Classroom Collaboration:

   Classroom Collaboration Phillida Salmon,Hilary Claire,2020-03-09 Originally published in 1984 this is an account of a two year study of four comprehensive school classrooms where teachers were fostering collaborative learning methods The authors draw on their joint knowledge and experience as a psychologist and a teacher to give an insight into pupils perceptions of their schooling and a dynamic analysis of the process of education that they experienced Working on the premise that successful collaboration demands common goals and mutual understanding the author observed pupils at work transcribed their talk and carried out interviews with both pupils and their teachers They show how individual children can support and learn from each other document the social and psychological features underlying the use or non use of collaboration and take the teachers own frames of reference as a standpoint in evaluating success The authors findings were intended to encourage teachers to move away from the traditional view of education as the transmission of knowledge to passive pupils Social relationships within the classroom can potentially be not merely a source of disruption but the basis of learning itself This possibility is particularly significant in the context of inner city schools where there is often mutual mistrust and hostility across lines of race class gender or ability   *Facilitating Teacher Partnerships for Cross-Classroom Collaboration* Ben Hazzard,2008   *Teacher Collaboration and Talk in Multilingual Classrooms* Angela Creese,2005-01-01 This volume looks at the interactions of collaborating teachers in multilingual classrooms and how these impact on what counts as knowledge in the secondary school classroom It also looks at how policy statements and ideologies around multilingualism position teachers and learners in particular ways A linguistic ethnographic approach is taken in the study which considers the discourses of whole class and small group teaching and learning Chapters consider the relation between different languages different pedagogues and different teacher identities in the secondary school classroom The book documents how a policy of inclusion is played out in practice   **Teacher Collaboration for Professional Learning** Cynthia A.
