Bergson And Modern Thought Towards A Unified Science:

Bergson and Modern Thought Andrew C. Papanicolaou, Pete Addison Y. Gunter, 1987 This work demonstrates the striking kinship between developments in modern physics and Bergson's own work on intuition determinism and the consciousness of the observer Taking as a starting point the schism between physics and the life sciences the contributors follow the diverse paths of Bergson's thought towards a restoration of epistemological unity Scientists philosophers psychologists and students of general science will find this volume interesting Annotation copyrighted by Book News Inc Portland OR

Bergson And Modern Thought Pete A Y Gunter, Andrew C. Papanicolaou, 2016-05-13 First Published in 1987 This book explores the implications of Henri Bergson's philosophy for contemporary science discussing the misinformed view that Bergsonism stands for a romantic revival of anti scientific vitalism notwithstanding Likewise this study draws value in that Bergson's philosophy appears to offer guidelines as to how to restore paradigmatic cohesiveness between modern physics and the life sciences The authors argue that Bergson's ideas stand a better chance of being appreciated and their heuristic value harnessed today because the infra structure alluded to before is now in place

Founders of Constructive Postmodern Philosophy David Ray Griffin, John B. Cobb, Marcus P. Ford, Pete A. Y. Gunter, Peter Ochs, 1993-01-01 In presenting Peirce James Bergson Whitehead and Hartshorne as members of a common and distinctively postmodern trajectory this book casts the thought of each of them in a new light It also suggests a new direction for the philosophical community as a whole now that the various forms of modern philosophy and even the deconstructive form of postmodern philosophy are widely perceived to be dead ends This new option offers the possibility that philosophy may recover its role as critic and guide within the more general culture a recovery that is desperately needed in these perilous times

Divine Beauty Daniel A. Dombrowski, 2004 Offers the first detailed explication of Charles Hartshorne's aesthetic theory and its place within his theocentric philosophy

André Bazin's Film Theory Angela Dalle Vacche, 2020 Through metaphors and allusions to art science and religion Andr Bazin's writings on the cinema explore a simple yet profound question what is a human For the famous French film critic a human is simultaneously a rational animal and an irrational being Bazin's idea of the cinema is a mind machine where the ethical implications have priority over aesthetic issues And in its ability to function as an art form for the masses cinema is the only medium that can address an audience at the individual and community levels simultaneously the audience sees the same film but each individual relates to the narrative in a different way In principle cinema can unsettle our routines in productive ways and expand our sense of belonging to a much larger picture By arguing that this dissident Catholic's worldview is anti anthropocentric Angela Dalle Vacche concludes that Andr Bazin's idea of the cinema recapitulates the histories of biological evolution and modern technology inside our consciousness Through the projection of recorded traces of the world onto a brain like screen the cinema can open viewers up to self interrogation and empathy towards Otherness Bazin was neither a spiritualist nor an animist or a pantheist yet his film theory leads also to

ideas of a more cosmological persuasion through editing and camera movement cinema explores our belonging to a vast universe that extends from the microbes of the microscope to the stars of the telescope Such ideas of connectedness coupled with Bazin's well known emphasis of realism form the foundation for his film theory's embrace of Italian neorealism Choosing to avoid a quantitative naturalism based on accumulation of details Bazin's theory instead promotes the kind of cinema that celebrates perceptual displacement the objectification of human behavior and one's own critical self awareness

