Sustainability Compendium Edition III Fibre2Fashion, Sustainability Compendium is an informative sourcebook that holds a detailed description of hundred sustainable textile companies filtered from different categories of the textile value chain It will be a guiding tool for companies who are seeking to turn their business sustainable as well as be an inspiration for others to turn towards ecological business This compendium will give the featured companies a voice to narrate their sustainable story to the corporate world Each participant would have a space in this feature to present their sustainable activities setting an example that would lead others to join the sustainable drive Fashion in itself is a dynamic industry and if you choose to look at fashion solely from the sustainability point of view then keeping track of developments is simply not easy Inventions innovations and ideas have already changed the narrative and the axioms of the business of fashion that dominated the discourse at the turn of the century today sound hopelessly outdated and out of place Sustainable fashion was just another segment of the industry till even in the early half of this decade But not anymore Thought leaders are unanimous about one thing sustainable fashion can no more be a niche and many of them agree that if it ain t sustainable then it ain t fashion By and by many brands are lending credence to that idea while for many others the idea is just beginning to sink in This is where this compendium comes in with ideas There are many articles in this volume that discuss different aspects threadbare Fashionable Sustainable Is that even possible argues that there is more to sustainable fashion than meets the eye The article asserts that the relationship between fashion and sustainability is active and complex and each time we look at the key ideas or issues at stake different aspects seem to come to light It looks at sustainability in manufacturing working conditions of garment workers and the role of the fashion designer in the entire process Therein Revitalising a lifestyle is an interview with Edric Ong an award winning

Malaysian designer of natural textiles fashion and crafts Currently Senior Vice President of the World Crafts Council Asia Pacific he set up the World Eco Fibre and Textile WEFT Network to further the cause of natural fibres and dyes In a freewheeling interview Ong talks about sustainable fashion and where it is going globally and how it can be made a more permanent mode of retail fashion He also talks about his well known experiments with ikat and points out that eco lifestyle is about going back to the basics The True Cost of Fast Fashion goes ahead to underline the fact that it is indeed possible to improve and impact almost every aspect of the production process and factors such as scale technical viability and global supply chains are no longer limiting as long as businesses are committed to paying the true cost of production And No fast is not sustainable takes a deep dive into the entire gamut of fashion right from the birth of the concept to the explosive growth of the segment and finally the backlash I hope this fourth edition will give you thoughts to mull over and even implement some in your day to day business
