procedures and laboratory techniques has been reorganized to include a chapter on emergency and resuscitative procedures. By emphasizing the physiologic responses to disease states and to surgical intervention we not only convey an understanding of surgery's potential and limitations but also point out the student's responsibility for providing the best possible pre-intra and postoperative care. The section on laboratory procedures is designed to provide further insight into the body's physiology in a clinical context. I am grateful to the contributors for their close cooperation especially Dr **Federal Register**, 1988-06-24.

Practical information on nursing in South Africa is provided including working in the legal framework, managing the challenges of nursing in a culturally diverse society and dealing with patients suffering from HIV and AIDS. Medical teachings on the use of oxygen, temperature regulation, mobility and skin integrity complement the ethical discussions.
