Identity David Hooson,1994-10-20 This volume of especially commissioned essays explores the geography of and the role of geography in national and proto national identity Place and national identity are bound together Attachment to the one is almost always inseparable from the sense of the other Yet as this volume shows the articulated self conscious linking of place and identity is by and large a modern phenomenon that took root in nineteenth century Europe The formation of supranational states and the much vaunted globalization of culture led many to believe there would be a progressive dilution of national identities and a growing agglomeration of places and nations into larger state units Precisely the reverse has taken place This book explores the connections between identity and homeland showing how a place may be perceived as archetypal endowed with love and celebrated in music and poetry yet be a pretext for violence and war It examines the evolution of ideas about identity and their manifestations in a wide variety of settings from the former Soviet Union to the island states of the South Pacific **Architecture, Politics, and Identity in Divided Berlin** Emily Pugh,2014-03-21 On

August 13 1961 under the cover of darkness East German authorities sealed the border between East and West Berlin using a hastily constructed barbed wire fence Over the next twenty eight years of the Cold War the Berlin Wall grew to become an ever present physical and psychological divider in this capital city and a powerful symbol of Cold War tensions Similarly stark polarities arose in nearly every aspect of public and private life including the built environment In *Architecture Politics and Identity in Divided Berlin* Emily Pugh provides an original comparative analysis of selected works of architecture and urban planning in both halves of Berlin during the Wall era revealing the importance of these structures to the formation of political cultural and social identities Pugh uncovers the roles played by organizations such as the Foundation for Prussian Cultural Heritage and the Building Academy in conveying the political narrative of their respective states through constructed spaces She also provides an overview of earlier notable architectural works to show the precursors for design aesthetics in Berlin at large and considers projects in the post Wall period to demonstrate the ongoing effects of the Cold War Overall Pugh offers a compelling case study of a divided city poised between powerful contending political and ideological forces and she highlights the effort expended by each side to influence public opinion in Europe and around the World through the manipulation of the built environment **Architecture Series: Bibliography** ,1988 *Encyclopedia of Historians and*

Historical Writing Kelly Boyd,2019-10-09 The *Encyclopedia of Historians and Historical Writing* contains over 800 entries

ranging from Lord Acton and Anna Comnena to Howard Zinn and from Herodotus to Simon Schama Over 300 contributors from around the world have composed critical assessments of historians from the beginning of historical writing to the present day including individuals from related disciplines like Jürgen Habermas and Clifford Geertz whose theoretical contributions have informed historical debate Additionally the Encyclopedia includes some 200 essays treating the development of national regional and topical historiographies from the Ancient Near East to the history of sexuality In addition to the Western tradition it includes substantial assessments of African Asian and Latin American historians and debates on gender and subaltern studies

A Critical History of Contemporary Architecture Asst Prof David Rifkind, Dr Elie G Haddad, 2014-03-28 This book provides a comprehensive critical overview of the developments in architecture from 1960 to 2010 The first section provides a presentation of major movements in architecture after 1960 and the second a geographic survey that covers a wide range of territories around the world This book not only reflects the different perspectives of its various authors but also charts a middle course between the aesthetic histories that examine architecture solely in terms of its formal aspects and the more ideological histories that subject it to a critique that often skirts the discussion of its formal aspects

Transforming Distressed Global Communities Fritz Wagner, Riad Mahayni, Andreas Piller, 2016-03-09 Many of our global cities are distressed and facing a host of issues economic collapse in the face of rising expectations social disintegration and civil unrest and ecological degradation and the threats associated with climate change including more frequent and more severe natural disasters Our long held assumptions about man and nature and how they interact are defunct We realize now that we can no longer continue to build without addressing the long term impacts of our actions and their spillovers Energy and natural resources are finite The way we configure economies has come into question In the developed world especially in the United States infrastructure and the notions that underpin it are outdated Meanwhile the developing world is experiencing major rapid transformations in lifestyles and economies that are affecting billions of people and requiring a whole new way of planning human settlements Cities are the key to our future they represent the most effective vehicle for positive advancements in the human condition and environmental change This volume argues for the need to redesign and re plan our cities in holistic ways that reflect our new understanding and relate to their diversity and multi dimensionality Presenting a range of case studies from around the world this volume examines how these distressed cities are dealing with these issues in planning for their future Alongside these empirical chapters are philosophical essays that consider the future of distressed cities Bringing together a team of leading scholars United Nations agencies non governmental organizations private consulting firms international organizations and foundations and policy officials this volume provides a unique and comprehensive overview on how to transform distressed communities into more livable places

Taking Shape: A New Contract Between Architecture and Nature Susannah Hagan, 2007-08-22 Taking Shape explores the evolution of scientific and academic theories that have resulted in the concept of sustainability

Susannah Hagan uses this as a basis to argue for developments in the future and argues that these theories are not just an intellectual and aesthetic regression as they are often perceived to be. By focusing on the impact of the new theories of sustainable technology and new materials in architecture, Hagan moves the discourse and practice of environmental sustainability within architecture towards a greater degree of awareness of both its cultural significance and cultural potential. In short, it demonstrates the capacity of sustainable architecture to embrace cultural and technical innovation.

