The Literature of Forestry and Agroforestry Peter McDonald,J. P. Lassoie,1996 Discusses the evolution of forestry and agroforestry and presents the core literature in these fields covering both traditional and emerging areas Topics include changes in forest science in the 20th century the development of agroforestry literature the role of professional societies and the US *The U.S. Forest Service* Harold K. Steen,2013-12-01 The U S History Service The Retirement Association at the University of Washington **Americans and Their Forests** Michael Williams,1992-06-26 Dr Williams begins by exploring the role of the forest in American culture the symbols themes and concepts for example pioneer woodsman lumberjack wilderness generated by contact with the vast land of trees He considers the Indian use of the forest describing the ways in which native tribes altered it primarily through fire to promote a subsistence economy *The American People and the National Forests* Samuel P. Hays,2009-03-08 The year 2005 marked the centennial of the founding of the United States Forest Service USFS Samuel P Hays uses this occasion to present a cogent history of the role of American society in shaping the policies and actions of this agency From its establishment in 1905 under the auspices of the Department of Agriculture timber and grazing management dominated the agency s agenda Due to high consumer demand for wood products and meat from livestock the USFS built a formidable system of forest managers training procedures and tree science programs to specifically address these needs This strong internal organization bolstered the agency during the tumultuous years in the final one third of the century when citizens and scientists were openly critical of USFS policies yet it restricted the agency s vision and adaptability on environmental issues A dearth of ecological capabilities tormented the USFS in 1960 when the Multiple Use and Sustained Yield Act set new statutes for the preservation of wildlife recreation watershed and aesthetic resources This was followed by the National Forest Management Act of 1976 which established standards for the oversight of forest ecosystems The USFS was ill equipped to handle the myriad administrative and technological complexities that these mandates required In *The American People and the National Forests* Hays chronicles three distinct periods in USFS history provides a summarizing legacy for each and outlines the public and private interests administrators and laws that guided the agency s course and set its priorities He demonstrates how these legacies affected successive eras how they continue to influence USFS policy in the twenty first century and why USFS policies should matter to all of us **Planted Forests: Contributions to the Quest for Sustainable Societies** James Reid Boyle,Jack K. Winjum,Kathleen Kavanagh,Edward C. Jensen,2013-03-09 Planted forests from irrigated eucalypts in Brazil to Douglas fir seedlings in the mountains of Oregon are described and discussed by international experts The varieties purposes forms and ecological economic and social aspects of planted forests are considered in technical details and in case studies from

temperate and tropical regions of the world Environmental Ethics and Forestry Peter C. List, 2000 During the past twenty five years North American forestry has received increasingly vigorous scrutiny Critics including the environmentalists environmental scientists representatives of public interest groups and many individual citizens have expressed concerns about forestry's basic assumptions and methods as well as its practical outcomes Criticism has centered on such issues as the exploitation of forests for timber production the reduction and fragmentation of old growth habitats the destruction of biodiversity the degradation of grasslands through grazing practices lack of government attention to recreation facilities silvicultural methods like clearcutting and the use of herbicides and pesticides the exportation of industrial forestry techniques to other parts of the world and the use of public monies to provide services for private resource companies as in the creation of logging roads This rising tide of public scrutiny has led many foresters to suspect that their contract with society to manage forests using their best professional judgment had been undermined Some of these professionals as well as some of their critics have begun to reexamine their old beliefs and to look for new ways of practicing forestry Part of this reflective process has entailed new directions in environmental ethics and environmental philosophy This reader brings together some of the new thinking in this area Here students of the applied environmental and natural resource sciences as well as the interested general reader will discover a rich sampling of writings in environmental ethics and philosophy as they apply to forestry Readings focus on basic ethical systems in forestry and forest management philosophical issues in forestry ethics codes of ethics in forestry and related natural resource sciences such as fisheries science and wildlife biology Aldo Leopold's land ethic in forestry ethical advocacy and whistleblowing in government resource agencies the ethics of new forestry ecoforestry and public debate in forestry as well as ethical issues in global forestry such as the responsibilities of forest corporations environmentalists and individual wood consumers This volume contains materials from the founders of forestry ethics such as Bernhard Fernow Gifford Pinchot John Muir and Aldo Leopold from such organizations as the Society of American Foresters the Wildlife Society the American Fisheries Society Forest Service Employees for Environmental Ethics and the Ecoforesters group in addition to writings by a variety of well known environmental philosophers and foresters including Holmes Rolston Robin Attfield Lawrence Johnson Michael McDonald Paul Wood James E Coufal Raymond Craig Kristin Shrader Frechette Jeff DeBonis Jim L Bowyer Alasdair Gunn Goug Gaigle Alan G McQuillan Stephanie Kaza Alan Dregson Duncan Taylor and Kathleen Dean Moore Author note Peter C List is Professor of Philosophy at Oregon State University where he teaches courses on environmental ethics ethical issues in the natural resource sciences and sustainable forestry He is the author of articles on Aldo Leopold's land ethic and co author of several articles on public attitudes about federal forests and forest management published in the Journal of Forestry and Society and Natural Resources Witnesses to a Vanishing America Lee Clark Mitchell, 2014-07-14 Propelled across the continent by notions of rugged individualism and manifest destiny pioneer Americans soon discovered that such slogans only partly disguised the fact that building an empire

