Best Of Intentions Americas Campaign Against Strategic Weapons Proliferation:

Weapons Proliferation and War in the Greater Middle East Richard L. Russell, 2007-05-07 This important new book explores the strategic reasons behind the proliferation of nuclear biological and chemical weapons as well as ballistic missile delivery systems in the Greater Middle East It examines the uses and limitations of chemical weapons in regional combat ballistic missile warfare and defenses as well as Iran s drive for nuclear weapons and the likely regional reactions should Tehran acquire a nuclear weapons inventory This book also discusses Chinese assistance to WMD and ballistic programs in the Greater Middle East Finally this book recommends policy options for American diplomacy to counter the challenges posed by WMD proliferation This essential study prepares the ground for the challenges facing the international community Richard Russell is a professor at the National Defense University s Near East South Asia Center for Strategic Studies in Washington DC He also teaches at the Security Studies Program at Georgetown University He previously served as a political military analyst at the CIA

Taming the Next Set of Strategic Weapons Threats Henry D. Sokolski, 2006 Missile defense and unmanned air vehicle related technologies are proliferating for a variety of perfectly defensive and peaceful civilian applications This same know how can be used to defeat U S and allied air and missile defenses in new ways that are far more stressful than the existing set of ballistic missile threats Unfortunately the Missile Technology Control Regime is not yet optimized to cope with these challenges Nuclear technologies have become much more difficult to control since new centrifuge uranium enrichment facilities and relatively small fuel reprocessing plants can now be built and hidden much more readily than nuclear fuel making plants that were operating when the Nuclear Nonproliferation Treaty and the bulk of International Atomic Energy Agency inspections procedures were first devised 30 or more years ago This volume is designed to highlight what might happen if these emerging threats go unattended and how best to mitigate them

Nuclear Proliferation and International Security Sverre Lodgaard, Bremer Maerli, 2007-06-11 The Nuclear Non Proliferation Treaty has long been key in non proliferation and disarmament activities The Treaty is the major international legal obstacle for states seeking nuclear weapon capabilities In retrospect and despite setbacks the overall impact of the Nuclear Non Proliferation Treaty has been significant and gratifying Its continued success is by no means guaranteed As old nuclear dangers persist and new ones evolve policies to halt nuclear proliferation are more disparate than at any other time Nuclear weapons remain an essential part of the security policies of leading states and many developmental states maintain strong nuclear weapon ambitions while terrorists have actively been seeking nuclear capabilities In search of an overarching strategy that recognizes both the flaws of the existing non proliferation regime and the value of some of the corrections proposed by regime critics this volume assesses contemporary efforts to stem nuclear proliferation In doing so Nuclear Proliferation and International Security examines a number of cases with a view to recommending better non proliferation tools and strategies The contributors comprise renowned international scholars who have been selected to obtain the best

possible analyses of critically important issues related to international non proliferation dynamics and the future integrity of the Non Proliferation Treaty

Nuclear Energy Charles D. Ferguson,2011-05-17 In *Nuclear Energy* What Everyone Need to Know Charles Ferguson provides an authoritative but highly accessible guide to the controversial issue of nuclear power He contrasts its potential for providing electrical power that is very low in greenhouse gas emissions with the threat that its fuel and waste pose

Parameters ,2002

Nuclear Nonproliferation Phillip Margulies,2008 History suggests that the existence of a weapon leads to its eventual use in war as illustrated by the dropping of the atomic bomb on the Japanese cities of Hiroshima and Nagasaki in 1945 At the opening of the atomic age scientists political analysts generals and politicians were haunted by the idea that nuclear wars could not be won both sides would be virtually destroyed The stakes of the game have only continued to rise as the club of nations currently possessing nuclear arms has become less and less exclusive the United States the Soviet Union Russia England France China Israel India Pakistan and North Korea Following a detailed analysis of this timely issue *Nuclear Nonproliferation* explores the threat of nuclear production and the potential for solutions in four regions of the world the United States South Asia India and Pakistan the Middle East Israel Iraq and Iran and East Asia North Korea

