*Berkeley's Renovation of Philosophy* Gavin Ardley, 2012-12-06 In this work I have endeavoured to see Berkeley in his contemporary setting On the principle that philosophy is ultimately about men not about abstract problems I have tried to see Berkeley the philosopher as an expression of Berkeley the man When this is done what is perennial in the philosophy may be discerned in and through what is local and temporal Berkeley then emerges as a pioneer reformer not so much an innovator as a renovator one who set out to rescue phi losophy from the enthusiasms of the preceding age one who strove to seat philosophy once more on the broad human and common sense foundations laid by Plato and Aristotle Critical studies of some of the more striking of Berkeley s epistemo logical arguments are legion They commenced with the young Berke ley s first appearance in print and have continued to this day But whether they take the form of professions of support for Berkeley or of bald refutations of Berkeley s supposed

fallacies or whether like the contemporary analytical studies of Moore Warnock and Austin they are subtle exposures of alleged deeply concealed logical muddles they all tend to share one common characteristic they select and abstract from the totality of Berkeley and miss the robust simplicity and universality of Berkeley's intentions It is the intentions which control the whole and give the right perspective in which to view the various items *Berkeley* Geoffrey James Warnock,1992

Berkeley is one of the most influential and yet most misunderstood of 18th century philosophers In this new revised edition of his classic introduction G J Warnock examines all Berkeley's major philosophical works and discusses his most original and interesting contributions to questions still debated by philosophers today The aim of the book is to help the reader learn not so much about Berkeley but rather through Berkeley something about philosophy itself *The Use of Philosophy (Routledge Revivals)* John Muirhead,2013-05-13 First published in 1928 this book reproduces the lectures and addresses that John Henry Muirhead gave on various occasions during the two and a half years he spent as Lecturer of Philosophy on the Mills Foundation at the University of California USA The different chapters look at the meaning and general place of Philosophy as a subject of study and the application of its leading conceptions to different areas of modern life including science and politics The final chapters however present two short talks of a different nature which were addressed to Scottish countrymen gathered on foreign shores This book outlines Muirhead's philosophical thoughts and conclusions to which he devoted his life *The Andover Review* ,1891

**The Revival of Scholastic Philosophy in the Nineteenth Century** Joseph Louis Perrier,1909

**Selections from Berkeley** George Berkeley,1891

**The Cambridge Platonists in Philosophical Context** G.A. Rogers,J.-M. Vienne,Y.C. Zarka,2013-03-14 The Cambridge Platonists were defenders of tolerance in the political as well as the moral sphere they held that practical judgement came down in the last instance to individual conscience and they laid the foundations of our modern conceptions of conscience and liberty But at the same time they maintained the existence of eternal truths and of a Good in itself identical with Truth and Being refusing to admit that freedom of conscience implied moral relativism They

were critics of dogmatism and of the sectarian notion of enthusiasm as a source of illumination on the grounds that both were disruptive of social harmony they pleaded the cause of reason in the hope that it could become the foundation of all human knowledge Yet for all that they maintained that a certain sort of mystical illumination lay at the heart of all true thought and that human reason had validity only in virtue of its divine origin They debated with Descartes and took a keen interest in his mechanism and his dualism they brought the atomistic theories of Democritus back into repute and they sought to provide a detailed account of the causality linking all phenomena

Contemporary East Asia and the Confucian Revival Jana S. Rošker, Nataša Visočnik, 2015-10-28 The so called Confucian revival which came to prominence at the end of the twentieth century and which is manifested in the philosophical stream of Modern Confucianism is one of the most significant elements within new Asian modernisation ideologies By providing new insights into the culturally conditioned structure of Asian societies this book contributes to the improvement of political economic and cultural relations between Western and East Asian countries Most classical Western modernisation theories have assumed that Confucianism would have to be abandoned if East Asia wanted to dev

Idealism Hector Davidson, Idealism as a philosophical doctrine holds that the mind and its

ideas are the primary reality shaping the material world rather than being shaped by it. This perspective challenges the materialist viewpoint that places physical matter at the foundation of existence. From ancient Greek philosophy to modern quantum theories, idealism has provided a profound framework for understanding reality, perception, and consciousness. Throughout history, idealism has offered a lens through which thinkers could explore the mysteries of existence. Plato's theory of forms, for instance, posited that the tangible world is a shadow of a higher, more real world of ideas. Similarly, German idealists such as Immanuel Kant, Johann Gottlieb Fichte, and Georg Wilhelm Friedrich Hegel expanded on these concepts, arguing that human perception actively constructs reality. These ideas have not only shaped philosophy but have also influenced disciplines ranging from art to science. At its core, idealism raises fundamental questions about the nature of reality: Is the external world independent of our consciousness, or does it exist only as a construct of the mind? Idealism asserts that our understanding of the universe is intrinsically tied to our subjective experiences, emphasizing that thought and consciousness are the building blocks of reality. This contrasts sharply with materialism, which contends that physical matter exists independently and is the source of all mental phenomena.

### **The Revival of Pragmatism** Morris

Dickstein, 1998-11-23. Although long considered the most distinctive American contribution to philosophy, pragmatism, with its problem-solving emphasis and its contingent view of truth, lost popularity in mid-century after the advent of World War II, the horror of the Holocaust, and the dawning of the Cold War. Since the 1960s, however, pragmatism in many guises has again gained prominence, finding congenial places to flourish within growing intellectual movements. This volume of new essays brings together leading philosophers, historians, legal scholars, social thinkers, and literary critics to examine the far-reaching effects of this revival. As the twenty-five intellectuals who take part in this discussion show, pragmatism has become a complex terrain on which a rich variety of contemporary debates have been played out. Contributors such as Richard Rorty, Stanley Cavell, Nancy Fraser, Robert Westbrook, Hilary Putnam, and Morris Dickstein trace pragmatism's cultural and intellectual evolution, consider its connection to democracy, and discuss its complex relationship to the work of Emerson, Nietzsche, and Wittgenstein. They show the influence of pragmatism on black intellectuals such as W. E. B. Du Bois, explore its view of poetic language, and debate its effects on social science, history, and jurisprudence. Also included are essays by critics of the revival, such as Alan Wolfe and John Patrick Diggins. The volume concludes with a response to the whole collection from Stanley Fish. Including an extensive bibliography, this interdisciplinary work provides an in-depth and broadly gauged introduction to pragmatism, one that will be crucial for understanding the shape of the transformations taking place in the American social and philosophical scene at the end of the twentieth century. Contributors: Richard Bernstein, David Bromwich, Ray Carney, Stanley Cavell, Morris Dickstein, John Patrick Diggins, Stanley Fish, Nancy Fraser, Thomas C. Grey, Giles Gunn, Hans Joas, James T. Kloppenberg, David Luban, Louis Menand, Sidney Morgenbesser, Richard Poirier, Richard A. Posner, Ross Posnock, Hilary Putnam, Ruth Anna Putnam, Richard Rorty, Michel Rosenfeld, Richard H. Weisberg, Robert B. Westbrook, Alan Wolfe.