Luft, 2022-12-23 Essays and other short works on Hegel Heidegger Nietzsche Burke Stepelevich Schopenhauer Plotinus Mary Walker Edgar Bauer mental imagery the principle of sufficient reason special collections librarianship psychiatry time contract bridge etc **The New Bergson** John Mullarkey, 1999 At the threshold of the twentieth century Bergson reset the agenda for philosophy and its relationship with science art and even life itself Concerned with both examining and extolling the phenomena of time change and difference he was at one point held as both the greatest thinker in the world and the most dangerous man in the world Yet the impact of his ideas was so all pervasive among artists philosophers and politicians alike that by the end of the First World War it had become impossibly diffuse In a manner imitating his own cult of change the Bergsonian school departed from the scene almost as quickly as it had arrived As part of a current resurgence of interest in Bergson both in Europe and in North America this collection of essays addresses the significance of his philosophical legacy for contemporary thought *Hegel, Deleuze, and the Critique of Representation* Henry Somers-Hall, 2012-02-14 Hegel Deleuze and the Critique of Representation provides a critical account of the key connections between twentieth century French philosopher Gilles Deleuze and nineteenth century German idealist G W F Hegel While Hegel has been recognized as one of the key targets of Deleuze's philosophical writing Henry Somers Hall shows how Deleuze's antipathy to Hegel has its roots in a problem the two thinkers both try to address getting beyond a philosophy of judgment and the restrictions of Kant's transcendental idealism By tracing the development of their attempts to address this problem Somers Hall offers an interpretation of the sweep of nineteenth and twentieth century philosophy providing a series of analyses of key moments in the history of thought including the logics of Aristotle and Russell Kant's own philosophy of judgment and the philosophy of Bergson He also develops a novel interpretation of Deleuze's philosophy of difference and situates his philosophy in relation to the broader post Kantian tradition In addition to Deleuze's relation to Hegel the book makes important contributions to the study of Deleuze's philosophy of mathematics as well as to the study of several underappreciated areas of Hegel's own philosophy *Cinema and Language Loss* Tijana Mamula, 2013-03-05 Cinema and Language Loss provides the first sustained exploration of the relationship between linguistic displacement and visuality in the filmic realm examining in depth both its formal expressions and theoretical implications Combining insights from psychoanalysis philosophy and film theory the author argues that the move from one linguistic environment to another profoundly destabilizes the subject's relation to

both language and reality resulting in the search for a substitute for language in vision itself a reversal as it were of speaking into seeing The dynamics of this shift are particularly evident in the works of many displaced filmmakers which often manifest a conflicted interaction between language and vision and through this question the signifying potential and the perceptual ambiguities of cinema itself In tracing the encounter between cinema and language loss across a wide range of films from Billy Wilder's *Sunset Boulevard* to Chantal Akerman's *News from Home* to Michael Haneke's *Caché* Mamula reevaluates the role of displacement in postwar Western film and makes an original contribution to film theory and philosophy based on a reconsideration of the place of language in our experience and understanding of cinema **The Zero**

Fallacy and Other Essays in Neoclassical Philosophy Charles Hartshorne, 1997 For seven decades Charles Hartshorne has presented his philosophical themes with ingenuity and deep historical awareness comparing his positions in illuminating fashion with those of major figures from Plato to Kant to Popper Integral to Hartshorne's thinking have been bold fresh interpretations of such notions as God freedom change creativity aesthetic meaning the social character of experience and generalized causal possibility with a place for probabilities and open possibilities *Twentieth-Century Philosophy of Religion* Graham Oppy, N. N. Trakakis, 2014-09-11 The twentieth century saw religion challenged by the rise of science and secularism a confrontation which resulted in an astonishingly diverse range of philosophical views about religion and religious belief Many of the major philosophers of the twentieth century James Bergson Russell Wittgenstein Ayer Heidegger and Derrida significantly engaged with religious thought Idiosyncratic thinkers such as Whitehead Levinas and Weil further contributed to the extraordinary diversity of philosophical investigation of religion across the century In their turn leading theologians and religious philosophers notably Buber Tillich and Barth directly engaged with the philosophy of religion Later philosophy of religion became a distinct field of study led by the work of Hick Alston Plantinga and Swinburne *Twentieth Century Philosophy of Religion* provides an accessible overview of the major strands in the rich tapestry of twentieth century thought about religion and will be an indispensable resource for any interested in contemporary philosophy of religion

Bion's Sources Nuno Torres, R.D. Hinshelwood, 2013-03-12 There are an increasing number of publications concerned with the work of Wilfred Bion 1897-1979 Many have sought new ideas from his writing however little attention has been paid to the intellectual context in which Bion wrote Bion's *Sources* traces where Bion's new ideas came from what job he required of them how successfully he used his context and how that has fertilised psychoanalysis Expert contributors provide chapters on areas of the intellectual context separate from or adjacent to clinical psychoanalysis in Britain which have clearly influenced the texts Bion left those published in his life time or subsequently Chapters explore the influences deriving from Wilfred Trotter Henri Bergson and process philosophy Kurt Lewin and group dynamics Immanuel Kant R.B. Braithwaite and the philosophy of science the mathematics of notation and transformation as well as the work of psychoanalysts who have applied their theories to social science psychosomatics and literature and the humanities By contextualising Bion in the wider

