Miriam Kingsberg, 2013-12-07 This trailblazing study examines the history of narcotics in Japan to explain the development of global criteria for political legitimacy in nations and empires in the nineteenth and twentieth centuries Japan underwent three distinct crises of sovereignty in its modern history in the 1890s during the interwar period and in the 1950s Each crisis provoked successively escalating crusades against opium and other drugs in which moral entrepreneurs bureaucrats cultural producers merchants law

enforcement scientists and doctors among others focused on drug use as a means of distinguishing between populations fit and unfit for self rule Moral Nation traces the instrumental role of ideologies about narcotics in the country's efforts to reestablish its legitimacy as a nation and empire As Kingsberg demonstrates Japan's growing status as an Asian power and a moral nation expanded the notion of civilization from an exclusively Western value to a universal one Scholars and students of Japanese history Asian studies world history and global studies will gain an in depth understanding of how Japan's experience with narcotics influenced global standards for sovereignty and shifted the aim of nation building making it no longer a strictly political activity but also a moral obligation to society *Narcotic Culture* Frank Dikötter, Lars Peter Laamann, Xun Zhou, 2004 China was turned into a nation of opium addicts by the pernicious forces of imperialist trade This study systematically questions this assertion on the basis of abundant archives from China Europe and the US showing that opium had few harmful effects on either health or longevity *Mental Health and Otherness* Ilana Mountian, 2024-12-23 Based on two decades of research in Brazil and the UK this book explores the ways in which intersections of gender race and class affect the positioning of the subject as Other in discourses of health and how the positioning of the subject as Other has implications for health research and mental health practice Drawing on feminist post colonial and decolonial studies psychoanalysis and discourse analysis *Mental Health and Otherness* examines the experiences of immigrants drug users and transsexual people in health and mental health settings and the ways in which stereotypical understandings can affect the subject This book is a study of the discursive construction of ideas about health and mental health in the West and the awareness of processes of othering in clinical practice It will appeal to scholars in psychology sociology and cultural studies with an interest in mental health health care and intersectionality *Crime and Money Laundering* Jyoti Trehan, 2004 Written by an experienced and serving police officer the book is based on two years of academic and field research as a Jawaharlal Nehru Memorial Fellow Trehan starts from the premise that the nature of crime today is transnational and has become more so with the unprecedented development of information technology The book examines various criminal activities that are used to make huge sums of money and then goes on to examine the methods of money laundering which are used to destroy or hide its illegal sources The author also analyses how illegally earned money is used after laundering for legitimate businesses and how money laundering affects national security and even the process of economic liberalization The book includes a discussion of legislative and other responses aimed at countering the dangers of crime and money laundering **No Price Too High** Robert M. Hardaway, 2003-10-30 Hardaway argues the criminalization of victimless crimes violates the Ninth Amendment to the U S Constitution and creates enormous public policy problems in the society He contends that the Ninth Amendment adjudication model and the concepts of self determination and the harm principle are the standards to which privacy issues should be litigated Hardaway contends that privacy issues should be litigated under the standards of the Ninth Amendment to the U S Constitution adjudication model concepts of self determination and the

harm principle The Ninth Amendment follows the true beliefs of the founding fathers and their adherence to Natural Law autonomy liberty and the right to privacy This model needs to replace the substantive due process analysis in the realm of personal autonomy issues used by the courts The recognition of self determination and the harm principle will provide individuals with the constitutional protection of rights the founding fathers thought to be imperative to an ordered liberty By seeking to explain American policy on victimless crimes of which drug use is one Hardaway seeks to stir a vigorous constitutional debate As he shows prostitution and gambling raise similar issues and he questions whether criminalization serves the interests of society In examining drug use prostitution and gambling Hardaway compares the policy rationales for each of these societal problems with a view towards creating a general theory of decriminalization An important analysis for scholars students researchers and public policy makers involved with constitutional law and contemporary criminal law concerns
