Beside The Point:

Alhacen's Theory of Visual Perception Alhazen, A. Mark Smith, 2001 Sometime between 1028 and 1038 Ibn al Haytham completed his monumental optical synthesis Kitab al Manazir Book of Optics By no later than 1200 and perhaps somewhat earlier this treatise appeared in Latin under the title De aspectibus In that form it was attributed to a certain Alhacen These differences in title and authorial designation are indicative of the profound differences between the two versions Arabic and Latin of the treatise In many ways in fact they can be regarded not simply as different versions of the same work but as different works in their own right Accordingly the Arab author Ibn al Haytham and his Latin incarnation Alhacen represent two distinct sometimes even conflicting interpretive voices And the same holds for their respective texts To complicate matters Alhacen does not represent a single interpretive voice There were at least two translators at work on the Latin text one of them adhering faithfully to the Arabic original the other content with distilling even paraphrasing the Arabic original Consequently the Latin text presents not one but at least two faces to the reader This two volume critical edition represents fourteen years of work on Dr Smith's part Awarded the 2001 J F Lewis Award *Kenya Gazette*, 1951-05-29 The Kenya Gazette is an official publication of the government of the Republic of Kenya It contains notices of new legislation notices required to be published by law or policy as well as other announcements that are published for general public information It is published every week usually on Friday with occasional releases of special or supplementary editions within the week
