*The Best and the Brightest* David Halberstam, 2001 A study of the men who came to power during the Kennedy and Johnson administrations and of their leadership of America during the sixties **America in White, Black, and Gray** Klaus P. Fischer, 2006-01-01 Numerous studies on various aspects of the issues of the 1960s have been written over the past 35 years but few have so successfully integrated the many sided components into a coherent synthetic and reliable book that combines good storytelling with sound scholarly analysis **The Human Face of Global Mobility** Michael Peter Smith, Adrian Favell, Alongside flows of trade and capital the free movement of professionals technical personnel and students is seen as a key aspect of globalization Yet not much detailed empirical research has been completed about the trajectories and experiences of these highly skilled or highly educated international migrants What little is known about these forms of global mobility and the politics that surround them contrasts with the abundant theories and accounts of other types of international migration such as low income economic migration from less developed to core countries in the international political economy Drawing on the work of a long standing discussion group at the Center for Comparative and Global Research of UCLA s International Institute this collection bridges conventional methodological divides bringing together political scientists sociologists demographers and ethnographers It explores the reality behind assumptions about these new global migration trends It challenges widely held views about the elite characteristics of these migrants the costs

and consequences of the brain drain said to follow from the migration of skilled workers the determinants of national policies on high skilled migrants and the presumed effortlessness of professional mobility in an integrating world The volume also sheds new light on international student migration the politics of temporary non immigrant workers in the United States new international forms of regulating movement and the realities of the everyday lives of multinational employees in the world's transnational cities Key differences between the regional contexts of this migration in Europe North America and the Asia Pacific are also emphasized Michael Peter Smith is professor of community studies at the University of California Davis He has published extensively on urban theory globalization and transnationalism including *Transnationalism from Below* and *City and Nation* both available through Transaction and *Transnational Urbanism* Adrian Favell is associate professor of sociology at UCLA He is the author of *Philosophies of Integration* and has published widely on migration in Europe citizenship the integration of immigrants and on social theory

*Stuck in the Shallow End, updated edition* Jane Margolis, 2017-03-03 Why so few African American and Latino students study computer science updated edition of a book that reveals the dynamics of inequality in American schools The number of African Americans and Latino students receiving undergraduate and advanced degrees in computer science is disproportionately low And relatively few African American and Latino high school students receive the kind of institutional encouragement educational opportunities and preparation needed for them to choose computer science as a field of study and profession In *Stuck in the Shallow End* Jane Margolis and coauthors look at the daily experiences of students and teachers in three Los Angeles public high schools an overcrowded urban high school a math and science magnet school and a well funded school in an affluent neighborhood They find an insidious virtual segregation that maintains inequality The race

gap in computer science Margolis discovers is one example of the way students of color are denied a wide range of occupational and educational futures

*Stuck in the Shallow End* is a story of how inequality is reproduced in America and how students and teachers given the necessary tools can change the system Since the 2008 publication of *Stuck in the Shallow End* the book has found an eager audience among teachers school administrators and academics This updated edition offers a new preface detailing the progress in making computer science accessible to all a new postscript and discussion questions coauthored by Jane Margolis and Joanna Goode

*The Icarus Syndrome* Peter Beinart, 2010 In *The Icarus Syndrome* Peter Beinart tells a tale as old as the Greeks a story about the seductions of success Beinart describes Washington on the eve of three wars World War I Vietnam and Iraq three moments when American leaders decided they could remake the world in their image Each time leading intellectuals declared that history was over and the spread of democracy was inevitable Each time a president held the nation in the palm of his hand And each time a war conceived in arrogance brought untold tragedy In dazzling colour Beinart portrays three extraordinary generations the progressives who took America into World War I led by Woodrow Wilson the lonely preacher's son who became the closest thing to a political messiah the world had ever seen The Camelot intellectuals who took America into Vietnam led by Lyndon Johnson who lay awake night after night shaking with fear that his countrymen considered him weak And George W Bush and the post cold war neoconservatives the romantic bullies who believed they could bludgeon the Middle East and liberate it at the same time Like Icarus each of these generations crafted wings a theory about America's relationship to the world They flapped carefully at first but gradually lost their inhibitions until giddy with success they flew into the sun But every era also brought new leaders and thinkers who found wisdom in pain They reconciled American optimism our belief that anything is possible with the realities of a world that will never fully bend to our will In their struggles lie the seeds of American renewal today Based on years of research *The Icarus Syndrome* is a provocative and strikingly original account of hubris in the American century and how we learn from the tragedies that result

Cuordileone,2012-11-12 *Manhood and American Political Culture in the Cold War* explores the meaning of anxiety as expressed through the political and cultural language of the early cold war era Cuordileone shows how the preoccupation with the soft malleable American character reflected not only anti Communism but acute anxieties about manhood and sexuality Reading major figures like Arthur Schlesinger Jr Adlai Stevenson Joseph McCarthy Norman Mailer JFK and many lesser known public figures Cuordileone reveals how the era s cult of toughness shaped the political dynamics of the time and inspired a reinvention of the liberal as a cold warrior     *The Poultry Book; Comprising the Characteristics, Management, Breeding and Medical Treatment of Poultry ... with Coloured Representations ... fellow citizens It includes some analysis and scholarly approaches but it also includes direct responses and firsthand field reports The second part features the words of hurricane survivors displaced from New Orleans and other Gulf Coast communities to Houston Texas In many cases the victims themselves were the first responders rescuing family friends and strangers All of the stories whether from the outside or inside responders reveal a shared history of close knit community bonds and survival skills sharpened by hard times This book is about what went right in the aftermath of Katrina and Rita in spite of all that went so wrong