Bargaining on Nuclear Tests Or Rabinowitz,2014-04 *Bargaining on Nuclear Tests* tells the yet untold story of how Washington under Ronald Reagan s presidency duplicated the nuclear deal on ambiguity reached with Israel in 1969 in its dealings with Pakistan and South Africa in 1981 It puts the story of nuclear tests at the heart of a new Cold War historical narrative

Achieving Nuclear Ambitions Jacques E. C. Hymans,2012-02-16 From Iraq to Iran and from Libya to North Korea recent attempts to join the club of nuclear powers have tended to lose their momentum or even to fail outright This book shows how developing country rulers unintentionally thwart their own nuclear ambitions by undermining their scientific and technical workers

Social Knowledge in the Making Charles Camic,Neil Gross,Michèle Lamont,2012-07-24 Over the past quarter century researchers have successfully explored the inner workings of the physical and biological sciences using a variety of social and historical lenses Inspired by these advances the contributors to *Social Knowledge in the Making* turn their attention to the social sciences broadly construed The result is the first comprehensive effort to study and understand the day to day activities involved in the creation of social scientific and related forms of knowledge about the social world The essays collected here tackle a range of previously unexplored questions about the practices involved in the production assessment and use of diverse forms of social knowledge A stellar cast of multidisciplinary scholars addresses topics such as the changing practices of historical research anthropological data collection library usage peer review and institutional review boards Turning to the world beyond the academy other essays focus on global banks survey research organizations and national security and economic policy makers *Social Knowledge in the Making* is a landmark volume for a new field of

inquiry and the bold new research agenda it proposes will be welcomed in the social science the humanities and a broad range of nonacademic settings *Leadership and Policy Innovation--from Clinton to Bush* Joseph R. Cerami, 2013 Smartly and appealingly positioned at the intersection of theory and practice Joseph Cerami's book is an essential resource for students and researchers in search for a coherent picture of policy innovation and leadership of U S and U N efforts to design and implement Weapons of Mass Destruction policy initiatives *Getting MAD* Henry D. Sokolski, 2004 *Getting MAD* Nuclear Mutual Assured Destruction Its Origins and Practice is the first critical history of the intellectual roots and actual application of the strategic doctrine of nuclear mutual assured destruction or MAD Written by the world's leading French British and American military policy planners and analysts this volume examines how MAD and its emphasis on the military targeting of population centers influenced the operational plans of the major nuclear powers and states such as Pakistan India and Israel Given America's efforts to move away from MAD and the continued reliance on MAD thinking by smaller nations to help justify further nuclear proliferation *Getting MAD* is a timely must read for anyone eager to understand our nuclear past and future *Getting MAD: Nuclear Mutual Assured Destruction, Its Origins and Practice*, 2004 Nearly 40 years after the concept of finite deterrence was popularized by the Johnson administration nuclear Mutual Assured Destruction MAD thinking appears to be in decline The United States has rejected the notion that threatening population centers with nuclear attacks is a legitimate way to assure deterrence Most recently it withdrew from the Anti Ballistic Missile Treaty an agreement based on MAD American opposition to MAD also is reflected in the Bush administration's desire to develop smaller more accurate nuclear weapons that would reduce the number of innocent civilians killed in a nuclear strike Still MAD is influential in a number of ways First other countries like China have not abandoned the idea that holding their adversaries cities at risk is necessary to assure their own strategic security Nor have U S and allied security officials and experts fully abandoned the idea At a minimum acquiring nuclear weapons is still viewed as being sensible to face off a hostile neighbor that might strike one's own cities Thus our diplomats have been warning China that Japan would be under tremendous pressure to go nuclear if North Korea persisted in acquiring a few crude weapons of its own Similarly Israeli officials have long argued without criticism that they would not be second in acquiring nuclear weapons in the Middle East Indeed given that Israelis surrounded by enemies that would not hesitate to destroy its population if they could Washington finds Israel's retention of a significant nuclear capability totally understandable **Fallout** Grégoire Mallard, 2014-10-20 Many Baby Boomers still recall crouching under their grade school desks in frequent bomb drills during the Cuban Missile Crisis a clear representation of how terrified the United States was of nuclear war Thus far we have succeeded in preventing such catastrophe and this is partly due to the various treaties signed in the 1960s forswearing the use of nuclear technology for military purposes In *Fallout* Grégoire Mallard seeks to understand why some nations agreed to these limitations of their sovereign will and why others decidedly did not He builds his investigation around the 1968 signing of the Nuclear

