BERLIN AIRLIFT

The Effort and the Aircraft

By John Provan and R.E.G. Davies

Illustrated by Mike Machat

Many books, pamphlets, and reports have been written about the Berlin Airlift of 1948-49. These have ranged from the almost encyclopaedic British Air Ministry publication to short leaflet summaries. They have been concerned primarily with the truly impressive statistics, and some have concentrated almost exclusively on the aircraft. But none has seemed to approach this historical event from the viewpoint of its historical perspective.

John Provan and Ron Davies have now cooperated in this Paladwr Press book to try to compensate for this past shortcoming. The first part of the narrative explores the political and economic circumstances that led to the crisis of May 1948, and it also takes a look at the situation as it probably appeared to the Soviet Union. To have a capitalist enclave within its jealously (and militarily)-guarded sphere of influence must have seemed something of an imposition in Muscovite eyes.

On the other hand, many readers may be surprised to realise that Berlin is only 30 miles from Poland. And—again to remember perspectives of time, as well as of place and motivation—how many recall that the Airlift was launched only three years after the end of the Second World War?

In addition to picture-descriptions of all the transport aircraft, U.S. and British, military and civilian, involved in the Airlift, this book has delved into the problems of logistics, on the ground as well as in the air, and has not forgotten the human aspects, for example, the famous exploits of the Candy Bomber and the Camel Caravan.

Here is a book that, in addition to being a useful reference to one of the great events of transport aviation history, should delight the eye; and even, here and there, amuse. For without a sense of humor, the Berlin Airlift would have been a grim experience for all the participants.
