mobile entertainment issues and trends Classes and Cultures Ross McKibbin,1998 In this book McKibbin investigates the ways in which class culture characterised English society and intruded every aspect of life during the period 1918-1951. He also shows the increasing effects of Americanisation on this culture **British Female Emigration Societies and the New World, 1860-1914** Marie Ruiz,2017-07-11 This book focuses on the departure of Britain's surplus women to Australia and New Zealand organised by Victorian British female emigration societies. Starting with an analysis of the surplus of women, it then explores the philanthropic nature of the organisations: the Female Middle Class Emigration Society, the Women's Emigration Society, the British Women's Emigration Association and the Church Emigration Society. The study of the strict selection of distressed gentlewomen emigrants is followed by an analysis of their marketing value and an appraisal of women's imperialism. Finally, this work shows that the female emigrants under study partook in the consolidation of the colonial middle class *Gaunt's Best of British* Jon Gaunt,2008-12-02 *Gaunt's Best of British* is one man's cheerful look at what's right and what's wrong with his country and a brilliantly entertaining guide to how Britain can be Great again. Jon Gaunt embarks on a tour of the best bits of this green and pleasant land, celebrating all things British. His forthright tribute is an aptly eclectic collection covering everything from cricket, foxhunting and the FA Cup to great inventions like the Spitfire, the Mini and the miniskirt, and our unofficial national cuisine of fish and chips washed down with a cup of tea or a pint of real ale. Whether you live in Coventry or Cambridge, Liverpool or London, now is the time to join Gaunt and start shouting about this fantastic country and what makes it so Great **Coldplay , The Decline Effect** Dean Brooks,2023-01-31 A crisis is coming for everyone who uses math and science. For decades now, the classical model of probability, the indifference principle, and the Gaussian distribution has been breaking down, revealing its limitations in fields from economics to epidemiology. Now a new approach has revealed the underlying non-classical principle behind all these anomalous laws: Pareto's law of elite incomes, Zipf's law of word frequencies, Lotka's law of scientific publications, Kleiber's law of metabolic rates, the Clausewitz-Dupuy law of combat friction, Moore's law of computing costs, the Wright-Henderson cost law, Weibull's law of electronics failures, the Flynn Effect in IQ scores, Benford's law of digit frequencies, Farr's law of epidemics, Hubbell's neutral theory of biodiversity, Rogers' law of innovation classes, Wilson's law of island biogeography, Smeed's law of traffic fatalities. The general law behind all these particular laws and countless others is the decline effect. As a system ages or grows in size, the rules of probability subtly change. Entropy increases, rare items become rarer, and average performance measures decline. The human meaning of a decline may be positive (decreasing costs, falling epidemic mortality) or negative (lower customer loyalty, decreasing efficiency), but the mathematical pattern is always the same. The implications are enormous, as these examples show. All epidemic diseases decline in infectiousness and in lethality. HIV/AIDS went from a highly infectious, 95 percent fatal disease to a survivable condition with a latency of decades. COVID-19 went from a death rate of 7 percent in early 2020 to under 2 percent in 2022. Hereditary dynasties around the world declined.