Nonproliferation Treaty NPT which though binding in nature wasn't adhered to consistently by all signatory nations Mallard looks at Europe's observance of treaty rules in contrast to the three holdouts in the global nonproliferation regime Israel India and Pakistan He seeks to find reasons for these discrepancies and makes the compelling case that who wrote the treaty and how the rules were written whether transparently ambiguously or opaquely had major significance in how the rules were interpreted and whether they were then followed or dismissed as regimes changed In honing in on this important piece of the story Mallard not only provides a new perspective on our diplomatic history but more significantly draws important conclusions about potential conditions that could facilitate the inclusion of the remaining NPT holdouts **Neutral Europe and the Creation of the Nonproliferation Regime** Pascal Lottaz, Yoko Iwama, 2023-11-03 Lottaz Iwama and their contributors investigate the role of neutral and nonaligned European states during the negotiations for the Treaty on the Nonproliferation of Nuclear Weapons NPT Focusing on the years from the Irish Resolution of 1958 until the treaty's opening for signatures ten years later the nine chapters written by area experts highlight the processes and reasons for the political and diplomatic actions the neutrals took and how those impacted the multilateral treaty negotiations The book reveals new aspects of the dynamics that lead to this most consequential multilateral breakthrough of the Cold War In part one three chapters analyze the international system from a bird's eye perspective discussing neutrality nonalignment and the nuclear order The second part features six detailed case studies on the politics and diplomacy of Ireland Sweden Finland Switzerland Austria and Yugoslavia Overall this study suggests that despite the volatile and dangerous nature of the early Cold War the balance of the strategic environment enabled actors that were not part of one or the other alliance system to play a role in the interlocking global politics that finally created the nuclear regime that defines international relations until today A valuable resource for scholars of nonproliferation the Cold War neutrality nonalignment and area studies The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license **Special Bibliography Series**, 1957 **Twenty-First Century Weapons Proliferation** James M. Ludes, Henry Sokolski, 2014-01-14 Leading US security practitioners from the Ford Carter Reagan Bush and Clinton administrations plus other experts on proliferation clarify the weapons proliferation threats that the US and its allies will face and suggest what new policies their governments should consider *The Cold War and After* Marc Trachtenberg, 2012-03-12 A new way of looking at international relations from a leading expert in the field What makes for war or for a stable international system Are there general principles that should govern foreign policy In *The Cold War and After* Marc Trachtenberg a leading historian of international relations explores how historical work can throw light on these questions The essays in this book deal with specific problems with such matters as nuclear strategy and US European relations But Trachtenberg's main goal is to show how in practice a certain type of scholarly work can be done He

demonstrates how in studying international politics the conceptual and empirical sides of the analysis can be made to connect with each other and how historical theoretical and even policy issues can be tied together in an intellectually respectable way These essays address a wide variety of topics from theoretical and policy issues such as the question of preventive war and the problem of international order to more historical subjects for example American policy on Eastern Europe in 1945 and Franco American relations during the Nixon Pompidou period But in each case the aim is to show how a theoretical perspective can be brought to bear on the analysis of historical issues and how historical analysis can shed light on basic conceptual problems

Space Politics and Policy E. Sadeh, 2006-04-11 Space Politics and Policy An Evolutionary Perspective provides a comprehensive survey of Space Policy This book is organized around two themes Space Policy is evolutionary in that it has responded to dramatic political events such as the launching of Sputnik and the Cold War and has undergone dynamic and evolutionary policy changes over the course of the space age Space Policy is an integral part of and interacts with public policy processes in the United States and abroad The book analyzes Space Policy at several levels including historical context political actors and institutions political processes and policy outcomes It examines the symbiotic relationships between policy technology and science provides a review and synthesis of the existing body of knowledge in Space Policy and identifies Space Policy trends and developments from the beginnings of the space age through the current era of the twenty first century
