Berlin In Photographien Des 19 Jhrhunderts:

Nineteenth-Century Photographs and Architecture Micheline Nilsen, 2017-07-05 Eschewing the limiting idea that nineteenth century architecture photography merely reflects functionality the objective of this collection is to reflect the aesthetic intellectual and cultural concerns of the time The essays hold appeal for social and cultural historians as well as those with an interest in the fields of art history urban geography history of travel and tourism Nineteenth century photographers captured what could be seen and what they wanted to be seen Their images informed of exploration progress heritage and destruction Architecture was a staple subject for the first generation of photographers as it patiently tolerated the long exposures of the early processes During its formative decades photography responded to evolutionary cultural forces of market and artistic production Photographs of architecture reflected a specific political or social context modulated through individual points of view For this reason the examination of each photographic image as a primary visual document and an aesthetic object rather than a technical milestone on a chronological trajectory affords a richer multi faceted approach to the extensive and complex corpus of photographs taken by photographers all over the world This project acknowledges the importance of technique in the early decades of photography but focuses on the thematic content of the material It places the photography of architecture in an international context under the contemporary critical lens sharpened by theoretical and cultural examinations of the topic

Die wissenschaftlichen Vereine und Gesellschaften Deutschlands im 19. Jahrh Johannes IX Müller, 1887 **First Exposures** Steffen Siegel, 2017-08-01

An exact date for the invention of photography is evasive Scientists and amateurs alike were working on a variety of photographic processes for much of the early nineteenth century Thus most historians refer to the year 1839 as the first year of photography not because the sensational new medium was invented then but because that is the year it was introduced to the world After more than 175 years and for the first time in English *First Exposures Writings from the Beginning of Photography* brings together more than 130 primary sources from that very year 1839 subdivided into ten chapters and accompanied by fifty three images of significant visual and historical importance This is an astonishing work of discovery selection and thanks to Steffen Siegel s introductory texts notes and afterword elucidation The range of material is impressive not only all the chemical and technological details of the various processes but also contracts speeches correspondence of every kind arguments parodies satires eulogies denunciations journals and even some poems Revealing through firsthand accounts the competition the rivalries and the parallels among the various practitioners and theorists this book provides an unprecedented way to understand how the early discourse around photographic techniques and processes transcended national boundaries and interconnected across Europe and the United States **Spuren der altägyptischen Gesellschaft** Richard

Bußmann, Ingelore Hafemann, Robert Schiestl, Daniel A. Werning, 2022-11-21 *Die Hinterlassenschaften der Gesellschaft des Alten gyptens reichen von monumentalen Pyramidenanlagen bis zu mikroskopischen Spuren menschlicher Aktivit ten von Felsinschriften bis zu Romanen Wie l sst sich das alles sinnvoll in Bezug stellen und welche Methoden und Fragestellungen sind daf r notwendig* Das Buch versammelt 28 Beitr ge zu Ehren Stephan J Seidlmayers die versuchen darauf aktuelle Antworten zu geben **The Politics of Nature and Science in Southern Africa** Maano Ramutsindela, Giorgio

Miescher, Melanie Boehi, 2016-09-12 This book brings together recent and ongoing empirical studies to examine two relational kinds of politics namely the politics of nature i e how nature conservation projects are sites on which power relations play out and the politics of the scientific study of nature These are discussed in their historical and present contexts and at specific sites on which particular human environment relations are forged or contested This spatio temporal juxtaposition is lacking in current research on political ecology while the politics of science appears marginal to critical scholarship on social nature Specifically the book examines power relations in nature related activities demonstrates conditions under which nature and science are politicised and also accounts for political interests and struggles over nature in its various forms The ecological socio political and economic dimensions of nature cannot be ignored when dealing with

present day environmental issues Nature conservation regulations are concerned with the management of flora and fauna as much as with humans Various chapters in the book pay attention to the ways in which nature science and politics are interrelated and also co constitutive of each other They highlight that power relations are naturalised through science and science related institutions and projects such as museums botanical gardens wetlands parks and nature reserves

Artists and Society in Germany, 1850-1914 Robin Lenman, 1997 In times past everyday business might mean making a trip to the pawnbroker giving a loan to a trusted friend of selling off a coat all to make ends meet Both women and men engaged in this daily budgeting but women's roles were especially important in achieving some level of comfort and avoiding penury In some communities the daily practices in place in the seventeenth century persisted into the twentieth whilst other groups adopted new ways such as using numbers to chart domestic affairs and turning to the savings banks that appeared in the nineteenth century These strategies promised respectability and greater access to new consumer goods better clothes and finer furnishings accompanied a newly disciplined behaviour Therefore in the material world of the past and in the changing habits of earlier generations lie crucial turning points This book explores these previously under researched patterns and practices that gave shape to modern consumer society 1979-1990 Henryk Sawoniak, 2012-02-14 No detailed description available for 1979 1990 *Advertising Empire* David Ciarlo, 2011-01-03 David Ciarlo offers an innovative visual history of each of these transformations Tracing commercial imagery across different products and media Ciarlo shows how and why the African native had emerged by 1900 to become a familiar figure in the German landscape selling everything from soap to shirts to coffee The racialization of black figures first associated with the American minstrel shows that toured Germany found ever greater purchase in German advertising up to and after 1905 when Germany waged war against the Herero in Southwest Africa The new reach of advertising not only expanded the domestic audience for German colonialism but transformed colonialism's political and cultural meaning as well as by infusing it with a simplified racial cast
