PAIS Subject Headings Public Affairs Information Service,1990 **Berkeley Journal of Sociology** ,1980 *Social Stratification in an Aging Society with Low Fertility* Sawako Shirahase,2022-08-31 This edited book empirically discusses stratification in contemporary Japanese society It is unique for its examination of social inequality in relation to declining fertility and an aging population Japan is the most aged society in the world according to the Statistics Bureau of Japan people who are aged 65 and above comprised 29.1% of the country's total population in 2021 Meanwhile the fertility rate has continuously declined since the mid 1970s Japan experienced a dramatic change in its demographic structure in a short period of time Such fast change could be a major factor that generated social stratification In her industrialization Japan was thought to share a pattern of social stratification similar to that of developed European and North American countries but with a low degree of socio economic inequality and a high degree of homogeneity There is no clear support for this description of Japan although the country does share a pattern and degree of social stratification similar to that observed in Europe and North America The social stratification theory has been developed in close relationship to the labor market however it is necessary to further examine the social stratification of very aged societies in which a substantial number of the population namely retired persons no longer have any ties to the labor market In this book the contributors explore the pattern of social stratification at three life stages young middle aged and elderly Included are discussions of various aspects of stratification such as education work wealth marriage family gender generation and social attitudes **Berkeley Journal of Sociology** ,2012 **Tides and Currents in Police Theories** Elke Devroe,Paul Ponsaers,Lodewijk Gunther Moor,Jack Greene,Lieselot Bisschop,Layla Skinns,Antoinette Verhage,Matthew Bacon,2012 This volume of the Journal of Police Studies reflects on theoretical developments concerning police The book is focused on a paper by Jack R Greene titled The Tides and Currents Eddies and Whirlpools and Riptides of Modern Policing Connecting Thoughts The paper was the outcome of a seminar organized at Ghent University in the framework of the working group on policing of the European Society of Criminology ESC held in September 2010 Greene's contribution refers to original background papers which were published earlier This book pushes the analysis further starting from the observations Greene makes in his provocative roundup The book's themes include collective action and crime policing and social democracy the role of the law in policing violence and police the militarization and demilitarization of police politics and policing the transformation of policing the evaluation of research methodology buzz words and basics in policing the history of theory the emerging new policing role and its implications police education and training the erosion of community policing the complexity of policing dirty crime global crime and policing the central tasks of the police democratic policing Review and Synthesis of Research on Women in the World of Work Mary Bach Kievit,1972 **Routledge Handbook of the Sociology of Higher Education** James E. Côté,2016-06-03 This is the first handbook to cover the sociological approaches to higher education It is timely because of

global expansions of mass higher educational systems especially as these systems come under scrutiny by a variety of stakeholders Questions are being raised about the value of traditional pedagogies along with calls for efficiency accountability and cost reduction but above all job training Within this neoliberal context each chapter examines different sociological aspects of and debates about educational institutions as status conferring organizations with myriad positional characteristics experiences and outcomes Many current debates concern the legitimacy of the statuses conferred including the continuing debate regarding the role of universities in legitimating social class reproduction as well as more recent concerns about standards in mass systems This handbook puts these issues and debates in focus in ways that will be of interest to a variety of stakeholders within academia as well as in policy circles

,1989 **Social Sciences Index** ,2001 **Changing Clothes in China** Antonia Finnane,2023-05-30 Historians have long regarded fashion as something peculiarly Western In this surprising sumptuously illustrated book Antonia Finnane

challenges this view which she argues is based on nineteenth and twentieth century representations of Chinese dress as traditional and unchanging. Fashions she shows were part of Chinese life in the late imperial era even if a fashion industry was not then apparent. In the early twentieth century the key features of modern fashion became evident particularly in Shanghai and rapidly changing dress styles showed the effects. The volatility of Chinese dress throughout the twentieth century matched vicissitudes in national politics. Finnane describes in detail how the close fitting jacket and high collar of the 1911 Revolutionary period, the skirt and jacket blouse of the May Fourth era and the military style popular in the Cultural Revolution gave way finally to the variegated globalized wardrobe of today. She brilliantly connects China's modernization and global visibility with changes in dress offering a vivid portrait of the complex subtle and sometimes contradictory ways the people of China have worn their nation on their backs. *Handbook on Migration and Welfare* Crepaz, Markus M.L., 2022-01-14 Bringing together prominent scholars in the field this Handbook provides an interdisciplinary exploration of the complex interrelationship between migration and welfare. Chapters further examine the effects of emigration on sending societies exploring issues such as the impact of remittances, diasporas and skill deterioration as a result of human capital flight on capacity building and on economic and political development more generally. [Policing during the COVID-19 Pandemic](#) Sanja Kutnjak Ivkovich, Marijana Kotlaja, Jon Maskály, Peter Neyroud, 2024-04-10 Providing a global perspective on police adaptations to the COVID 19 pandemic this book explores the extent of police organizational and operational changes in a number of countries as diverse as Brazil, China, South Africa, South Korea, the Philippines, Russia, the United Kingdom and the United States. Bringing together a range of international experts this book reflects on the changes in the broader social environment during the pandemic, examining the contours of police operational and organizational changes across several countries, analyzes the police enforcement of the government COVID 19 rules and regulations, explores the factors related to the COVID 19 effects on police officer wellness and safety and studies police administrator, police officer and citizen views about the potential consequences of organizational and operational changes on the interpersonal relations within police agencies and police community partnerships. *Policing During the COVID 19 Pandemic* is essential reading for scholars and practitioners interested in exploring the police organizational adaptations particularly in the times of emergencies and the societal, cultural and legal impacts of such adaptations. [Handbook of the Sociology of Medical Education](#) Caragh Brosnan, Bryan S. Turner, 2009-09-10 The Handbook of the Sociology of Medical Education provides a contemporary introduction to this classic area of sociology by examining the social origin and implications of the epistemological, organizational and demographic challenges facing medical education in the twenty first century. Beginning with reflections on the historical and theoretical foundations of the sociology of medical education the collection then focuses on current issues affecting medical students, the profession and the faculty before exploring medical education in different national contexts. Leading sociologists analyze the intersection of medical education and social structures such as gender, ethnicity

and disability the effect of changes in medical practice such as the emergence of evidence based medicine on medical education and the ongoing debates surrounding the form and content of medical curricula By examining applied problems within a framework which draws from social theorists such as Pierre Bourdieu this new collection suggests future directions for the sociological study of medical education and for medical education itself
