Class Structure In Europe New Findings From East West Comparisons Of Social Structure And Mobility:

Class Structure in Europe Dr. Max Haller, 1989 **Class Structure in Europe**, 2003 A comparison of these two presidents and presidencies examining their legacies leadership styles and places in history **Class Structure in Europe** Max Haller, 2019-07-25 Is there a typical European class structure Have power patterns left any imprint in the European societies of today Has the experience of socialist revolution in Eastern Europe created a distinctive social structural pattern in that part of the continent These are only a few of the questions taken up by the contributors to this collection of case studies and comparative research *A Social History of Twentieth-Century Europe* Béla Tomka, 2013-03-12 A Social History of Twentieth Century Europe offers a systematic overview on major aspects of social life including population family and households social inequalities and mobility the welfare state work consumption and leisure social cleavages in politics urbanization as well as education religion and culture It also addresses major debates and diverging interpretations of historical and social research regarding the history of European societies in the past one hundred years Organized in ten thematic chapters this book takes an interdisciplinary approach making use of the methods and results of not only history but also sociology demography economics and political science Béla Tomka presents both the diversity and the commonalities of European societies looking not just to Western European countries but Eastern Central and Southern European countries as well A perfect introduction for all students of European history **Class Stratification** Richard Breen, David B. Rottman, 2014-06-03 An introductory account of the concept of class stratification of contemporary approaches to the study of class and of current debates about its role in the study of society Definitions and an analysis of different theoretical approaches to class are accompanied by empirical material which compares the class structures of a range of countries and examines social mobility in cross national perspective **Conflicts About Class** David J. Lee, Bryan S. Turner, 2014-09-12 In recent years there has been growing debate among sociologists about the concept of class and its relevance to the highly industrialised world of the late twentieth century This book makes available in a single volume all of the key contributions to this debate and takes it a step further with a number of specially commissioned pieces An editorial introduction which sets the main arguments in context additional commentary and two alternative conclusions help to make this a unique text for a subject that remains crucial yet highly contentious **The Modernisation of European Universities** Kwiek Marek, Kurkiewicz Andrzej, 2012-09-26 The recent decade brought about new ways of thinking about universities European level educational policies became increasingly influential as the agenda of university reforms was viewed as part of greater Lisbon strategy reforms National governments adopted the economic concept of the university consistently developed in subsequent official documents of the European Commission The EU member states currently need to balance their educational policies between the requirements of policies promoted by the EU and the requirements of their national systems Additionally the national educational policies are under high pressure due to globalisation European universities and

European academics operate in the midst of these large scale changes Their interpretations of and their responses to what is termed the modernisation agenda of European universities are at the core of this volume Trust, Property and Social Change in a Southern Slovakian Village Davide Torsello, 2003 Slovakia is a young and little studied country of the former socialist bloc As in all post socialist Eurasia continuing transformations of everyday practices are still inadequately understood This study combines anthropological and historical methods to search for alternative ways of reading post socialism in the rural community More specifically it applies the notions of trust and property to map the outcomes of over a hundred years of turbulent social change but not in the way that mainstream economists and political scientists have used these concepts Trust and property acquire analytic significance only when contextualised into the practices and ideologies of the actors This allows the observer to grasp the nuances of apparently ambivalent behaviour and uttered mistrust in other villagers and local institutions Ambiguity veils subtle strategies for keeping up with the instability of the times and obtaining the best one can from the present By providing a theoretically grounded ethnographical account of historical transformation the book makes an original anthropological contribution to the classic theme of social change in rural societies while at the same time engaging constructively with other social science approaches to postsocialism The Routledge History Handbook of Central and Eastern Europe in the Twentieth Century Włodzimierz Borodziej, Stanislav Holubec, Joachim von Puttkamer, 2020-04-21 Challenges of Modernity offers a broad account of the social and economic history of Central and Eastern Europe in the twentieth century and asks critical questions about the structure and experience of modernity in different contexts and periods This volume focuses on central questions such as How did the various aspects of modernity manifest themselves in the region and what were their limits How was the multifaceted transition from a mainly agrarian to an industrial and post industrial society experienced and perceived by historical subjects Did Central and Eastern Europe in fact approximate its dream of modernity in the twentieth century despite all the reversals detours and third way visions Structured chronologically and taking a comparative approach a range of international contributors combine a focus on the overarching problems of the region with a discussion of individual countries and societies offering the reader a comprehensive nuanced survey of the social and economic history of this complex region in the recent past The first in a four volume set on Central and Eastern Europe in the twentieth century it is the go to resource for those interested in the challenges of modernity faced by this dynamic region **International Comparative Research** Manfred Niessen, Jules Peschar, Chantal Kourilsky, 2013-10-22 International Comparative Research Social Structures and Public Institutions in Eastern and Western Europe is a seven chapter book prepared for the Second International Seminar on Cross National Comparative Research Chapters 1 and 2 describe developments in comparative research on social structure and comparisons of social mobility in different socio economic systems Subsequent chapters explore structural changes and mobility in a capitalist and a socialist society comparative research on public institutions a comparative perspective on social problems

and the law and comparison of public institutions their organization and procedures The last chapter considers high level public officials in Eastern and Western European countries **Stratification in Higher Education** Yossi Shavit,2007-06-13

