Kemmerly, 2022-07-26 This practical engaging book provides concise real life tested guidance to healthcare teams concerned

with widely reported and incentivized hospital quality and safety metrics offering both a conceptual approach and specific advice and frameworks for reviewing quality and safety numerator events from the perspective and experience of clinicians and administrators working within the Ochsner Health System. The text opens with the rationale for closely managing widely including publicly reported hospital patient quality and safety measures. Attention is given to the financial implications of quality performance with respect to both penalties and payment incentives used by payer organizations. It then reviews the major public ratings and their relevant methodologies including CMS AHRQ and NSHN. In addition, it addresses ratings by proprietary organizations that have a large member clientele such as Vizient, USNews, Leapfrog, Healthgrades, CareChex, and others. Each metric, for example the AHRQ Patient Safety Indicators (PSIs) and other metrics such as readmission rate, risk adjusted complications, hospital acquired conditions, and mortality, is addressed in a stand alone chapter. For each, the importance, approach to review, opportunity for optimization, and engagement of healthcare staff are reviewed and discussed. Overall, this book forefronts the benefits of a collaborative approach within a health system. The concurrent review process, multidisciplinary collaboration among quality improvement, clinical documentation, coding, and medical staff personnel are all emphasized. Also described in detail is the approach to and specific opportunities for medical staff education and engagement. Additional key topics include Engagement of the Medical Staff and House Staff, i.e. residents and other trainees, Futile Care, Surgical Quality Improvement, NSQIP, Nursing Provider Partnership, and Translation of Data Review to Successful Performance Improvement. Specialty chapters on pediatric neurologic and transplant quality metrics are also included.

Burdett, 1893. The City and the Hospital Daniel Skinner, Jonathan R. Wynn, Berkeley Franz, 2023-11-07. In this project, sociologists Jonathan R. Wynn and Berkeley Franz and political scientist Daniel Skinner set out to examine why so many communities surrounding hospitals are economically distressed and medically underserved. On the one hand, hospitals anchor the communities that surround them, often staying in their communities for decades. Hospitals craft strategies to engage with the surrounding community, many of them focused on buying and hiring locally. On the other hand, hospitals will often only provide care to the surrounding community through emergency rooms designed to manage crises quickly, reserving advanced medical care and long term treatment for those who can pay for it. Many hospitals buy real estate in their neighborhoods and advocate for development programs that drive gentrification and displacement. To understand how urban health care institutions work with their communities, the authors address power, history, race, and urbanity as much as the workings of the medical field. The project focuses on three urban hospitals: Connecticut's Hartford Hospital, the crown jewel of the Hartford Healthcare system; the Cleveland Clinic, which coordinates with other providers for routine care while its main campus

provides specialty care and the University of Colorado Hospital a rare example of an anchor institution that moved out of its urban area Through this examination the authors recast urban hospitals in a new light as not only medical institutions but also a complex urban force