The Autopoiesis of Architecture, Volume I Patrik Schumacher, 2011-04-20. Take a theoretical approach to architecture with *The Autopoiesis of Architecture* which presents the topic as a discipline with its own unique logic. Architecture's conception of itself is addressed as well as its development within wider contemporary society. Author Patrik Schumacher offers innovative treatment that enriches architectural theory with a coordinated arsenal of concepts facilitating both detailed analysis and insightful comparisons with other domains such as art, science, and politics. He explores how the various modes of communication comprising architecture depend upon each other, combine, and form a unique subsystem of society that co-evolves with other important autopoietic subsystems like art, science, politics, and the economy. The first of two volumes that together present a comprehensive account of architecture's autopoiesis, this book elaborates the theory of architecture's autopoiesis in 8 parts, 50 sections, and 200 chapters. Each of the 50 sections poses a thesis drawing a central message from the insights articulated within the respective section. The 200 chapters are gathering and sorting the accumulated intelligence of the discipline according to the new conceptual framework adopted in order to catalyze and elaborate the new formulations and insights that are then encapsulated in the theses. However, while the theoretical work in the text of the chapters relies on the rigorous build-up of a new theoretical language, the theses are written in ordinary language with the theoretical concepts placed in brackets. The full list of the 50 theses affords a convenient summary printed as appendix at the end of the book. The second volume completes the analysis of the discourse and further proposes a new agenda for contemporary architecture in response to the challenges and opportunities that confront architectural design within the context of current societal and technological developments. *Basics Interior Architecture 01: Form and Structure*

Graeme Brooker, Sally Stone, 2007-12-26. The subject of interior architecture currently lacks a detailed and educationally focussed text. The new *Basics Interior Architecture* series will fill this gap and expand students' knowledge of interior design, interior architecture, and give an insight into some of the principles and methods of professional interior architects. The first book in the *Basics Interior Architecture* series, *Form Structure*, will propose a method of analysis, understanding, and exploitation of the existing building that can be used to realise the design of a new insertion. **Avery**

Index to Architectural Periodicals. 2d Ed., Rev. and Enl. Avery Library, 1995. Pienza Charles Randall

Mack, 2019-05-15. *Pienza*, a small hill town in north central Italy, represents one of the major architectural masterpieces of the Italian Renaissance. Starting in 1459 under the sponsorship of Pope Pius II, it was rebuilt into a model Renaissance cityscape.

Renamed in the pope's honor Pienza is both a monument to papal will and the high point in the career of the supervising architect Bernardo Rossellino. Because its physical state has changed only slightly since the fifteenth century, Pienza offers us a unique opportunity to see a variety of building traditions: Roman, Florentine, Sienese, and theoretical positions: Brunelleschian and Albertian combined in an almost perfectly preserved urban environment. The town, writes Charles Mack, is a Renaissance Williamsburg without the artificiality of restoration. Pienza, the first book-length treatment of the subject in English, traces the entire redevelopment of the community from conception through construction and establishes Pienza's place in the story of Renaissance architecture.

The Conservation Movement: A History of Architectural Preservation Miles Glendinning, 2013-01-17 Winner of the 2016 Antoinette Forrester Downing Award presented by the Society of Architectural Historians. In many cities across the world, particularly in Europe, old buildings form a prominent part of the built environment, and we often take it for granted that their contribution is intrinsically positive. How has that widely shared belief come about, and is its continued general acceptance inevitable? Certainly, ancient structures have long been treated with care and reverence in many societies, including classical Rome and Greece. But only in modern Europe and America, in the last two centuries, has this care been elaborated and energised into a forceful dynamic ideology: a Conservation Movement infused with a sense of historical destiny and loss that paradoxically shared many of the characteristics of Enlightenment modernity. The close inter-relationship between conservation and modern civilisation was most dramatically heightened in periods of war or social upheaval, beginning with the French Revolution and rising to a tragic climax in the 20th century age of totalitarian extremism. More recently, the troubled relationship of heritage and global commercialism has become dominant. Miles Glendinning's new book authoritatively presents for the first time the entire history of this architectural Conservation Movement and traces its dramatic fluctuations in ideas and popularity, ending by questioning whether its recent international ascendancy can last indefinitely.

Urban Design: Street and Square Cliff Moughtin, 2007-06-07 This book, part of a series of four, offers a detailed analysis of urban design, covering the streets, squares, and buildings that make up the public face of towns and cities. It outlines the theory of the principal features of urban design from which method is developed and provides a better understanding of the main elements of urban design. This includes the arrangement, design, and details of the streets and squares and the roles they play in city planning. This third edition includes chapters on Sustainable Urban Design and Visual Analysis, introducing the latest theories and influences in the field and bringing greater practical significance to the book. Cliff Moughtin explores the street and square in terms of function, structure, and symbolism and examines fine examples in their historical context. These are set against the background of the laws of urban design composition culled from Renaissance and modern writers.
