The Impact of WTO SPS Law on EU Food Regulations Chris Downes,2014-03-20 This book brings a fresh perspective on the emerging field of international food law with the first detailed analysis of the process and implications of domestic compliance with the World Trade Organisation WTO Sanitary and Phytosanitary SPS Agreement It investigates the influence of WTO disciplines on the domestic policy making process and examines the extent to which international trade law determines European Union EU food regulations Following controversial WTO rulings on genetically modified foods and growth hormones in beef awareness and criticism of global rules governing food has grown considerably Yet the real impact of this international legal meta framework on domestic regulations has remained obscure to practitioners and largely unexplored by legal commentators This book examines the emergence of transnational governance practices set in motion by the SPS Agreement and their role in facilitating agricultural trade In so doing it complements and challenges conventional accounts of the SPS regime dominated by analysis of WTO disputes It reviews legal commentary of the SPS Agreement to understand why WTO rules are so commonly characterised as a significant threat to domestic food policy preferences It then

takes on these assumptions through an in depth review of food policies and decision making practices in the EU revealing both the potential and limits of WTO law to shape EU policies It finally examines two important venues for the generation of global food norms the WTO SPS Committee and Codex Alimentarius to evaluate the practice and significance of transnational governance in this domain Through detailed case studies including novel foods food additives vitamin and mineral supplements and transparency and equivalence procedures this book provides a richer account of compliance and exposes the subtle but important influence of WTO obligations *Food Choice And The Consumer* David Marshall, David W. Marshall, 1995-12-31 The provision of food for consumers is affected by factors concerned with a variety of disciplines such as technical feasibility choice and environment This book explores these factors Consumer Acceptance of Genetically Modified Foods Robert Eugene Evenson, V. Santaniello, 2004 In recent years there have been increasing concerns about the potential health risks of genetically modified foods Consumer perceptions vary between countries but are probably most pronounced in Europe and least in North America These have had a profound and controversial effect on the development of markets for GM products This book presents a compilation of studies of consumer acceptance of GM foods These studies utilized different methods and evidence including price and expenditure data experimental methods willingness to pay consumer attitudes and economic consequences Australian and New Zealand Food and Drink Christine Osborne, 1989 Describes the food and beverages of Australia and New Zealand in relation to their history geography and culture Also includes recipes and information about regional specialties and festive foods Micro-Clusters and Networks Ewen Michael, 2006-10-19 This book introduces a new approach to the analysis and management of growth in small tourism markets for regional and rural locations It recognizes from the outset that the vast bulk of the tourism industry s product is delivered by small business enterprises and that many of these are located outside of metropolitan areas Its central premise is that a myriad of small scale clusters can provide an effective means to establish a local competitive advantage in tourism activities based on the resources of existing communities The book brings together contemporary views of the potential of clustering theory to promote development in micro markets within the paradigm of competition to create a new framework for regional development that might serve to enhance the growth of small scale tourism destinations Microclusters and Networks provides a theoretical explanation of how and why micro clusters come about with chapters by specialist authors to illustrate examples of their practice in the real world but it goes further to demonstrate not only why they work but also how community members interact to form successful clusters The incorporation of networking theory provides the means to explain the role of local community interaction in delivering successful social outcomes The analysis that is provided clearly has applications for many industries beyond the development of rural and regional tourism destinations
