with the balance poised in the tensile play between political economy and social innovation The book focuses on the possibility of recovering a future in which more can be held by the many focusing on three concepts nation and nature as a commons publics and rights and bodies concerning the management of lives and livelihoods Across these three passage points the book finds evidence of a commons under attack but also defended in fragile though promising ways With contributions from leading scholars this thought provoking book will be of great interest to students and scholars in geography environmental studies politics anthropology and cultural studies

Resource Efficiency Complexity and the Commons Bruce Lankford,2013-09-05 The efficient use of natural resources is key to a sustainable economy and yet the complexities of the physical aspects of resource efficiency are poorly understood In this challenging book the author proposes a major advance in our understanding of this topic by analysing resource efficiency and efficiency gains from the perspective of common pool resources applying this idea particularly to water resources and its use in irrigated agriculture The author proposes a novel concept of the paracommons through which the savings of increased resource efficiency can be viewed In effect he asks who gets the gain of an efficiency gain By reusing economising and avoiding losses wastes and wastages freed up resources are available for further use by four destinations the same user parties directly connected to that user the wider economy or returned to the common pool The paracommons is thus a commons of and competition for resources salvaged by changes to the efficiency of natural resource systems The idea can be applied to a range of resources such as water energy forests and high seas fisheries Five issues are explored the complexity of resource use efficiency the uncertainty of efficiency interventions and outcomes destinations of freed up losses wastes and wastages implications for resource conservation and the interconnectedness of users and systems brought about by efficiency changes The book shows how these ideas put efficiency on a par with other dimensions of resource governance and sustainability such as equity justice resilience and access

science Since the 1990s the Internet has become the main driving force behind application development in all domains An increase in the demand for resource sharing across different sites connected through networks has led to an evolution of data and knowledge management systems from centralized systems to decentralized systems enabling large scale distributed applications providing high scalability Current decentralized systems still focus on data and knowledge as their main resource Feasibility of these systems relies basically on P2P peer to peer techniques and the support of agent systems with scaling and decentralized control Synergy between grids P2P systems and agent technologies is the key to data and knowledge centered systems in large scale environments This the 33rd issue of Transactions on Large Scale Data and Knowledge Centered Systems contains five revised selected regular papers Topics covered include distributed massive data streams storage systems scientific workflow scheduling cost optimization of data flows and fusion strategies Advances in Edge Computing: Massive Parallel Processing and Applications Fatos Xhafa, Arun Kumar Sangaiah, 2020-03-15 The rapid advance of Internet of Things IoT technologies has resulted in the number of IoT connected devices growing exponentially with billions of connected devices worldwide While this development brings with it great opportunities for many fields of science engineering business and everyday life it also presents challenges such as an architectural bottleneck with a very large number of IoT devices connected to a rather small number of servers in Cloud data centers and the problem of data deluge Edge computing aims to alleviate the computational burden of the IoT for the Cloud by pushing some of the computations and logics of processing from the Cloud to the Edge of the Internet It is becoming commonplace to allocate tasks and applications such as data filtering classification semantic enrichment and data aggregation to this layer but to prevent this new layer from itself becoming another bottleneck for the whole computing stack from IoT to the Cloud the Edge computing layer needs to be capable of implementing massively parallel and distributed algorithms efficiently This book Advances in Edge Computing Massive Parallel Processing and Applications addresses these challenges in 11 chapters Subjects covered include Fog storage software architecture IoT based crowdsourcing the industrial Internet of Things privacy issues smart home management in the Cloud and the Fog and a cloud robotic solution to assist medical applications Providing an overview of developments in the field the book will be of interest to all those working with the Internet of Things and Edge computing News & Views Indonesia ,1989 **The Gramophone** ,1954 **The Encyclopedia of Medieval Literature in Britain, 4 Volume Set** Sian Echard, Robert Rouse, 2017-08-07 The Encyclopedia of Medieval Literature in Britain vereint erstmals wissenschaftliche Erkenntnisse zu Multilingualit t und Interkulturalit t im mittelalterlichen Britannien und bietet mehr als 600 fundierte Eintr ge zu Schl sselpersonen Zusammenh ngen und Einfl ssen in der Literatur vom f nften bis sechzehnten Jahrhundert Einzigartiger multilingualer interkultureller Ansatz und die neuesten wissenschaftlichen Erkenntnisse Das gesamte Mittelalter und die Bandbreite literarischer Sprachen werden abgedeckt ber 600 fundierte verst ndliche Eintr ge zu Schl sselpersonen Texten kritischen Debatten Methoden kulturellen Zusammenh ngen
