Masih, 1999 This is the enlarged edition of a Critical History of Modern Philosophy In this new edition Greek and Medieval Philosophies have been added The book also includes a critical and comparative account of the major contributions of eight modern thinkers To this exposition the idealism of Hegel and Bradley has been introduced Recent discussions concerning Hume Kant Hegel and Bradley have also been incorporated Whilst giving fully an analytic account of topics the author maintains that philosophy is a holistic enterprise of man as we find it in Spinoza Kant Hegel and Bradley The book has turned out to be a reliable and useful to the students of the subject throughout India This thoroughly revised and enlarged edition will prove to be all the more serviceable in general A Secret History of Consciousness Gary Lachman, 2003-07 For the last four centuries science has tried to account for everything in terms of atoms and molecules and the physical laws they adhere to Recently this effort was extended to try to include the inner world of human beings Gary Lachman argues that this view of consciousness is misguided and unfounded He points to another approach to the study and exploration of consciousness that erupted into public awareness in the late 1800s In this secret history of consciousness consciousness is seen not as a result of neurons and molecules but as responsible for them meaning is not imported from the outer world but rather creates it In this view consciousness is a living evolving presence whose development can be traced through different historical periods and which evolves along a path to a broader more expansive state What that consciousness may be like and how it may be achieved is a major concern of this book Lachman concentrates on the period since the late 1800s when Madame Blavatsky first brought the secret history out into the open As this history unfolds we encounter the ideas of many modern thinkers from esotericists like P D Ouspensky Rudolf Steiner and Colin Wilson to more mainstream philosophers like Henri Bergson William James Owen Barfield and the psychologist Andreas Mavromatis Two little known but important thinkers play a major role in his synthesis Jurij Moskvitin who showed how our consciousness relates to the mechanisms of perception and to the external world and Jean Gebser who presented perhaps the most impressive case for the evolution of consciousness An important contribution to the study of consciousness a must read

A History of Philosophy Étienne Gilson,1962 William James on the Stream of Consciousness Frederick Bauer,2009-05 William James 1842 1910 was a towering figure in the history of American thoughtwithout doubt the foremost psychologist this country has produced That was the opinion of Gordon Allport a Harvard professor and one time president of the American Psychological Association However few Americans living in this third millennium have ever heard of James despite the fact that his profound insights into the human psyche are now more urgently needed than ever before But before

James insights can once more become available a barrier to their reception must be removed What barrier The pervasive contradictions in his writings To rescue his insights from their entangling contradictions the first step was to draw attention to common sense the foundation of all scientific learning William James on Common Sense accomplished that The next step is to use that common sense philosophy and James psychology to present a fully adequate Jamesian account of the stream of consciousness This book a sequel to William James on Common Sense expands his radical empiricist two part model of the stream of consciousness to the one that allows for all three of its components sensed phenomena memory images and partless thought

Seeing the Forest for the Trees Gordon Bonan, 2023-02-09 Planting trees to improve climate is an age old idea once refuted in scientific dispute more than a century ago and reborn today with climate change worries Spanning the 1500s to the present this book examines the history and science of forest climate influences and forest management to mitigate climate change A Critical History of Psychology Thomas Hardy Leahey, 2025-05-27 This fully updated and refreshed 9th edition places social economic and political forces of change alongside psychology s internal theoretical and empirical arguments It utilizes a critical lens to illuminate the way in which the external world has shaped the development of psychology and in turn how psychology from antiquity to modernity has shaped society The text approaches the material from an integrative rather than wholly linear perspective carefully examining how issues in psychology reflect and affect concepts that lie outside the field of psychology s technical concerns as a science and profession Key features of this edition include A newly reconsidered structure including five additional interludes exploring historical background narratives and the rise of modernity to allow for flexible and adaptable textbook use Expanded exploration of the two psychologies the Way of Ideas driven by epistemology and unique to Europe and The Way of Human Nature a universal concern to find a science of human behavior and its management Including scientific applied and professional psychology as well as coverage of the social sciences and social policy implications this book is appropriate for high level undergraduate and graduate students

Understanding Religious Abuse and Recovery Patrick J. Knapp,2021-04-21 Currently there are at least four major identifiable perspectives on how people best understand and recover from religious abuse Both secular and faith based Christian adherents can be variously identified in each of these approaches This book examines these viewpoints and evaluates their various strengths and limitations It concludes that each perspective is helpful to the extent possible given the limitations of its respective philosophic or theological assumptions This book summarizes each viewpoint and suggests a larger contextual perspective helpful to better understand involvement in and recovery from religiously abusive environments The conclusion is an integration of the various conceptual frameworks and a different model SECURE is described that includes essential principles and practical strategies necessary for recovery from religious abuse Suggestions are made for future research and study both for academics with interest in the cultic studies and counseling fields and for

various people negatively affected by religious abuse and in need of recovery Experiencing Globalization Derrick M. Nault, Bei Dawei, Evangelos Voulgarakis, Rab Paterson, Cesar Andres-Miguel Suva, 2013-02-01 Today in an age of globalization religion represents a potent force in the lives of billions of people worldwide Yet when social theorists examine the impact of globalization on contemporary religious movements they tend to focus on issues such as Islamic fundamentalism and threats to US or global security This collection of essays takes a different approach analyzing with special reference to Asia religion through lived experience The key issues covered in the volume include how religious impulses contribute to globalization how religious groups and organizations repackage traditional beliefs for transcultural appeal how religious adherents cope with external threats to identity how new technologies are reshaping the nature of religious beliefs and images and how local and global religious influences blend and or clash Far from religion being a subject of peripheral concern to globalization the contributors demonstrate that from the most basic level of our interactions with the natural environment to the socio political behavior of the great religions and even to the profusion of folk and pop culture phenomena the influence of religion upon globalization and vice versa is apparent at all levels
