Histories of Architecture Education in the United States Peter L. Laurence, 2023-10-31 *Histories of Architecture Education in the United States* is an edited collection focused on the professional evolution, experimental and enduring pedagogical approaches and leading institutions of American architecture education. Beginning with the emergence of architecture as a profession in Philadelphia and ending with the early work but unfinished international effort of making room for women and people of color in positions of leadership in the field, this collection offers an important history of architecture education relevant to audiences both within and outside of the United States. Other themes include the relationship of professional organizations to educational institutions, the legacy of late nineteenth century design concepts, the role of architectural history, educational changes and trans-Atlantic intellectual exchanges after WWII and the Cold War, the rise of the city and urban design in the architect's consciousness, student protests and challenges to traditional architecture education and the controversial appearance of environmental activism. This collection, in other words, provides a relevant history of the present with topics of concern to all architects studying and working today.

Architecture Competitions and the Production of Culture, Quality and Knowledge Jean-Pierre Chupin, Carmela Cucuzzella, Bechara Helal, 2015-01-26 Winner of the 2016 Bronze medal in Architecture Independent Publisher Book Awards. This book comprises a series of 22 case studies by renowned experts and new scholars in the field of architecture competition research. In 2015 it constitutes the most comprehensive survey of the dynamics behind the definition, organization, judging, archiving and publishing of architectural landscape and urban design competitions in the world. These richly documented contributions revolve around a few questions that can be summarized in a two-fold critical interrogation: How can design competitions, these historical democratic devices both praised and dreaded by designers, be considered laboratories for the production of environmental design quality and ultimately for the renewing of culture and knowledge? Includes 340 illustrations, bibliographical references and index of over 200 cited competitions. Keywords: Architecture International competitions, Architectural judgment, Design thinking, Digital archiving, databases, Architectural publications, Architectural experimentation, Landscape architecture, Urban studies.

La Banlieue, l'épreuve de l'utopie - David Leyval, 2004 La crise urbaine enjeu majeur pour la société contemporaine se manifeste particulièrement dans la banlieue. En dépit du caractère assez consensuel des positions et propositions des spécialistes, la connaissance du phénomène urbain apparaît

peu fond e th oriquement L objet de cette tude est d une part de chercher dans la philosophie des apports th oriques pour constituer un savoir raisonn et refonder une discipline l urbanisme d autre part de montrer qu une approche strictement morphologique est n cessaire voire suffisante pour comprendre et traiter le probl me de la banlieue Il est pour cela propos d laborer et exp rimer des outils de mesure et d analyse et de d gager des principes proc duraux pour la cr ation de nouvelles formes urbaines

La Condition urbaine. La ville à l'heure de la mondialisation Olivier Mongin, 2015-07-25T00:00:00+02:00 La couleur des idées Avec la mondialisation nous voyons projetés dans l'après ville dans le post urbain En Europe nous sommes habitués voir la ville comme un espace circonscrit dans lequel se déroule une intégration civique des individus Nous voici maintenant confrontés d'un côté des métropoles gigantesques et sans limites et de l'autre au surgissement d'entités globales en réseau coupées de leur environnement La reconfiguration en cours suscite l'inquiétude allons nous assister au déclinaire des valeurs urbaines qui ont accompagné l'histoire européenne La fragmentation et l'état chaotique vont ils inéluctablement l'emporter Sommes nous condamnés regretter la polis grecque la ville de la Renaissance le Paris des Lumières les grandes villes industrielles du XIXe siècle En rappelant les éléments distinctifs qui composent l'expérience urbaine Olivier Mongin pose les fondements d'une réflexion d'aujourd'hui sur la condition urbaine Nous vivons une époque où l'information se change spatialement selon des flux plutôt que dans des lieux comment dans ces conditions refonder des lieux urbains adaptés notre temps

Mai-juin 68 Dominique Damamme, 2008

Le présent ouvrage porte un nouveau regard sur Mai 68 en s'appuyant sur les travaux sérieux existants en portant la connaissance d'un large public les fruits de nouvelles recherches et de nouvelles synthèses Au lieu de plaquer sur l'événement une grille d'analyse préalable ce livre examine l'événement 68 dans sa profondeur et l'ébranlement qu'il a généré en fournissant une nouvelle problématique qui parlera autant au spécialiste des sciences sociales qu'au lecteur non spécialiste

Penser à partir de l'architecture Marie-Clotilde Roose, 2020-01-23 Cet ouvrage interdisciplinaire s'ouvre sur une question philosophique quels modes de réflexion pour penser ou repenser l'architecture ce vaste et complexe domaine tendu entre hier et demain Les chapitres qui suivent abordent les rapports de l'architecture avec la politique la technique et enfin l'éthique En effet si l'architecture aujourd'hui n'a de sens qu'en partant des préoccupations des architectes eux-mêmes les questions qu'elle soulève doivent faire l'objet d'un débat avec d'autres praticiens et théoriciens dans le double but de garantir le recul critique et d'ouvrir l'imagination créatrice
