Sustainable High Volume Road and Rail Transport in Low Income Countries Michael Burrow, Gurmel Ghataora, Bruce Thompson, Bernard Obika, 2021-01-13. This Special Issue presents an in-depth analysis of transport research commissioned by the UK Department for International Development under the High Volume Transport Programme 2017-2023. The analysis done in the period 2018-2019 contributes to the UK response to improving transport in the low-income countries in Africa and South Asia. As a result, key priorities have been identified for applied research in 2020 to make road, rail, and urban transport more efficient and affordable and all transport greener, safer, and more inclusive for all users. This applied research is a vital link in making transport a sustainable lifeline for people in low-income countries because transport gives farmers and manufacturers access to domestic and international markets and people in rural and urban areas access to schools and health services.
