri Bergson on time and proposes a new way of thinking about the effects of future events on the past According to Bergson time is an integral feature of real things just as much as their material or size When a flower grows it takes a period of real time for it to flourish which cannot be quickened or slowed down nor can it be eliminated from the process of growth Bergson named this real time duration and argued that everything and everyone exist as duration and

that internal processes flow into one another with no clear boundaries that separate one phase of duration from another According to Bergson s philosophy the past does not disappear but smoothly flows into the present forming an indivisible dynamic unity But what if the causal flow of temporal reality is not unidirectional What if not only past events influence future ones but future ones in their turn have retrospective effect on past occurrences The author of this book analyses these key questions asserts that the changeability of the past follows from Bergson s theory of time and proposes a theory of embodied time that involves the retrospective enrichment of reality
