Throughout, Corr., and Considerably Enl Thomas John Graham (M.D.), 1837 Essential Evidence-Based Medicine Dan Mayer, 2004-06-17 This is an ideal introductory text on Evidence Based Medicine EBM for medical students and all health care professionals An Introductory Philosophy of Medicine James A. Marcum, 2008-05-07 In this book the author explores the shifting philosophical boundaries of modern medical knowledge and practice occasioned by the crisis of quality

of care especially in terms of the various humanistic adjustments to the biomedical model To that end he examines the metaphysical epistemological and ethical boundaries of these medical models He begins with their metaphysics analyzing the metaphysical positions and presuppositions and ontological commitments upon which medical knowledge and practice is founded Next he considers the epistemological issues that face these medical models particularly those driven by methodological procedures undertaken by epistemic agents to constitute medical knowledge and practice Finally he examines the axiological boundaries and the ethical implications of each model especially in terms of the physician patient relationship In a concluding Epilogue he discusses how the philosophical analysis of the humanization of modern medicine helps to address the crisis of care as well as the question of What is medicine The book s unique features include a comprehensive coverage of the various topics in the philosophy of medicine that have emerged over the past several decades and a philosophical context for embedding bioethical discussions The book s target audiences include both undergraduate and graduate students as well as healthcare professionals and professional philosophers This book is the 99th issue of the Series Philosophy and Medicine and it can be considered a crown of thirty years of intensive and dynamic discussion in the field We are completely convinced that after its publication it can be finally said that undoubtedly the philosophy of medicine exists as a special field of inquiry

Greene,2016-09-01 The turbulent history of generic pharmaceuticals raises powerful questions about similarity and difference in modern medicine Generic drugs are now familiar objects in clinics drugstores and households around the world We like to think of these tablets capsules patches and ointments as interchangeable with their brand name counterparts why pay more for the same And yet they are not quite the same They differ in price in place of origin in color shape and size in the dyes binders fillers and coatings used and in a host of other ways Claims of generic equivalence as physician historian Jeremy Greene reveals in this gripping narrative are never based on being identical to the original drug in all respects but in being the same in all ways that matter How do we know what parts of a pill really matter Decisions about which differences are significant and which are trivial in the world of therapeutics are not resolved by simple chemical or biological assays alone As Greene reveals in this fascinating account questions of therapeutic similarity and difference are also always questions of pharmacology and physiology of economics and politics of morality and belief Generic is the first book to chronicle the social political and cultural history of generic drugs in America It narrates the evolution of the generic drug industry from a set of mid twentieth century schlock houses and counterfeiters into an agile and surprisingly powerful set of multinational corporations in the early twenty first century The substitution of bioequivalent generic drugs for more expensive brand name products is a rare success story in a field of failed attempts to deliver equivalent value in health care for a lower price Greene s history sheds light on the controversies shadowing the success of generics problems with the generalizability of medical knowledge the fragile role of science in public policy and the increasing role of industry marketing and consumer logics in late twentieth century and early twenty first century health care Oversight of the 1997 National Drug Control Strategy United States. [Men-Tsee-Khang-འཇམ་དབྱངས་མཆོག་] English Editorial Board,2018-03-23 A Note from the Editor s Desk Dear fellow students
It is a matter of immense joy for us to be able to bring out the XXIVth issue of our annual academic journal Gangri Langtso
Gangri Langtso is a vitally important bilingual academic platform of our college for free and open intellectual discussions on
various topics pertaining to Tibetan medicine Tibetan Astro Science and many other subjects It is also a common platform
where we all can share our ideas thoughts dreams and memories in the form of any creative writings As English editors of
this esteemed magazine we learned a lot of things from the experience and at the same time had quite a delightful and
memorable year 2018 We hope the very same for you all the most respected teachers staffs and fellow students It was a
privilege for us to go through your diligently written articles translations and poetry all of which are highly admirable and
truly deserving much more appreciation We have published every single article that was submitted to us as we genuinely
consider that even one paragraph written on one s own is so much worthwhile The benefits of writing essays or analytical
articles are so much more than we know It is believed to be the best method of learning in not only remembering the textual
information but also to stimulate our brain for critical and logical thinking which His Holiness the Dalai Lama always gives
emphasis to Why writing is the best method of learning This is because we can write something on our own language if and
only if we are convinced of the facts and we do not get convinced of facts by memorizations through repetition but by
reasoning through analysis and logic Questions may be asked such as it will be very difficult to cultivate those qualities
mentioned above anyway so why those skills and qualities are absolutely essential for us as future doctors and TASP s Our
profession is deeply connected to wellbeing of other people having direct impacts on their lives Unlike western doctors who
rely on many laboratory tests and machines our diagnoses and course of treatments have to be mainly based on our own