culture of ideas and removing him from the exclusive world of Psychoanalysis Bion's Sources aims to moderate his genius by showing how it was shaped by very wide influences This book will be of interest to psychoanalysts clinicians and those interested in the history of psychoanalytic ideas *Actology* Malcolm Torry,2020-07-08 Two streams run through the Western philosophical stream one characterized by Being beings the unchanging the static and the unitary and the other by Action actions the changing the dynamic and the diverse The former might be represented by Parmenides Plato and much of what followed the latter by Heraclitus and by rather less of what followed The book explores the Action stream as it wound its way through history through Heraclitus Plato Aristotle Hegel Maurice Blondel Henri Bergson Pierre Teilhard de Chardin process philosophy and theology Geoffrey Studdert Kennedy Ludwig Wittgenstein and John Boys Smith The journey enables us to create the beginnings of an actology a way of seeing ourselves the universe and God in terms of actions in patterns rather than as beings that change Such an actology offers a complete alternative narrative far more in tune with the diverse and rapidly changing world in which we live than the ontology that has shaped philosophy theology and much else for the past two thousand years **Rethinking Basic Design in Architectural Education** Mine Ozkar,2017-03-27 Rethinking

Basic Design in Architectural Education provides historical and computational insights into beginning design education for architecture Inviting the readers to briefly forget what is commonly known as basic design it delivers the account of two educators Denman W Ross and Arthur W Dow from the turn of the twentieth century in Northeast America interpreting key aspects of their methodology for teaching foundations for design and art This alternate intellectual context for the origins of basic design as a precursor to computational design complements the more haptic more customized and more open source design and fabrication technologies today Basic design described and illustrated here as a form of low tech computation offers a setting for the beginning designer to consciously experience what it means to design Individualized dealings with materials tools and analytical techniques foster skills and attitudes relevant to creative and technologically adept designers The book is a timely contribution to the theory and methods of beginning design education when fast changing design and production technology demands change in architecture schools foundations curricula **Reality, Science and the**

Sanatan Dr. Sharad S. Chauhan,2024-02-29 Explore the captivating confluence of ancient wisdom and modern science in Reality Science and Sanatan Authored by a seasoned police officer and medical graduate this ground breaking exploration unveils the profound connections between Sanatan philosophy and contemporary Science and physics Sanatan philosophy stands out for its profound depth and striking parallels with modern science owing to the extraordinary gifts of ancient Indians a remarkable capacity for abstraction mastery in mathematics and the precision of Sanskrit as a perfect language for expression In a commendable and rare feat the author with dual expertise in medicine and law enforcement defies conventions Few contemporaries dare to venture where ancient philosophy meets the frontiers of modern science making this literary endeavour an extraordinary achievement Brace yourself to expand your mind and challenge preconceptions in a

world that defies understanding as this unique journey beckons you to unravel the mysteries of existence **Biocentrism and Modernism** Oliver A.I. Botar, 2017-07-05 Examining the complex intersections between art and scientific approaches to the natural world Biocentrism and Modernism reveals another side to the development of Modernism While many historians have framed this movement as being mechanistic and against nature the essays in this collection illuminate the role that nature centric ideologies played in late nineteenth to mid twentieth century Modernism The essays in Biocentrism and Modernism contend that it is no accident that Modernism arose at the same time as the field of modern biology From nineteenth century discoveries to the emergence of the current environmentalist movement during the 1960s artists architects and urban planners have responded to currents in the scientific world Sections of the volume treat both philosophic worldviews and their applications in theory historiography and urban design This collection also features specific case studies of individual artists including Raymond Duchamp Villon Paul Klee Wassily Kandinsky and Jackson Pollock

