Germany in the Twentieth Century (RLE: German Politics) David Childs,2014-12-17 The book traces the development of Germany from the Kaiser's Reich in the 1870s to the reunited democratic state led by Helmut Kohl in the 1990s The author begins by countering the popular view of Germany before 1914 as irredeemably reactionary and after assessing Germany's part in the First World War he outlines the rise and fall of the Weimar Republic The 12 years of Hitler's destructive experiment are presented in a balanced way as part of the overall development of the country Germany in defeat is then discussed as is her rebirth under Four Power occupation The last chapters explore the two separate German states and the events leading up to the restoration of German unity Berlin Derek Glass,Dietmar Rösler,John J. White,1989

Berlinwalks Peter Fritzsche,Karen Hewitt,2014-03-11 Berlin is a city that visionary architects city planners social revolutionaries and ruling kaisers have all tried to reshape As a result it is sheathed in layers of modern history each providing a chapter in the city's story of constant change Its rich atmosphere of energy made it the intellectual hub of early twentieth century Europe its lively theaters cafes and bawdy street life drew visitors from around the world The four intimate walking tours in this book reveal Berlin's breathtaking history as a small medieval commercial town as the capital of a nineteenth century Prussia as the modern dreamscape of the Weimar Republic as the new Rome of the Third Reich as a divided city and now as the capital of a reunited Germany Readers will be taken through Merlin Mitte site of the Brandenburger Tor and the dismantled Wall past the old stones and new synagogues of the Jewish Quarter among the

White-Collar Workers, Mass Culture and Neue Sachlichkeit in

Weimar Berlin Vol. 16 Deborah Smail,1999 This book concentrates on three novels set in the rapidly changing white collar milieu of Berlin during the Weimar Republic All three novels are concerned with the disarray anguish and tension of commercial Angestellten figures who are involved in selling advertising and other growing consumer orientated industries Focusing on the socially critical import of the narrative and characterization it is argued that much of the everyday experiences of the protagonists is shaped by commercial influences which penetrate their jobs their places of entertainment and their private and public relationships in very subtle but nonetheless powerful and often damaging ways The study not only emphasizes connections and parallels between the novels which have frequently been overlooked By examining contemporary developments in the Berlin entertainment world the commercialist ethos and the architecture of Neue Sachlichkeit it also sets them in several interrelated contexts yielding new perspectives on the relationship between the novels and the society and culture of Weimar Berlin

Cities in Transition Rita Schneider-Sliwa,2006-01-23 This book was written with the aim of showing that even in the era of globalization developments appearing in cities are not subject to almost unconditional global forces Rather universal forces are decisive eventualities in the process of urban restructuring often influencing its course and speed yet developments and particularities within a city strongly influence the course of events and the extent to which negative characteristics of globalization might occur Berlin Brussels Hanoi Ho Chi Minh City Hong Kong Jerusalem Johannesburg Moscow St Petersburg Sarajevo and Vienna Using these important cities the special relationship between global and local regional forces is analyzed The case studies were selected based on their political and cultural context and the fact that their social and political fabric was subject to major changes in the recent past How global processes manifest themselves locally depends to a great extent on how development processes and endogenic potentials are initiated locally in order to cope with the new global economic and societal conditions

Transitioning to Sustainable Cities and Communities Hubert Klumpner,Klearjos Eduardo Papanicolaou,Georgeen Theodore,2024-11-14 In developing alternative approaches to urban

development in response to the societal challenge of living in ever expanding cities this Volume on the SDG11 Sustainable Cities and Communities proposes the concept of an Urbanising Earth We question the dominant model of Western cities and their resultant global warming leading to the replacement of natural environments with artificial ones The Volume features over twenty practical and metaphorical cases from experienced practitioners to emerging design thinkers each of whom offer interconnected reflections on the research design and implementation of projects anchored in architecture and design arguments promoting a more balanced view of the built and natural environment These reflections designed to engage readers highlight the collective effort needed for sustainable urban development The Volume aims to facilitate design as a learning process for society to reconcile human and environmental rights while celebrating the art of cultivating and living in this urban age The right to education and housing can create synergies providing parks and public spaces to underprivileged neighbourhoods The overall aim is to connect thinking with actions while considering what modernism in architecture and urban planning is today In doing this the Volume sheds light on the condition of contemporary design itself We draw from limitless approaches to the fundamental challenges and critical discussions presented to us by this Urbanising Earth