critical thinking experience and intelligence Hence we must try to develop these skills as early as possible Even a slight fault in the diagnosis of a patient can cause loss of trust in our medical system Such is the magnitude of our responsibility Moreover if we allow ourselves to think in the lines of secure job from Men tsee khang and no need to bother beyond that I am surely not the right person to point out these facts but every single theory of education modern or traditional scholars and research on education policy says learning or educating for job and future security is wrong We blame modern education and modern medical practitioners with bombastic words like commercialized and no ethics but first even as students we absolutely need to search within ourselves to make sure we are free from such blames How does human brain works as far as learning is concerned Exams are a necessity that we cannot do away with in today s world but studying for exams alone does not guarantee knowledge and skills that are needed in real life This is a challenge that every educators and students face today When we study only for an exam our brain naturally cannot commit those chunks of information into permanent memory because sub consciously we wanted our brain only to retrieve those pieces of information in few weeks during the exam So majority of people cannot retain 70 80% of the information one month after the exam if it was not revised regularly I would be more than glad if someone proved me that I am wrong However once we write an investigative article or a short piece on a certain topic in our own words we don t forget about it plus we gain additional perspectives on the topic In my humble opinion it is in our own advantage to study for life beyond exams As a fellow student I am optimistic that what I say here will be taken in a positive spirit We are living in an interesting time when the world is making leaps and bounds in the field of health science The diseases that were not curable before few decades are cured easily and preventive medicines even nullify the possibility of many diseases The research in stem cells and biotechnology is developing in such a rate that now doctors are taking steps in detecting the possibility of certain diseases in one s life through genetic information and correcting those faulty genes even before birth The scientists doctors and researchers spend their lifetimes solely for such breakthroughs needless to mention the billions of dollars spent In such a rapidly changing time we as Sowa Rigpa students all want to become great future healthcare providers This is undisputedly a great aspiration and even a noble one However just noble thoughts and flowery words will mean nothing if it is not translated into concrete action and obtained results While maintaining the integrity of our medical system if we as Sowa Rigpa practitioners were not able to keep up with the time our goal of providing people the best possible health service may not be materialized To highlight some of the things that happened in 2018 pertaining to Sowa Rigpa In July American chemistry society USA published a paper claiming the mercury level in Tibetan medicine is causing an environmental hazard in Tibet and China Unbiased analysts believe that it is nothing but another sham that Chinese government enacted because ACS clearly acknowledged that the funds came from the Chinese government and they merely published the paper on its website Since China cannot possibly deny the destruction and havoc brought on the third pole of the world for economic gains in an effort to mislead the world and wash their hands

off they tried to blame the destruction of Tibetan environment to Tibetan medicine In the article itself it does not talk about the thorough process that is strictly followed to detoxify or tame it before using it in Tibetan medicines In another drama they added the medicinal bath therapy of Lum in UNESCO list as world intangible cultural heritage They on one hand want Sowa Rigpa to take the blames of environmental destruction and on the other hand want to claim full patent rights on Sowa Rigpa as China s intellectual property What more is unreasonable than this What can we do in the wake of such developments Last but not the least I would like to say thank you all who contributed your writings for this very important platform Such journals are crucial part of educational curriculum Particularly in the traditional system of education three things are deemed indispensable namely lecture debate and composition Each one of them is equally important for a holistic quality education We believe publishing this journal is serving as a small part in fulfilling the requirements of composition In fact I don t need to emphasize more on the importance of learning through composition because Yuthok Yonten Gompo himself clearly stated in Gyueshi that the foundation to become a great physician is to excel in reading and composition in the 31st chapter of explanatory tantra Finally we thank Dr Namdol Lhamo la for proofreading the articles and sharing her insights with us We also thank you all very much for giving us this opportunity to serve as the English editor of this journal Our very limited experience and lack of proper knowledge in English language were the greatest obstacles to work in our best abilities Even so we are very happy to put our best efforts in this endeavor for we consider it an honor to have your trust and support May the merits of our collective efforts bear the fruits soon to free sentient beings from suffering We wish you all a very happy and meaningful academic year 2019 Yours Sincerely Thupten Palden