meant destroying a wilderness Through an astonishing range of media they voiced their concern about America's westward mission Drawing on a wide variety of evidence Lee Clark Mitchell portrays the growing apprehensions Originally published in 1981 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

The German Forest Jeffrey K. Wilson, 2012-01-01 From the late eighteenth century Germans increasingly identified the fate of their nation with that of their woodlands A variety of groups soon mobilized the German forest as a national symbol though often in ways that suited their own social economic and political interests The German Forest is the first book length history of the development and contestation of the concept of German woodlands Jeffrey K Wilson challenges the dominant interpretation that German connections to nature were based in agrarian romanticism rather than efforts at modernization He explores a variety of conflicts over the symbol from demands on landowners for public access to woodlands to state attempts to integrate ethnic Slavs into German culture through forestry and radical nationalist visions of woodlands as a model for the German race Through impressive primary and archival research Wilson demonstrates that in addition to uniting Germans the forest as a national symbol could also serve as a vehicle for protest and strife

Silvicultural Research and the Evolution of Forest Practices in the Douglas-fir Region, 2007 Silvicultural practices in the Douglas fir region evolved through a combination of formal research observation and practical experience of forest managers and silviculturists and changing economic and social factors This process began more than a century ago and still continues It has had a great influence on the economic well being of the region and on the present characteristics of the regions forests This long history is unknown to most of the public and much of it is unfamiliar to many natural resource specialists outside and even within the field of silviculture We trace the history of how we got where we are today and the contribution of silvicultural research to the evolution of forest practices We give special attention to the large body of information developed in the first half of the past century that is becoming increasingly unfamiliar to both operational foresters and perhaps more importantly to those engaged in forestry research We also discuss some current trends in silviculture and silviculture related research

Temagami's Tangled Wild Jocelyn Thorpe, 2012-02-03 Canadian wilderness seems a self evident entity yet as this volume shows in vivid historical detail wilderness is not what it seems In Temagami's Tangled Wild Jocelyn Thorpe traces how struggles over meaning racialized and gendered identities and land have made the Temagami area in Ontario into a site emblematic of wild Canadian nature even though the Teme Augama Anishnabai have long understood the region as their homeland rather than as a wilderness Eloquent and accessible this

engaging history challenges readers to acknowledge the embeddedness of colonial relations in our notions of wilderness and to reconsider our understanding of the wilderness ideal Some References on Forests and Related Natural Resources
United States. Forest Service,1958 *The Depletion Myth* Sherry H. Olson,1971 Undoubtedly the best narrative and critical analysis of the conservation movement of the Progressive period Oregon Historical Quarterly **The Beginning of the National Forest System** Harold K. Steen,1991 Uncertain Climes Joseph Giacomelli,2023-04-05 Drawing on the writings of scientists foresters surveyors and settlers Joseph Giacomelli shows that climate uncertainty infused Gilded Age thinking about economic growth and national development He details a multivalent discourse on climate that infused both practical concerns and overarching political themes not least Manifest Destiny Giacomelli makes it clear that uncertainty drew together concerns about human induced climate change and cultural worries about the sustainability of capitalist expansionism A rising belief in scientific positivism was matched by a growing awareness of the illusory nature of scientific certainty faith in society's power to improve landscapes tussled with persistent fears of environmental catastrophe
 Inherit the Holy Mountain Mark Stoll,2015 *Inherit the Holy Mountain* puts religion at the center of the history of American environmentalism rather than at its margins demonstrating how religion provided environmentalists with content direction and tone for the environmental causes they espoused
