## **Class Warfare In The Information Age:**

**Class Warfare in the Information Age** Michael Perelman, 1998 Mention of class struggle evokes images of a grimy age in which bygone captains of industry callously oppressed armies of overworked and underpaid proletarians This dark portrait of class conflict stands in sharp contrast with the glorious promise of an information age In *Class Warfare in the Information Age* Michael Perelman shows how class conflict continues to remain a contemporary issue He challenges the notion that with the help of the modern computer and telecommunication technologies we can look forward to life in a well educated society in which anybody with even a modicum of intelligence and discipline can enjoy a more than comfortable existence In a relatively jargon free economic and political analysis Perelman reveals how the efforts of business to profit from the sale of information will result in the reduction of access to information rather than an increase He demonstrates how the treatment of information as a commodity will cause it to be more regulated and less accessible In the future Perelman argues it will still be a class based privilege to access and afford information and the rights of individuals will disintegrate as the power of the corporate sector grows *Class Warfare in an Information Age* is a refreshingly critical work which forces readers to rethink the conventional hype surrounding the information superhighway

*Class Politics in the Information Age* Donald Clark Hodges, 2000 *Class Politics in the Information Age* uncovers the origins development aims means and moral and political hypocrisy of the new class of professionals In line with a broad consensus that expertise has replaced capital as the decisive asset in the informational economy Hodges asserts that professionals have replaced capitalists as the premier exploiting class The dictatorship of the proletariat predicted by Marx is the United States a dictatorship of experts **BOOK JACKET**

*Reading Marx in the Information Age* Christian Fuchs, 2015-10-23 Renowned Marxist scholar and critical media theorist Christian Fuchs provides a thorough chapter by chapter introduction to *Capital* Volume 1 that assists readers in making sense of Karl Marx's most important and groundbreaking work in the information age exploring Marx's key concepts through the lens of media and communication studies via contemporary phenomena like the Internet digital labour social media the media industries and digital class struggles Through a range of international current day examples Fuchs emphasises the continued importance of Marx and his work in a time when transnational media companies like Amazon Google and Facebook play an increasingly important role in global capitalism Discussion questions and exercises at the end of each chapter help readers to further apply Marx's work to a modern day context

**National Security in the Information Age**, 1996

*The Politics of Immunity* Mark Neocleous, 2022-04-05 The violence and destruction hiding behind the obsession with immunity Our contemporary political condition is obsessed with immunity The immunity of bodies and the body politic personal immunity and herd immunity how to immunize the social system against breakdown The obsession intensifies with every new crisis and the mobilization of yet more powers of war and police from quarantine to border closures and from vaccination certificates to immunological surveillance Engaging four key concepts with enormous cultural weight *Cell Self*

System and Sovereignty Politics of Immunity moves from philosophical biology to intellectual history and from critical theory to psychoanalysis to expose the politics underpinning the way immunity is imagined At the heart of this imagination is the way security has come to dominate the whole realm of human experience From biological cell to political subject and from physiological system to the social body immunity folds into security just as security folds into immunity The book thus opens into a critique of the violence of security and spells out immunity s tendency towards self destruction and death immunity like security can turn its aggression inwards into the autoimmune disorder Wide ranging and polemical Politics of Immunity lays down a major challenge to the ways in which the immunity of the self and the social are imagined *Global politics in the information age* Mark J. Lacy, Peter Wilkin, 2024-07-30 *Global politics in the information age* available in paperback for the first time presents a provocative and wide ranging introduction to the notion that information technologies are creating new formations of power control and resistance across the planet The essays ranging from the language used by the Bush administration to shape the war on terror the attempts to control the circulation of informational products the strategies of media management deployed to shape how the war in Iraq during 2003 was presented in the public sphere through to the attempts to brand economic globalisation and strategies of resistance developed by the anti globalisation movement unearth the new transformations that are unfolding in the twenty first century This collection of essays brings together academics working across the social sciences from International Relations Political Economy Sociology and Media Studies to provide the reader with a number of different perspectives on the way that flows of images capital ideologies and informational goods are creating global spaces of control and resistance The book seeks to rethink approaches to global politics that see information society as closing down spaces of resistance while at the same time exploring the new formations of power that informational society is making possible The book offers clearly explained theoretical insight into the debates that are shaping discussion on global politics and information society with case studies that will be of interest to the student seeking to make sense of the changes that are unfolding The Emerging Democratic Majority John B. Judis, Ruy Teixeira, 2004-02-10 ONE OF THE ECONOMIST S BEST BOOKS OF THE YEAR AND A WINNER OF THE WASHINGTON MONTHLY S ANNUAL POLITICAL BOOK AWARD Political experts John B Judis and Ruy Teixeira convincingly use hard data demographic geographic economic and political to forecast the dawn of a new progressive era In the 1960s Kevin Phillips battling conventional wisdom correctly foretold the dawn of a new conservative era His book *The Emerging Republican Majority* became an indispensable guide for all those attempting to understand political change through the 1970s and 1980s At the beginning of the twenty first century with the country in Republican hands *The Emerging Democratic Majority* is the indispensable guide to this era In five well researched chapters and a new afterword covering the 2002 elections Judis and Teixeira show how the most dynamic and fastest growing areas of the country are cultivating a new wave of Democratic voters who embrace what the authors call progressive centrism and take umbrage at Republican demands to privatize social security ban abortion and cut back

