Scott, 1998 Developed by an acclaimed history teacher in Iowa this popular resource includes 14 simulations debates guiz games and strategy games It covers key topics from the first explorers to the 2000 presidential elections Convene a constitutional convention re fight the Civil War relive the Crash of 29 and much more Use this ingenious text to reinvigorate your history classes Game Theory and Economic Behaviour Reinhard Selten (Economist, Germany), 1999-03-24 These two volumes constitute an impressive collection of selected path breaking works of Professor Selten Edward Elgar Publications deserve merit for bringing out most frequently cited and prominent articles of Professor Selten in a conveniently available package K Ravikumar Journal of Scientific and Industrial Research In 1994 the Nobel Prize was awarded to Reinhard Selten John Nash and John Harsanyi for pioneering analysis in game theory Selten was the first to refine the Nash equilibrium concept of non cooperative games for analysing dynamic strategic interaction and to apply these concepts to analyses of oligopoly The Worlds of Herman Kahn Sharon Ghamari-Tabrizi, 2009-06-30 Herman Kahn was the only nuclear strategist in America who might have made a living as a standup comedian Indeed galumphing around stages across the country joking his way through one grotesque thermonuclear scenario after another he came frighteningly close In telling the story of Herman Kahn whose 1960 book On Thermonuclear War catapulted him into celebrity Sharon Ghamari Tabrizi captures an era that is still very much with us a time whose innocence gruesome nuclear humor and outrageous but deadly serious visions of annihilation have their echoes in the known unknowns and unknown unknowns that guide policymakers in our own embattled world Portraying a life that combined aspects of Lenny Bruce Hitchcock and Kubrick Ghamari Tabrizi presents not one Herman Kahn but many one who spoke the suffocatingly dry argot of the nuclear experts another whose buffoonery conveyed the ingenious absurdity of it all and countless others who capered before the public ambiguous baffling always open to interpretation This then is a story of one thoroughly strange and captivating man as well as a cultural history of our moment In Herman Kahn s world is a critical lesson about how Cold War

analysts learned to fill in the ciphers of strategic uncertainty and thus how we as a nation learned to live with the peculiarly inventive quality of strategy in which uncertainty generates extravagant threat scenarios Revealing the metaphysical behind the dryly deliberate apparently practical discussion of nuclear strategy this book depicts the creation of a world where clever men fashion Something out of Nothing and establishes Herman Kahn as our first virtuoso of the unknown unknowns

Zones of Control Pat Harrigan, Matthew G. Kirschenbaum, 2016-04-15 A look at wargaming s past present and future from digital games to tabletop games and its use in entertainment education and military planning With examples from Call of Duty Modern Warfare Harpoon Warhammer 40 000 and more Games with military themes date back to antiquity and yet they are curiously neglected in much of the academic and trade literature on games and game history This volume fills that gap providing a diverse set of perspectives on wargaming s past present and future In Zones of Control contributors consider wargames played for entertainment education and military planning in terms of design critical analysis and historical contexts They consider both digital and especially tabletop games most of which cover specific historical conflicts or are grounded in recognizable real world geopolitics Game designers and players will find the historical and critical contexts often missing from design and hobby literature military analysts will find connections to game design and the humanities and academics will find documentation and critique of a sophisticated body of cultural work in which the complexity of military conflict is represented in ludic systems and procedures Each section begins with a long anchoring chapter by an established authority which is followed by a variety of shorter pieces both analytic and anecdotal Topics include the history of playing at war operations research and systems design wargaming and military history wargaming s ethics and politics gaming irregular and non kinetic warfare and wargames as artistic practice *Tor!* Ulrich Hesse-Lichtenberger, 2003 Richter Alan McGowan, 2018-10-05 German master Kurt Richter 1900 1969 made significant contributions to the chess world as a player and as an editor and author Unassuming in real life Richter was a fearsome opponent who expressed himself mainly through his over the board results as well as through his chess journalism and literary output He was responsible for several innovative openings some of which gained renewed status in later years This overview of his life and games sheds light on a player who should be better known with much never before seen material Examples of his entertaining writings on chess are included some featuring his fictitious student opponent Dr Zabel A wide selection of games illustrates the surprising combinations and brilliant style of play that earned him the title The Executioner of Berlin Olympic Opening Ceremonies Daniel Malanski, 2025-04-25 This is the first book to unpack the history and significance of the opening ceremony of the Olympic Games the frontispiece of the most watched event on Earth Covering the period from the Moscow Olympics in 1980 to Tokyo 2020 the book examines when how and why the Olympic opening ceremonies artistic programme became the multi act spectacles seen today It argues that the embedded nationalistic ethnic and environmental discourses contained in opening ceremonies have much to tell us about national narratives memory and myth making about the history of

representation and about how the Olympics and the spectacle of mega events are prisms through which local and global socio political issues are refracted from the climate crisis and the struggle for minority rights to the emergence of a multi polar world This book is fascinating reading for anybody with an interest in the sociology culture history or politics of sport and events geopolitics or performance studies Performing Mixed Reality Steve Benford, Gabriella Giannachi, 2022-11-01 A computer scientist and a performance and new media theorist define and document the emerging field of mixed reality performance Working at the cutting edge of live performance an emerging generation of artists is employing digital technologies to create distinctive forms of interactive distributed and often deeply subjective theatrical performance The work of these artists is not only fundamentally transforming the experience of theater it is also reshaping the nature of human interaction with computers In this book Steve Benford and Gabriella Giannachi offer a new theoretical framework for understanding these experiences which they term mixed reality performances and document a series of landmark performances and installations that mix the real and the virtual live performance and interactivity Benford and Giannachi draw on a number of works that have been developed at the University of Nottingham's Mixed Reality Laboratory describing collaborations with artists most notably the group Blast Theory that have gradually evolved a distinctive interdisciplinary approach to combining practice with research They offer detailed and extended accounts of these works from different perspectives including interviews with the artists and Mixed Reality Laboratory researchers The authors develop an overarching theory to guide the study and design of mixed reality performances based on the approach of interleaved trajectories through hybrid structures of space time interfaces and roles Combinations of canonical participant and historic trajectories show how such performances establish complex configurations of real and virtual local and global factual and fictional and personal and social *Identify and Sort* Ansorge Josef Teboho, 2016 The advent of information technology ushered in new forms of political power Machines play crucial roles in how states see understand and act and scrutiny of these processes lies at the heart of Identify and Sort It frames debates about IT in world politics explaining how industrial sorting systems employed by political actors are renegotiating the social contract between individuals and the state Ansorge takes the reader on a global expedition that tracks the historical antecedents of digital power from Aztec and Inca rituals to medieval filing systems to a grandiose 1930s design for a German registry to the databases used in US presidential campaigns and how IT is deployed in war and post conflict reconstruction Databases are also deployed virtually to record and act upon people who have no publicly visible identification or group consciousness modern wars and election campaigns are fought on this individualised terrain The uneven distribution of these technical capacities engenders inequality of access while rights discourses and legal frameworks forged in an era of mass group discrimination subjugation and public resistance lag behind these micro targeting practices Rich in examples and ideas Identify and Sort develops an analytical model and vocabulary to explain the functions and limits of digital power in world politics **Games of the North American Indians**
