Dependent Development in Korea, 1963-1979 Hyŏn-jin Im, 1986 *Two Koreas in Development* Byoung-Lo Philo Kim, The startling revolutions of recent years have had as great an impact on Northeast Asia as on Eastern Europe Gorbachev's cautious withdrawal of support for North Korea and his establishment of ties with South Korea have created a need for a new research agenda exploring how communism and capitalism in Asia can be successfully restructured or redirected in a new world order Focused on systemic issues this book is the first study to attempt a comprehensive analysis of social and economic development in modern Korea as a whole As a homogeneous nation artificially divided by the competing ideologies of the Cold War Korea provides a unique laboratory for comparing divergent development processes undertaken by conflicting social systems Current theories of Third World development have advocated either capitalist models of modernization or have called for the establishment of self-reliant socialist economies cut off from the world capitalist system While capitalist South Korea has consistently outperformed Communist North Korea since the mid 1970s development has not yet brought a fully evolved Western style democracy in its wake Self-reliant North Korea achieved successful growth during its first fifteen years but has since been faced with numerous structural limitations on sustained development including severe restrictions on political freedom and civil liberties In the author's view the experience of the two Koreas suggests that the solution to underdevelopment must be based on the realization that exclusionary theories need modification in the light of special historical and sociological circumstances peculiar to individual nations This volume offers a valuable interpretation of modern Korean history and constitutes an important contribution to the comparative study of capitalism and communism in practice It will be of particular interest to specialists in international relations and comparative political systems *Democratization and Democracy in South Korea, 1960-Present* Hyug Baeg Im, 2020-08-14 This book analyses democratization and democracy in South Korea since 1960 The book starts with an analysis of the distinctive characteristics of bureaucratic authoritarianism and how democratic transition had been possible after inconclusive and protracted tug of war between authoritarian regime and democratic opposition It then goes on to explore what the opportunities and constraints to the new democracy are to be a consolidated democracy how new democracy had changed the industrial relations in the post transition period how premodern political culture such as Confucian patrimonialism and familism had obstructed democratic consolidation and the improvement of quality of democracy The author compares empirically from the perspective of a comparative political scientist political regime superiority of democracy over authoritarianism with regard to economic development He concludes that democratic incompetence theory has been proven wrong and in South Korea democracy has performed better than authoritarian regimes in terms of economic growth with equity employment distribution of income trade balance and inflation This book will benefit political scientists development economists labor economists religious sociologists military sociologists and historians focusing on East Asian history

From Transition to Power Alternation Carl Saxer, 2013-08-21 In 1987 South Korea began a democratic transition after almost three decades of significant economic development under authoritarian rule Increased civil unrest caused by dissatisfaction resulted in the regime agreeing to constitutional changes in the summer of 1987 By 1992 the first president without a military background was elected and during his tenure a further deepening of democracy took place These reforms were instrumental in making it possible that in 1997 for the first time in South Korean history an

opposition candidate was elected president This book examines the initial transition and later attempts at consolidating democracy in South Korea and argues that although significant progress had been made and a power alternation achieved by late 1997 South Korea could not by the end of that decade 1987-97 be considered a consolidated democracy
