Class And Consciousness:

History and Class Consciousness Georg Lukacs, 1972-11-15 This is the first time one of the most important of Lukacs' early theoretical writings published in Germany in 1923 has been made available in English. The book consists of a series of essays treating among other topics the definition of orthodox Marxism, the question of legality and illegality, Rosa Luxemburg as a Marxist, the changing function of Historic Marxism, class consciousness and the substantiation and consciousness of the Proletariat. Writing in 1968 on the occasion of the appearance of his collected works, Lukacs evaluated the influence of this book as follows: For the historical effect of *History and Class Consciousness* and also for the actuality of the present time, one problem is of decisive importance: alienation, which is here treated for the first time since Marx as the central question of a revolutionary critique of capitalism and whose historical as well as methodological origins are deeply rooted in Hegelian dialectic. It goes without saying that the problem was omnipresent. A few years after *History and Class Consciousness* was published, it was moved into the focus of philosophical discussion by Heidegger in his *Being and Time*, a place which it maintains to this day largely as a result of the position occupied by Sartre and his followers. The philologic question raised by L. Goldmann, who considered Heidegger's work partly as a polemic reply to my admittedly unnamed work, need not be discussed here. It suffices today to say that the problem was in the air, particularly if we analyze its background in detail in order to clarify its effect: the mixture of Marxist and Existentialist thought processes which prevailed especially in France immediately after the Second World War. In this connection, priorities, influences and so on are not particularly significant. What is important is that the alienation of man was recognized and appreciated as the central problem of the time in which we live, by bourgeois as well as proletarian, by politically rightist and leftist thinkers. Thus *History and Class Consciousness* exerted a profound effect in the circles of the youthful intelligentsia. *Aspects of History and Class Consciousness* Istvan Meszaros, 2016-03-31 The various contributions in this book, originally published in 1971, discuss many aspects of the complex subject of history and class consciousness and the themes that are dealt with are all inter-related. The papers range from history and sociology through political theory and philosophy to art criticism and literary criticism. Georg Lukacs' classic work *History and Class Consciousness* is discussed in several of the essays and the volume is prefaced by a letter from Georg Lukacs to Istvan Meszaros. **Class Structure in the Social Consciousness** Stanislaw Ossowski, 2013-09-05 First published in 1998. This is Volume III of the twenty-one in the *Race, Class and Social Structure* series. Looking at social consciousness in part one, it focuses on biblical legends, comparative sociology and then expands to include conceptual constructs and social reality in the second section. **Consciousness and Action Among the Western Working Class** Michael Mann, 1973 This book makes a comparative analysis of working class consciousness in Britain, France, Italy and the United States and seeks to answer the question of whether the working class today is a potentially revolutionary force in the West. In France and Italy, class conflict and working class consciousness have reached a higher level of intensity than in Britain or the United States.

Both Marxist and functionalist explanations for this are discussed special attention being paid to the recent French Marxism of Althusser Mallet and Touraine Class consciousness is examined as a dynamic process by analyzing the explosion of consciousness which often seems to occur in turbulent strike situations The author concludes that class conflict is more complex than either group of theorists suggest Working class consciousness and the relationship between labor and capital are found to be dualistic and fundamentally unstable Revolutionary potential is greatest in situations of uneven economic and social development when the capital labor contradiction may be reinforced by other social conflicts This means that the Marxist claim that the working class carries in itself the power to be a class for itself must be rejected *Class and Class Consciousness in the Industrial Revolution, 1780-1850* Robert John Morris,1979 **False Consciousness and Ideology in Marxist Theory** Ron Eyerman,1981 History and Class Consciousness Georg Lukács,2021-03-13 History and Class Consciousness Studies in Marxist Dialectics is a 1923 book by the Hungarian philosopher Georg Lukács in which the author re emphasizes the philosopher Georg Wilhelm Friedrich Hegel's influence on Karl Marx analyses the concept of class consciousness and attempts a philosophical justification of Bolshevism Lukács attempts a philosophical justification of Bolshevism stressing the distinction between actual class consciousness and ascribed class consciousness the attitudes the proletariat would have if they were aware of all of the facts Marx's idea of class consciousness is seen as a thought which directly intervenes into social being Claiming to return to Marx's methodology Lukács re emphasizes the philosopher Georg Wilhelm Friedrich Hegel's influence on the philosopher Karl Marx emphasizes dialectics over materialism makes concepts such as alienation and reification central to his theory and argues for the primacy of the concept of totality Lukács depicts Marx as an eschatological thinker He develops a version of Hegelian Marxism that contrasted with the emerging Soviet interpretations of Marxism based on the work of the philosopher Georgi Plekhanov and the dialectics of nature inspired by the philosopher Friedrich Engels While reading it is important to note that later in his life Lukács believed he misunderstood Marx's conception of alienation and conflated it with Hegel's conception It is important to understand too that Lukács believed orthodox marxism refers exclusively to method As such this book should not be read to keep one foot into the ivory tower but to understand this as another addition to a long historical conversation had on the philosophical implications of class consciousness not so much a radical history of it as the title may be interpreted as **Aspects of History and Class Consciousness** T. B. Bottomore,1972 **The Psychology of Social Classes** Richard Centers,1949 *History and Class Consciousness* ,1973 **Aspects of History and Class Consciousness** Thomas Burton Bottomore,David Daiches,Lucien Goldmann,1973 **Class Consciousness and Education in Sweden** Alpesh Maisuria,2017-12-14 Emerging from a Marxist perspective this book focuses on the importance of social class and the role of education broadly in relation to the possibility of revolutionary change in Sweden and beyond Critically tracing the celebrated so called Swedish model from its inception to its current neoliberalisation Maisuria explores the contours of class as part of social democratic history culture