The Role of Experience in Science Academie Internationale de Philosophie, 1988 **10 Years of Neuropharmacology** Nicholas Barnes, 2020-07-08 I am delighted to write a preface for this Celebratory eBook published in the Specialty Section Neuropharmacology within the journal Frontiers in Pharmacology The eBook delivers a compendium of high impact papers published previously in the journal over the last ten years at the time of writing this collection of 20 papers has been viewed 700k times with over 75k downloads Clearly this Section is delivering a useful resource to the scientific and medical research community The scope of the Specialty Section Neuropharmacology is deliberately broad We encourage submission of high quality and impactful papers in the field of neuropharmacology along the full length of the translational escalator from cellular and molecular investigations to clinical trials I believe this is a real strength of the Section and helps attract a diverse readership that builds the stakeholder network to promote further engagement of the Section with the research community I have no doubt that this has contributed to the growth of the Section with submissions and accepted papers displaying 10 year 2009 2019 compound annual growth rates CAGRs of 58% and 78% respectively Vitaly high quality scientific rigour and impact are fundamental to a paper being accepted and this inevitably leads to a relatively high level of rejection but the transparency of the review process means a fair decision is reached Essential for the handling and considered review of submitted papers the Specialty Section Neuropharmacology has a dynamic cohort of Associate Editors that have been selected carefully 81 at the time of writing that represent the full spectrum of neuropharmacology as well as being widespread geographically around the globe The Associate Editors are supported by nearly 500 Review Editors that ensures informed review indeed the relatively open and interactive review process often adds considerably to the accepted version of the paper As we celebrate the success of Frontiers in Pharmacology and the Specialty Section Neuropharmacology with this eBook we must also recognise and be thankful for the hard work and dedication of those in the Editorial Office their enthusiasm and willingness to help is outstanding and they form an integral component of

the overall team that delivers the success I look forward to further success for the Specialty Section Neuropharmacology

Margaret A. Boden, 2006 Cognitive science is among the most fascinating intellectual achievements of the modern era The quest to understand the mind is an ancient one But modern science has offered new insights and techniques that have revolutionized this enquiry Oxford University Press now presents a masterly history of the field told by one of its most eminent practitioners Psychology is the thematic heart of cognitive science which aims to understand human and animal minds But its core theoretical ideas are drawn from cybernetics and artificial intelligence and many cognitive scientists try to build functioning models of how the mind works In that sense Margaret Boden suggests its key insight is that mind is a very special machine Because the mind has many different aspects the field is highly interdisciplinary It integrates psychology not only with cybernetics AI but also with neuroscience and clinical neurology with the philosophy of mind language and logic with linguistic work on grammar semantics and communication with anthropological studies of cultures and with biological and A Life research on animal behaviour evolution and life itself Each of these disciplines in its own way asks what the mind is what it does how it works how it develops and how it is even possible Boden traces the key questions back to Descartes s revolutionary writings and to the ideas of his followers and his radical critics through the eighteenth and nineteenth centuries Her story shows how controversies in the development of experimental physiology neurophysiology psychology evolutionary biology embryology and logic are still relevant today Then she guides the reader through the complex interlinked paths along which the study of mind developed in the twentieth century Cognitive science covers all mental phenomena not just cognition knowledge but also emotion personality psychopathology social communication religion motor action and consciousness In each area Boden introduces the key ideas and researchers and discusses those philosophical critics who see cognitive science as fundamentally misguided And she sketches the waves of resistance and acceptance on the part of the media and general public showing how these have affected the development of the field No one else could tell this story as Boden can she has been a member of the cognitive science community since the late 1950s and has known many of its key figures personally Her narrative is written in a lively swift moving style enriched by the personal touch of someone who knows the story at first hand Her history looks forward as well as back besides asking how state of the art research compares with the hopes of the early pioneers she identifies the most promising current work Mind as Machine will be a rich resource for anyone working on the mind in any academic discipline who wants to know how our understanding of mental capacities has advanced over the years **An Actological Metaphysic** Malcolm Torry, 2023-12-27 An actology introduced by the first book in this series Actology Action Change and Diversity in the Western Philosophical Tradition understands reality as action in changing patterns Actological Readings in Continental Philosophy reads a number of continental philosophers through this lens and An Actology of the Given explores the concepts of the gift givenness and giving in the light

of reality understood as action in changing patterns Mark's Gospel An Actological Reading is what it says it is This fifth book in the series An Actological Metaphysic is a more systematic treatment of cosmology and of such concepts as truth knowledge causality time space life and society to see what happens when they are understood actologically that is with reality understood as action in changing patterns
