*"Bergmann's Team"* George G. Pinneo, 2004-03-02 Bergmann's Team continues Guy and Nita's effort to acquire a Human Team to assist Banderat and Striver engineers in diverting the comets threatening Earth. The core of their team, Guy, Nita, and the Twins demonstrate they can go EVA and perform well in space outside the Striver starship Dawn Star, surprising both Strivers and Banderat. They recruit NASA-trained astronauts to join them. The Team moves up to Terra House aboard the starship for the interim training before the comets reach Mars. Guy and the Twins rescue four young Banderat juveniles and put down a Banderat mutiny, freeing a captured Striver trooper, demonstrating Humans possess altruism and will fight when compelled. They augment their team and begin preparing Earth's governments for the oncoming comet storm. They make plans for post-comet business and plan for space tourism as one way to pay for routine access to orbital life and business.

*"Bergmann's Equestrian Venture,"* George G. Pinneo, 2005-07-18 Bergmann's Equestrian Venture is the 4th book in the nine-book series. Earth was spared the brunt of a comet-induced planet-wide winter by the Striver-led Banderat-implemented redirection of three comets. Bergmann's Team played an important part in that cometary redirection. Now the Team has been invited to move a small herd of horses to the planet Baldon. Banderat would like to ride. This venture is the first feat Guy hopes to execute in his long-term plans to forge an extraterrestrial Human presence. The interstellar trip aboard Climber, a first for Humans, is a prelude to their successful arrival at the city of Bandalu, where they help finish an equestrian resort. Nita's surprise is a shock to all the team: the first Human child to be born off Earth. A family of Sayen reveals their presence to Guy, Nita, Greg, and Raquel on the mountain slope above Highlands Resort. The presence of a hidden seventh sapient race sends shockwaves through the Concordat. *"BERGMANN'S COMET"* GEORGE G. PINNEO, 2004-08-24

Bergmann's Comet Bk 3 builds on the two previous books, *Batwing* (Bergmann's Commitment Bk 1) and *Bergmann's Team* (Bk 2), continuing the story of a trio of comets hurled out of the Oort Cloud threatening Earth's civilizations. Bergmann's small group assists Banderat and Striver vacuum grunts to divert the comets and minimize catastrophic terrestrial impact. Guy and Nita, Bergmann, join with a small group of ex-NASA astronauts to emplace crude drivers on the surface of Comet 1. The drives create a small lateral thrust, redirecting the comet to just miss Earth. Two of the three comets are redirected to impact Mars, the first stage of a massive terraforming effort to prepare that second Human planet for a colony. Bergmann Ventures Inc. Guy's space venture prepares for a post-comet growth phase that will place Humans in space permanently so they may interact with the Concordat's Hub Planets and cultures. Bergmann's Equestrian Venture Bk 4 relates the first phase of the post-comet expansion into space with the introduction of horses to the Concordat planet Baldon. Bergmann's Orbitat Bk 5 defines the construction of an orbital habitat at L5, allowing easy access to both the Lunar surface and Mars. *"Bergmann's Orbitat,"* George G. Pinneo, 2006-01-30 *BERGMANN'S ORBITAT* Bk 5 details the return of Bergmann's Team from Stavara in the Hub, bringing back a Banderat shuttle Accelerator they will use to construct an orbital habitat at L5, one of the Earth Moon

libration points using current engineering practice Bergmann's orbital habitat BV1 is spun on its axis at slow speed to create artificial gravity so residents and visitors aren't debilitated by living in zero G The L5 location allows easy access to both the Lunar surface and Mars mission launches Bergmann Ventures Inc BVI will recoup some of the cost by selling seats to visit the orbit and dine in its new restaurant offering stunning views of Earth far below Trips to a new permanent moonbase at Cabeus Crater will help generate revenue

**Toxic Exposures** Susan L. Smith, 2017-01-17 Mustard gas is typically associated with the horrors of World War I battlefields and trenches where chemical weapons were responsible for tens of thousands of deaths Few realize however that mustard gas had a resurgence during the Second World War when its uses and effects were widespread and insidious Toxic Exposures tells the shocking story of how the United States and its allies intentionally subjected thousands of their own servicemen to poison gas as part of their preparation for chemical warfare In addition it reveals the racialized dimension of these mustard gas experiments as scientists tested whether the effects of toxic exposure might vary between Asian Hispanic black and white Americans Drawing from once classified American and Canadian government records military reports scientists papers and veterans testimony historian Susan L Smith explores not only the human cost of this research but also the environmental degradation caused by ocean dumping of unwanted mustard gas As she assesses the poisonous legacy of these chemical warfare experiments Smith also considers their surprising impact on the origins of chemotherapy as cancer treatment and the development of veterans rights movements Toxic Exposures thus traces the scars left when the interests of national security and scientific curiosity battled with medical ethics and human rights

**Next Steps for Functional Genomics** National Academies of Sciences, Engineering, and Medicine, Division on Earth and Life Studies, Board on Life Sciences, 2020-12-18 One of the holy grails in biology is the ability to predict functional characteristics from an organism's genetic sequence Despite decades of research since the first sequencing of an organism in 1995 scientists still do not understand exactly how the information in genes is converted into an organism's phenotype its physical characteristics Functional genomics attempts to make use of the vast wealth of data from omics screens and projects to describe gene and protein functions and interactions A February 2020 workshop was held to determine research needs to advance the field of functional genomics over the next 10-20 years Speakers and participants discussed goals strategies and technical needs to allow functional genomics to contribute to the advancement of basic knowledge and its applications that would benefit society This publication summarizes the presentations and discussions from the workshop