and education especially against the alternatives of communism and fascism Presenting empirical research on class consciousness within a higher education context Maisuria analyses student testimonies on their perceptions of social democracy and Swedishness with ethno racial dynamics which is subjected to a Gramscian and Critical Realist derived explanatory critique for social transformation History and Class Consciousness Georg Lukács,1971 A Defence of History and Class Consciousness György Lukács,2000 Georg Lukács was dubbed the philosopher of the October Revolution and his masterpiece History and Class Consciousness 1923 is commonly held to be the foundational text for the tradition known as Western Marxism which includes the work of Theodor Adorno Walter Benjamin Ernst Bloch Max Horkheimer and Herbert Marcuse As the liberating energies of the Russian Revolution were sapped by Stalinism Lukács was subjected to ferocious attack for deviations from the party line in History and Class Consciousness In the mid 1920s he wrote Talismans and the Dialectic a sustained and passionate response to this onslaught Unpublished at the time Lukács himself thought the text had been destroyed However a group of researchers recently found the manuscript gathering dust in the newly opened archives of the CPSU in Moscow Now for the first time this fascinating polemical and intense text is available in English in an accomplished translation by Esther Leslie and published here with an introduction from John Rees and a postface by Slavoj Žižek It is a crucial part of a hidden intellectual history and will transform interpretations of Lukács's oeuvre Some critiques of my book History and Class Consciousness have appeared written by Comrades Rudas and Deborin which I simply cannot let pass without a response It is certainly not my intention to defend the book itself I would be only too glad if I could regard it as completely redundant if I could see that its purpose had been fully accomplished What is this purpose To demonstrate methodologically that the organisation and tactics of Bolshevism are the only possible consequence of Marxism to prove that of necessity the problems of Bolshevism follow logically that is to say logically in a dialectical sense from the method of materialist dialectics as implemented by its founders But my critics move instead in the opposite direction They use their polemics to smuggle Menshevik elements into Marxism and Leninism I have to retaliate I am not defending my book I am attacking the poen Menshevism of Deborin and the tail ending of Rudas

History and Class Consciousness Georg Lukács,2017-04-17 History and Class Consciousness Studies in Marxist Dialectics German Geschichte und Klassenbewusstsein Studien Über marxistische Dialektik is a 1923 book by the Hungarian philosopher György Lukács in which Lukács re-emphasizes Georg Wilhelm Friedrich Hegel's influence on Karl Marx analyses the concept of class consciousness and attempts a philosophical justification of Bolshevism History and Class Consciousness which helped to create Western Marxism is the book for which Lukács is best known and some of his pronouncements have become famous Nevertheless History and Class Consciousness was condemned in the Soviet Union and Eastern Europe and Lukács later repudiated its ideas and came to believe that in it he had confused Hegel's concept of alienation with that of Marx It has been suggested that the concept of reification as employed in Martin Heidegger's Being and Time 1927 shows the strong influence of History

 Halfin, 2000-07-15 In conjunction with Studies of the Harriman Institute In this interdisciplinary and controversial work Igal
 Halfin looks at Marxist theory in a new light attempting to break down the divisions between history philosophy and literary
 theory His approach is methodological combining intellectual and social history to argue that if we are to take the Bolshevik
 revolutionary experiment seriously we have to examine carefully the ideological presupposition of both communist
 ideological texts and the archival documents that social historians believe truly reflect lived experience in order to see what
 effects these texts had on reality Igal Halfin aims to turn Marxism class and consciousness from subjects of analysis to its
 objects From Darkness to Light begins by examining the Marxist philosophy of history as understood by the Russian
 revolutionary movement Halfin argues that the Soviet government took its cues to how it could bring about a classless
 society from a peculiar blending of eschatological thinking and modern techniques of power Halfin then offers a case study of
 the Bolshevik attempt in the 1920s to create the Communist New Man by amalgamating the characteristics of the intellectual
 and the worker in order to eradicate the petit bourgeois traits attributed by the regime to the pre revolutionary
 individualistic and decadent student Halfin s conclusions raise important questions about Marxist theory as it relates to class
 historical progress and communism itself His approach suggests that proletarianization should be understood not as a
 change in the social composition of the student body but as the introduction of the language of class into the universities
 Through the examination of the process of the literary construction of class identity Halfin concludes that the student class
 affiliation in the Soviet Union of the 1920s was not simply a matter of social origins but of students ability using a set of
 ritualized procedures to defend their claims to a working class identity Halfin s conclusions raise important questions about
 Marxist theory as it relates to class historical progress and communism itself