environmental regulations As the GOP continues to be dominated by neoconservatives the religious right and corporate influence this is an essential volume for all those discontented with their narrow agenda and a clarion call for a new political order

**The State of Copyright** Debora Halbert, 2014-02-05 This book seeks to make an intervention into the ongoing debate about the scope and intensity of global copyright laws While mapping out the primary actors in the context of globalization and the modern political economy of information ownership the argument is made that alternatives to further expansion of copyright are necessary By examining the multiple and competing interests in creating the legal regime of copyright law this book attempts to map the political economy of copyright in the information age critique the concentration of ownership that is intrinsic in the status quo and provide an assessment of the state of the contemporary global copyright landscape and its futures It draws upon the current narratives of copyright as produced by corporate government and political actors and frames these narratives as language games within a global political project to define how information and culture will be shared and exchanged in the future The text problematizes the relationship of the state to culture comments on the global flows of culture and critiques the regulatory apparatus that is in place to commodify culture and align it with the contemporary nation state In the end the possibility of non commodified and more open futures are explored The State of Copyright will be of particular interest for students and scholars of international political economy law political science anthropology sociology cultural studies library sciences and communication studies It also will appeal to a growing popular audience that has taken an interest in the issues of copyright

**Rereading Marx in the Age of Digital Capitalism** Christian Fuchs, 2019-10-20 The end of history has not taken place Ideological and economic crisis and the status quo of neoliberal capitalism since 2008 demand a renewed engagement with Marx But if we are to effectively resist capitalism we must truly understand Marx Marxism today must theorise how communication technologies media representation and digitalisation have come to define contemporary capitalism There is an urgent need for critical Marxian inspired knowledge as a foundation for changing the world and the way we communicate from digital capitalism towards communicative socialism and digital communism Rereading Marx in the Age of Digital Capitalism does exactly this Delving into Marx's most influential works such as Capital The Grundrisse Economic and Philosophic Manuscripts The German Ideology and The Communist Manifesto Christian Fuchs draws out Marx's concepts of machinery technology communication and ideology all of which anticipate major themes of the digital age A concise and coherent work of Marxist media and communication theory the book ultimately demonstrates the relevance of Marx to an age of digital and communicative capitalism

**Sociology in the Age of the Internet** Allison Cavanagh, 2007-04-16 In recent years there has been a large

and diverse body of writing from scholars in the social sciences who have been studying changes brought about by new communication technologies in general and the Internet in particular The question of how people behave interact and organize themselves in relation to this form of communication has been given added prominence by developments within new social theory especially in relation to the novelty of contemporary social formations and the importance of mass communications to this changed order For the student new to the study of technology and society there are a bewildering array of claims and counter claims representing a spectrum of theoretical methodological and critical sensibilities in relation to the Internet In this new book Allison Cavanagh evaluates the work in this area by Investigating the novelty of the Internet and setting the Internet in the context of communication histories Evaluating the extent and rate of change through a synthesis of the available empirical literature Providing a key to understanding the changes identified through an evaluation of the utility of new social theory Sociology in the Age of the Internet is essential reading for academics and students with an interest in the relationship between the internet and society

**A Normative Theory of the Information Society** Alistair S. Duff, 2012-03-12 There is a clear need for a systematic integrative and rigorous normative theory of the information society In this book Duff offers a prescriptive theory to help to guide the academic and policy communities as they debate the future shape of emerging post industrial information based societies He argues that information policy needs to become anchored in a left liberal philosophy which foregrounds a feasible permutation of the core ideals of freedom equality and brotherhood The information society if it is to be worth having at all cannot be allowed to be largely the outcome of the free play of market forces and technological determinism The social structure including the information economy must be subjected to a regulatory axiological system as explicated by some leading proponents of social democracy This text will be of interest to scholars and students at the cutting edge of information studies journalism and media computer science sociology politics philosophy management and law
