The stadium sits elegantly on its site enhanced by the gentle curves of its spherical design The choice of the sphere Kurokawa says is an expression of abstract symbolism This spherical shape also enables the retractable portion to move along its curved surface The use of Teflon membrane panels with 25 percent light permeability obviates the need for artificial lighting during daylight hours In order for the pitch to get proper exposure to sunlight the elliptical roof opening runs along the north south axis A main arch with perpendicular horizontal sub members follows the elliptical shape of the roof opening Between the roof and the spectator seating below the surrounding mountains can be seen from a slender ventilation clearstorey set just below the roof line This slit of space is designed to create a feeling of openness inside the stadium Since the original design an idea emerged for a moving camera to be located on the main beam to deliver special dynamic images for television audiences around the world

Wefing, Peichl/Achatz/Schumer, 2002-03-20 This volume shows the extension of one of Munich's most significant Art Nouveau buildings erected in 1901 by Richard Riemerschmid Bolles + Wilson Lars Lerup, Mirko Zardini, 2003 The Luxor is a significant milestone in the Suvre of Bolles Wilson As a major public building it pursues themes first tested in the 1993 new city library in M nster a characteristic plan form an intervention that redefines its context and a synthesis of the abstract with a spatial warmth an ambience that communicates directly and subliminally to a wide audience base The architecture of this German Australian duo does not fit easily into conventional architectural genres Smallness intimacy and precise details characterise their work just like an increasing number of urban interventions that have made a major impact on cities like Hengelo The Hague or Magdeburg The design of the Luxor Theatre the process of its realisation Bolles Wilson's surrounding

Hamm, 2003 Munich is lucky A city that is at the top of the popularity scale needs nothing more than attractive building land There has been a great deal more of this in recent years since industry and commerce have moved off to the periphery barracks have been closed the goods station and the airport have been relocated and the exhibition centre has gone to the empty site in Riem that was freed up This meant that the Theresienhohe became an urban development area as well Trade exhibition halls were still being built around the historic parkland established as an exhibition park around the turn of the century in the 1980s In 1997 an architectural competition was looking for ideas for an inner city dense mixture of use for culture as a central for housing and commerce The prize winning suggestion by Steidle Partner became the basis for further planning The convincing feature was the instinctive sureness with which the practice imposed scale and urban character of the surrounded quarters on to the former exhibition centre site The development proposal which could be interpreted in many ways but proposed an easily remembered line is continued in the architecture with its sets of buildings staggered against each other The first buildings to be completed included the KPMG head office which emerged from a workshop procedure the ground plan for the complex uses a meander pattern completed at one corner by a high rise residential building which means that the quarter principle of

reversible residential and office use is demonstrated within a single block A central entrance courtyard provides access to the office block but there is access from the outside elsewhere as well should the function ever be changed The building rises to seven storeys and is pleasingly disturbing because of the lively colours on its facade of glazed ceramic panels The even staccato of the narrow windows forms a contrast with this Both together give the architecture the appeal of a mysterious musical instrument certainly intended for very young rhythmic music Book jacket **Export** Markus Kristan,2003 Was haben Otto Wagner Adolf Loos Josef Hoffmann Clemens Holzmeister Friedrich Kiesler Hans Hollein Gustav Peichl G nter Domenig und Baumschlager Eberle gemeinsam Sie bauten in Europa Im vergangenen Jahrhundert besonders in den letzten Jahrzehnten ist es gelungen Architektur von vsterreichischen Architekten zu einem besonderen Qualitdtslabel in Europa zu machen Oft gingen aus zahlreichen europdischen Wettbewerben vsterreichische Architekten mit ihren Projekten siegreich hervor Das Buch ermvglicht einen Blick auf die Entwicklung im zwanzigsten Jahrhundert und dokumentiert im Hauptteil die Jahre 1980 2002 Ein Ausblick auf erfolgreiche Projekte und k nftige Fertigstellungen weist den Weg in die Zukunft
