Montgomery, Mark Lubell, 2018 Politics is intuitively about relationships but until recently the network perspective has not been a dominant part of the methodological paradigm that political scientists use to study politics This volume is a foundational statement about networks in the study of politics Electoral College Reform Gary Bugh, 2016-04-29 The United States has not updated the Electoral College system since the Twelfth Amendment was ratified in 1804 despite public opinion polls showing a majority of Americans are in favor of changing or outright abolishing it So why hasn't the United States reformed this system Electoral College Reform brings together new essays examining all aspects of this crucial debate including the reasons for reform the issues surrounding a constitutional amendment the effect of the Electoral College on political campaigns and the possibilities for extra constitutional avenues to change The authors consider both the Federalists vision of balanced representation and a more democratic and equality based ideal These competing

Emmett,Jeff E. Biddle,Warren J. Samuels,2009-06-09 Contains refereed articles on contrasting relational conceptions of the individual in economics This book also covers the development of Adam Smith s style of lecturing a comparison of problems encountered in the historian s work as editor based upon editing Harrod s papers and Haberler s Prosperity and Depression **Deviant Behavior** Charles McCaghy,Timothy Capron,J.D. to switch from market style bargaining to a behaviour more appropriate for the political sphere where the proper way of reaching agreement is by convincing others using public spirited arguments Daniel Naurin has conducted the first comprehensive analysis and test of the theory of publicity s civilising effect The theory is tested on business lobbyists presumably the most market oriented actors in politics acting on different arenas characterised by varying degrees of transparency and publicity Innovative scenario interviews with lobbying consultants in Brussels and in Stockholm are compared and contrasted with a unique sample of previously confidential lobbying letters The results are both disappointing and encouraging to deliberative democratic theorists While the positive force of publicity seems to be overrated it is found that even behind closed doors business lobbyists must adapt to the norms of the forum
