Colombo,1847 **Failure of the State** Lene Guercke,2025-03-29 This Open Access book explores an issue that has received little attention in human rights research organised criminal groups OCGs as perpetrators of human rights violations especially disappearances It takes an interdisciplinary approach combining doctrinal legal research with a qualitative study on present day disappearances in Mexico Disappearances are a complex human rights violation that impacts not only the disappeared person but also their relatives who are left in a limbo of uncertainty about their loved one s fate Originally part of state led repression today disappearances occur in varied contexts often involving OCGs and other non state actors However disappearances committed by non state actors are not human rights violations under International Human Rights Law IHRL thereby potentially leaving a gap in the legal protection of victims The book first analyses state obligations and case law involving state responsibility for human rights violations committed by non state actors and applies the analysis to OCGs This internal legal perspective is complemented by an external study based on interviews with human rights practitioners working on disappearances in Mexico which often involve OCGs The qualitative study offers a unique perspective on human rights protection in reality The book adds to scholarship on non state actors and disappearances and to incipient international legal scholarship on the issue of organised crime and international law Moreover the study on Mexico provides a richer understanding of challenges faced by practitioners on the ground where OCGs commit human

rights violations alongside or in collusion with state forces and against the backdrop of an overall failure of the state The book may be of interest to a diverse audience including legal scholars and practitioners human rights scholars in fields such as political science international relations or socio legal studies as well as funders supporting the work of NGOs in Mexico and similar contexts and NGOs themselves

Pragmatic Markers in Oral Narrative Montserrat González,2004 This book presents the multifunctional nature of pragmatic discourse markers in English and Catalan oral narratives from the point of view of text linguistics and contrastive analysis It is argued that English and Catalan markers are distributed and operate differently at four different levels in the varied discourse structures of the text i e at the ideational the rhetorical the sequential and the inferential levels The results confirm the distinctions in functional systemic levels and indicate that the nature of the two languages has a direct influence on the presence and nature of markers in the texts The study is built up on a corpus of English and Catalan elicited narratives of native speakers adopting the sociolinguistic Labovian framework adapted to the situation of educated adults The study results in a better understanding of the contribution of pragmatic markers to the organization and the interpretation of oral texts bringing insights from relevance and cognitive approaches to text structure and moving from descriptive to theoretical levels of analysis and discussion
