Classics in Modernist Translation Miranda Hickman, Lynn Kozak, 2019-02-07 This volume sheds new light on a wealth of early 20th century engagement with literature of Graeco Roman antiquity that significantly shaped the work of anglophone literary modernism The essays spotlight translation a concept the modernists themselves used to reckon with the Classics and to denote a range of different kinds of reception from more literal to more liberal translation work as well as forms of what contemporary reception studies would term adaptation refiguration and intervention As the volume's essays reveal modernist translations of Classical texts crucially informed the innovations of many modernists and often themselves constituted modernist literary projects Thus the volume responds to gaps in both Classical reception and Modernist studies essays treat a comparatively understudied area in Classical reception by reviving work in a subfield of Modernist studies relatively inactive in recent decades but enjoying renewed attention through the recent work of contributors to this volume The volume's essays address work significantly informed by Classical materials including Homer Sophocles Euripides Sappho Ovid and Propertius and approach a range of modernist writers Pound and H D among the modernists best known for work engaging the Classics as well as Cummings Eliot Joyce Laura Riding and Yeats **Routledge Handbook of Post Classical**

John Patrick Sullivan, 1994 In recent decades the study of literature in Europe and the Americas has been profoundly influenced by modern critical theory in its various forms whether Structuralism or Deconstructionism Hermeneutics Reader Response Theory or Rezeptionsästhetik Semiotics or Narratology Marxist feminist neo historical psychoanalytical or other perspectives Whilst the value and validity of such approaches to literature is still a matter of some dispute not least among classical scholars they have had a substantial impact on the study both of classical literatures and of the mentalité of Greece and Rome In an attempt to clarify issues in the debate the eleven contributors to this volume were asked to produce a representative collection of essays to illustrate the applicability of some of the new approaches to Greek and Latin authors or literary forms and problems The scope of the volume was deliberately limited to literary investigation broadly construed of Greek and Roman authors Broader areas of the history and culture of the ancient world impinge in the essays but are not their central focus The volume also contains a separate bibliography offering for the first time a complete bibliography of classical studies which incorporate modern critical theory *Catalog of Copyright Entries.
