Berlin A Century Of Change:

Berlin's Forgotten Future Matt Erlin, 2020-05-01 Through an analysis of the works of the Berlin Aufklärer Friedrich Gedike Friedrich Nicolai G E Lessing and Moses Mendelssohn Matt Erlin shows how the rapid changes occurring in Prussia's newly minted metropolis challenged these intellectuals to engage in precisely the kind of nuanced thinking about history that has come to be seen as characteristic of the German Enlightenment. The author's demonstration of Berlin's historical theoretical significance also provides perspective on the larger question of the city's impact on eighteenth century German culture. Challenging the widespread idea that German intellectuals were anti-urban, the study reveals the extent to which urban sociability came to be seen by some as a problematic but crucial factor in the realization of their Enlightenment aims.

Turkey, a Century of Change in State and Society Bayram Balci, Nicolas Monceau, 2023-06-01 The Republic of Turkey celebrates the centenary of its proclamation in 2023. Founded on the ruins of the Ottoman Empire, one of the world's greatest empires both in terms of its geographical extent and its longevity, Republican Turkey has gone through a century of profound and constant changes and transformations from politics to society, economy to religion or culture to history. These changes have been produced by inner and foreign policies carried out and implemented by the country's leaders from Atatürk the founder of modern Turkey to Recep Tayyip Erdoğan the current Turkish President in 2023, but also under the influence of the regional and international context. This collective work aims to take stock of the great achievements of the Turkish republican project. It attempts to draw a general presentation of the evolution of contemporary Turkey in six main areas which constitute six major issues for the country: the general political evolution of Turkey focusing on the issue of citizenship, the transformations in the Turkish economy through a political economy analysis, the evolution of the relationship between religion, state and society, Turkey's nation building and the Kurdish question which still seeks a solution, the changes in Turkish foreign policy focusing on the relationship between Turkey and the West, the relationship between Turkey and Europe caught between the model of civilization for the republican regime and the prospects of accession to the European Union. Several focus points also concentrate on specific subjects such as the Alevis issue, the Cyprus issue or the Turkish soft power with an accent on Africa.

Isaiah Berlin in the Twenty-First Century George Crowder, 2025-06-20 Isaiah Berlin is well known as a defender of liberal democracy in the Cold War. In this path-breaking study, George Crowder argues that Berlin's ideas have application beyond their original context to the problems of our own time. Focusing on three central themes: liberty, identity and value pluralism, Crowder presents a fresh interpretation of Berlin, exposing the misunderstandings of critics, especially those who ignore Berlin's pluralist foundation. Although genuine problems remain, these can be alleviated by revising and extending Berlin's view to construct an updated liberal pluralism. Together with Berlin's own arguments, liberal pluralism is then brought to bear on a range of current concerns including neoliberalism, identity politics, populism, international relations, religion, feminism, climate change and global pandemics. The resulting outlook is complex, realistic.

real geographic space in Europe symbolizing the ultimate evil and the power of redemption This volume offers a comprehensive examination of the city's image in American literature from 1840 to the present Tracing both a history of Berlin and of American culture through the ways the city has been narrated across three centuries by some 100 authors through 145 novels short stories plays and poems *Tales of Berlin* presents a composite landscape not only of the German capital but of shifting subtexts in American society which have contextualized its meaning for Americans in the past and continue to do so today

Economic Change and the National Question in Twentieth-Century Europe Alice Teichova, Herbert Matis, Jaroslav Pátek, 2000-11-30 The authors in this collection of essays address the largely neglected but significant economic aspects of the national question in its historical context during the course of the twentieth century There exists a large gap in our understanding of the historical relationship between the national question and economic change Above all there is insufficient knowledge about the economic dimension of the historical experience with regard to the former multi-national states such as the Soviet Union Yugoslavia or Czechoslovakia and equally too little is known about the economic component of national tensions and conflicts in bilingual Belgium or Finland or the multilingual Spain or Switzerland At the same time as emphasis is placed on the complex relationships between the economy and society in individual European countries questions of state identity language religion and racism as instruments of economic furtherance are at the centre of the contributors' attention