The mass expansion of higher education is one of the most important social transformations of the second half of the twentieth century In this book scholars from 15 countries representing Western and Eastern Europe East Asia Israel Australia and the United States assess the links between this expansion and inequality in the national context Contrary to most expectations the authors show that as access to higher education expands all social classes benefit Neither greater diversification nor privatization in higher education results in greater inequality In some cases especially where the most advantaged already have significant access to higher education opportunities increase most for persons from disadvantaged origins Also during the late twentieth century opportunities for women increased faster than those for men Offering a new spin on conventional wisdom this book shows how all social classes benefit from the expansion of higher education

Repositioning Class Gordon Marshall,1997-08-18 This book demonstrates that social class is as important now to the understanding of 20th century industrial societies as it was in the first years of the century **Federalism Doomed?** Andreas Heinemann-Grüder,2002 The conceptual uncertainty when dealing with processes of integration and disintegration in Europe is striking because traditional notions of the nation state constitutionalism sovereignty and federalism do not account for emerging realities in either Western or Eastern Europe This volume explores the complex inter relationship between federal arrangements and their effects on integrating multi ethnic societies in Europe and takes stock of current debates on the effects of federalism on integration and disintegration in Eastern and Western Europe For the first time federalism is addressed in a pan European context and an attempt is made to look for remedies to overcome nationalism in both East and West within a federalist institutional framework **Social Mobility in Europe** Richard Breen,2004-11-25

Social Mobility in Europe is the most comprehensive study to date of trends in intergenerational social mobility It uses data from 11 European countries covering the last 30 years of the twentieth century to analyze differences between countries and changes through time The findings call into question several long standing views about social mobility We find a growing similarity between countries in their class structures and rates of absolute mobility in other words the countries of Europe are now more alike in their flows between class origins and destinations than they were thirty years ago However differences between countries in social fluidity that is the relative chances between people of different class origins of being found in given classdestinations show no reduction and so there is no evidence supporting theories of modernization which predict such convergence Our results also contradict the long standing Featherman Jones Hauser hypothesis of a basic similarity in social fluidity in all industrial societies with a market economyand a nuclear family system There are considerable differences between countries like Israel and Sweden where societal openness is very marked and Italy France and Germany where social fluidity rates are low Similarly there is a substantial difference between for example the Netherlands in the 1970s

which was quite closed and in the 1990s when it ranks among the most open societies Mobility tables reflect many underlying processes and this makes it difficult to explain mobility and fluidity or to provide policy prescriptions Nevertheless those countries in which fluidity increased over the last decades of the twentieth century had not only succeeded in reducing class inequalities in educational attainment but had also restricted the degree to which among people with the same level of education class background affected their chances of gaining access to better class destinations

Comparative Loglinear Analyses of Social Mobility and Heterogamy Ruud Luijkx,1994

Education, Occupation and Social Origin Fabrizio Bernardi,Gabriele Ballarino,2016-04-29 Questioning the assumption that education is the great social equalizer this book takes a comparative approach to the social origin education destination triangle by examining advantage in 14 different countries including case studies from Europe Israel the USA Russia and Japan Contributions from leading experts examine the relation between family background education and occupational achievement over time and across educational levels focusing on the relationship between individuals social origins and their income and occupational outcomes Providing new theoretical insights this book eloquently analyzes a variety of barriers to social mobility Using concepts of compensatory and boosting advantage to explain the intergenerational transmission of social inequality it refutes the notion of contemporary societies as education based and meritocratic showing that in most of the countries studied there is no sign of decreasing intergenerational association despite the expansion of education With its multitude of pertinent case studies Education Occupation and Social Origin will be of interest to academics and students of social policy as well as those interested in social inequalities and their evolution over time It will also be a useful reference for governmental policymakers in the wake of the current economic crisis

The Great Surprise of the Small Transformation Akos Rona-Tas,1997 Views the fall of Communism in Hungary as the result of the erosion of universal state employment and the development of an informal private sector during the time of Communist rule

Social Stratification and Inequality Harold R. Kerbo,1996 This text provides coverage of research and theory relating to social stratification in the US and selected international societies It adopts general conflict principles as its theoretical orientation and focuses on the development and maintenance of the structure of inequality This edition has been updated to include data from the 1990 census and features examples figures and tables A new chapter on race ethnicity and gender focuses on important issues of inequality There are also new chapters on Germany and on Japan

Russia's Liberal Project Marcia A. Weigle,2010-11-01 A study of contemporary politics in Russia assessing the attempted transition from totalitarianism to liberal democracy It shows that although liberal institutions have been tentatively established the weak social and cultural supports threaten the success of Russia's liberal project

Against Islamophobia Arno Tausch,2007 In this book the author presents optimistic socio liberal conclusions about Islam in the world system Countering some alarmist voices in the West neither migration nor Muslim culture are to be blamed for the contemporary crisis but the very nature of unequal capitalist accumulation and dependency that is at the core

of the world capitalist system For one the analysis is based on current thinking on Kondratiev waves of world political development inherent in recent work by IIASA and the NATO Institute for Advanced Studies Analyses are also presented on the framework of the debate on cross national determinants of human well being in the world system While the author is cautiously optimistic about a socio liberal non interventionist policy alternative he has come to the conclusion that present patterns of global governance modeled around the neo liberal Washington Consensus and American hyperpower are doomed for failure A new socio liberal global consensus on global migration global order and global governance could emerge instead
