[The Strategies of Australia's Universities](#) Timothy Devinney, Grahame Dowling, 2020-05-15 Over the last few decades universities in Australia and overseas have been criticized for not meeting the needs and expectations of the societies in which they operate At the heart of this problem is their strategy This book reviews the organizational level strategies of some of Australia's prominent universities It is based on their public documents that boldly report how they see their role in society and how they intend to navigate the future These strategic statements are written to proclaim relevance showcase achievements attract students and help to gain the support of the communities in which they operate Using a strategy framework taught in their business schools this book suggests that most such statements are deficient Grand aspirations substitute for realistic operations and outcomes The analysis also suggests that many of Australia's universities are poorly governed and have become too complex and bureaucratic A greater focus on their core responsibilities would help alleviate their current funding predicament
