Levine,2015-04-01 Deng Xiaoping joined the Chinese Communist movement as a youth and rose in its ranks to become an important lieutenant of Mao s from the 1930s onward Two years after Mao s death in 1976 Deng became the de facto leader of the Chinese Communist Party and the prime architect of China s post Mao reforms Abandoning the Maoist socio economic policies he had long fervently supported he set in motion changes that would dramatically transform China s

economy society and position in the world Three decades later we are living with the results China has become the second largest economy and the workshop of the world And while it is essentially a market economy socialism with Chinese characteristics Deng and his successors ensured the continuation of CCP rule by severely repressing the democratic movement and maintaining an iron grip on power When Deng died at the age of 92 in 1997 he had set China on the path it is following to this day Alexander Pantsov and Steven Levine s new biography of Deng Xiaoping does what no other biography has done based on newly discovered documents it covers his entire life from his childhood and student years to the post Tiananmen era Thanks to unprecedented access to Russian archives containing massive files on the Chinese Communist Party the authors present a wealth of new material on Deng dating back to the 1920s In a long and extraordinary life Deng navigated one epic crisis after another Born in 1904 Deng like many Asian revolutionary leaders spent part of the 1920s in Paris where he joined the CCP in its early years He then studied in the USSR just as Stalin was establishing firm control over the Soviet communist party He played an increasingly important role in the troubled decades of the 1930s and 1940s that were marked by civil war and the Japanese invasion He was commissar of a communist dominated area in the early 1930s loyal henchman to Mao during the Long March regional military commander in the anti Japanese war and finally a key leader in the 1946 49 revolution During Mao s quarter century rule Deng oscillated between the heights and the depths of power He was purged during the Cultural Revolution only to reemerge after Mao s death to become China s paramount leader until his own death in 1997 This objective balanced and unprecedentedly rich biography changes our understanding of one of the most important figures in modern history

seen a sharp increase in tensions and a complete reorientation of American policies toward China from engagement to competition. What happened? In *Breaking the Engagement: How China Won, Lost America*, esteemed scholar David Shambaugh examines the evolution, expansion, and disintegration of the American engagement strategy towards China. Shambaugh attributes the recent sharp deterioration of relations to a combination of China's actions and American expectations. Xi Jinping's increasingly assertive foreign policy and domestic repression has directly challenged American interests. More deeply, he argues that the real underlying cause is America's longstanding paternalistic approach to transform China into a liberal state and society which conforms with the US-led global liberal order. When China has generally evolved in this direction politically, economically, socially, intellectually, and internationally, it corresponds with American aspirations and the two could cooperate. But when Beijing pushes back against this transformative strategy which Beijing sees as subversion, Americans become disillusioned and US policymakers see China as a malign regime which must be countered. By focusing on the role of perceptions and US expectations in fueling the shift towards competition and rivalry in the last decade, Shambaugh provides a unique new perspective on this critical global relationship.

War and Power Phillips Payson O'Brien, 2025-08-28 Phillips O'Brien is one of the keenest observers of modern strategy and his new book takes a deep historical look at the evolution of warfare and its implications for conflicts like the ongoing one in Ukraine. Francis Fukuyama: War and power are two of the most widely discussed issues in all of human history and yet they are time and again misunderstood, often disastrously so. Whilst we might think the outcome of war is determined by so-called Great Powers who dominate their opponents with their impressive size and military prowess, the reality of modern conflict, as renowned strategic historian Professor Phillips Payson O'Brien demonstrates, is very different. He urges us instead to look for Full Spectrum Powers. For if we are considering how powerful a nation is and who will win a war, we need to think less about weapons and more about the economies and societies that produce them, less about individual battles and more about sustaining campaigns and alliances in which states operate. Using fascinating examples from the late 19th century to the present day, *War and Power* explains how misunderstanding war and power has led to terrible, even preventable conflicts, such as the war in Ukraine, and how more accurate analysis can help us consider the potential conflict between the US and China. *War and Power* provides a bold new way of understanding the dangerous world around us. Phillips O'Brien is always fantastic. Heterodox. He's pretty scathing even about Biden administration policy. A really interesting book. Paul Krugman, Distinguished Professor of Economics. As Phillips O'Brien points out in this important book, the character of war evolves, but some of the underlying truths, particularly from the second World War, are still very much with us. Eliot Cohen, Professor Emeritus at Johns Hopkins SAIS. **1990 International Year Book**, 1989 **Problems of Communism**, 1981
